OMB Control Number: 2900–NEW, (VHA Homeless Programs, Project CHALENG (Community Homelessness Assessment, Local Education and Networking Groups)).

Type of Review: New collection.

Abstract: In 1993 the Department of Veterans Affairs (VA) launched Project CHALENG (Community Homelessness Assessment, Local Education and Networking Groups) for Veterans in response to Public Law 102–405 which required VA to make an assessment of the needs of homeless Veterans in coordination with other Federal departments, state and local government agencies, and nongovernmental agencies with experience working with homeless persons. Since 1993, VA has administered a needs assessment in accordance with guidance in Public Law 103–446 and Public Law 105–114.

This collection of information is necessary to ensure that VA and community partners are developing services that are responsive to the needs of local homeless Veterans, in order to end homelessness and prevent new Veterans from experiencing homelessness. Over the years data from CHALENG has assisted VA in developing new services for Veterans such as the Homeless Veteran Dental Program (HVDP), the expansion of the Department of Housing and Urban Development–VA Supportive Housing (HUD–VASH) Program, the Veterans Justice Programs and Supportive Services for Veteran Families (SSVF). In addition community organizations use CHALENG data in grant applications to support services for homeless Veterans; grant applications are for VA, other Federal, local government, and community foundation dollars, which maximizes community participation in serving homeless Veterans.

Affected Public: Individuals or households.

Estimated Annual Burden: 1,650 burden hours.

Estimated Average Burden per Respondent: 5 minutes.

Frequency of Response: Annually.

Estimated Number of Respondents: 15,000.

By direction of the Secretary.

SUPPLEMENTARY INFORMATION: VA’s policy and implementation plan for increased public access to the results of its research was developed in response to White House initiatives on federally funded scientific research. In its

February 22, 2013, memorandum, the White House Office of Science and Technology Policy (OSTP) directed each federal agency with over \$100 million in annual expenditures for the conduct of research and development to develop a plan to support increased public access to the results of research funded by the federal government, including digital data sets and results published in peer-reviewed scholarly publications arising directly from federally-funded research (OSTP, Increasing Access to the Results of Federally Funded Scientific Research, February 22, 2013).

In implementing policies on public access to research publications and digital research data, VA must first remain cognizant of its ethical and legal obligations to safeguard the privacy of Veterans (and VA’s other research subjects) and the confidentiality of their private information, while promoting the highest quality science. VA also recognizes that Veterans and the public at large have a substantive interest in accessing the results of the research that VA conducts. VA’s responsibility precludes unlimited public access to private information about individual research subjects. With this in mind, VA has carefully weighed the public benefits versus the risks of harm to Veterans and other research subjects in establishing the requirements.

VA is committed to ensuring that the final study results, including peer-reviewed publications and digital data from VA-funded scientific research, are made available to the scientific community, industry, and the general public with the fewest constraints possible, while protecting the privacy of the Veterans (and others individuals) about whom research data are obtained and safeguarding the confidentiality of their data.

Requirements for public access to scientific publications will apply to all peer-reviewed publications reporting results of research that are either funded by the VA Office of Research and Development (ORD) or conducted, supported, or sponsored by any Veterans Health Administration (VHA) Program Office.

Requirements for public access to digital data will apply to the final research data underlying all peer-reviewed publications reporting results of research that is either funded by the VA ORD or conducted, supported, or sponsored by any VHA Program Office. VA proposes to begin sharing digital research data through controlled public access mechanisms and move toward open public access to the extent that the protection of Veterans’ identifiable private information can be ensured.
