### Proposed Project

Formative and Summative Evaluation of the National Diabetes Prevention Program—Existing Collection Without an OMB Control Number—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

### Background and Brief Description

Findings from randomized controlled trials and translation studies have demonstrated that type 2 diabetes can be prevented or delayed in those at high risk through a structured lifestyle intervention that can be delivered cost effectively in real-world settings. However, several challenges must be addressed to achieve large-scale adoption and implementation of these evidence-based lifestyle change programs.

In response to these challenges, Congress authorized the CDC to establish and lead the National Diabetes Prevention Program (National DPP). CDC developed a year-long, evidence-based lifestyle change program aimed at increasing knowledge and awareness of healthy eating and physical activity among people at-risk for diabetes. In order to bring this compelling intervention to communities across America, CDC funded six grantees under Funding Opportunity Number: DP12-1212PPHF12 to establish and expand "a network of structured, evidence-based lifestyle change programs designed to prevent type 2 diabetes among people at high risk".
