Notice of Availability of the Draft Environmental Impact Statement for the Proposed Glades Reservoir Water Supply Project, Permit Application SAS–2007–00388 and the Announcement of a Public Hearing

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that the Corps has released a Draft Environmental Impact Statement (DEIS) for the proposed Glades Reservoir water supply project (Proposed Project), and will conduct a Public Hearing for this DEIS.

DATES: Comments will be received until 5:00 p.m., December 29, 2015; or by letter postmarked no later than December 29, 2015. The public hearing will be held on December 8, 2015.

ADDRESSES: Comments regarding the DEIS may be submitted to: U.S. Army Corps of Engineers, Savannah District, Regulatory Division, Attention: SAS–2007–00388, 100 West Oglethorpe Avenue, Savannah, Georgia 31401–3640

FOR FURTHER INFORMATION CONTACT: Richard Morgan, Project Manager, at (912) 652–5139, or at Richard.M.Morgan@usace.army.mil.

SUPPLEMENTARY INFORMATION:

1. National Environmental Policy Act. The Corps prepared this DEIS to meet its National Environmental Policy Act (NEPA) (42 U.S.C. 4321 to 4370f) obligation in its evaluation of an application for a Department of the Army Permit pursuant to Section 404 of the Clean Water Act (CWA) (33 U.S.C. 1344) for the Proposed Project. This DEIS presents the direct, indirect, and cumulative impacts of the Proposed Project on the human and natural environment.

2. Project Description. The Hall County Board of Commissioners submitted an application for a permit to construct an 850-acre pump-storage reservoir on Flat Creek, a tributary to the Chattahoochee River located approximately 35 miles northeast of Atlanta, near the upstream end of Lake Sidney Lanier, in Hall County, Georgia. The proposed dam would have a height of 140 feet, with a normal pool surface elevation of 1,180 feet above mean sea level. Dam and reservoir construction would result in the filling and inundation of 39.2 acres of wetland and 95,000 linear feet of stream. A 37 million gallon per day (mgd) intake and pump station would be constructed on the Chattahoochee River, and would transfer water from the river to the reservoir via a 48-inch diameter, 4-mile transmission pipeline. Water would be pumped from the Chattahoochee River to fill or refill the reservoir only when river flows are above the instream flow protection thresholds (IFPT), and only when the IFPT can be maintained in the river below the pump station. Water stored in the reservoir would be released into Flat Creek, flow downstream into Lake Lanier, and be withdrawn at an existing raw water intake operated by the City of Gainesville. The Proposed Project would provide a total storage volume of 11.7 billion gallons and an annual average water supply of 50 mgd, to meet Hall County's projected water demand through the year 2060.

2. Alternatives. This DEIS evaluated 13 alternatives for the Proposed Project based on a range of Lake Lanier allocations, reservoir sites, reservoir yield, and transmission and treatment strategies. A wide range of water supply sources such as water conservation, additional Lake Lanier water supply allocation, purchase from adjacent counties, and additional groundwater develop.ment were identified prior to
