

Notices

Federal Register

Vol. 80, No. 226

Tuesday, November 24, 2015

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Francis Marion-Sumter Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Francis Marion-Sumter Resource Advisory Committee (RAC) will meet in Columbia, South Carolina. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with Title II of the Act. Additional RAC information, including the meeting agenda and the meeting summary/minutes can be found at the following Web site: <http://www.fs.usda.gov/main/scnfs/workingtogether/advisorycommittees>.

DATES: The meeting will be held December 10, 2015, at 10:00 a.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Harbison State Forest, Environmental Education Center, 5600 Broad River Road, Columbia, South Carolina.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at Francis Marion and Sumter National Forest Headquarters. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT:

Mary Morrison, RAC Coordinator, by phone at 803-561-4000 or via email at mwmorrison@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is:

1. Review project proposals; and
2. Recommend Title II projects.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by November 5, 2015, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time to make oral comments must be sent to Mary Morrison, RAC Coordinator, 4931 Broad River Road, Columbia, South Carolina 29212; by email to mwmorrison@fs.fed.us or via facsimile to 803-561-4004.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: November 17, 2015.

John Richard Lint,

Forest Supervisor, Francis Marion and Sumter National Forest.

[FR Doc. 2015-29877 Filed 11-23-15; 8:45 am]

BILLING CODE 3411-15-P

DEPARTMENT OF AGRICULTURE

Forest Service

Shasta-Trinity National Forest; California; Trinity Post Fire Hazard Reduction and Salvage

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The proposed action would treat approximately 8,100 acres to reduce hazardous conditions within a buffer along open roads that burned in the 2015 wildfires. Standing dead and downed trees would be utilized to the extent practicable.

DATES: Comments concerning the scope of the analysis must be received by December 24, 2015. The draft environmental impact statement is expected April 2016 and the final environmental impact statement is expected August 2016.

ADDRESSES: Send written comments to Trinity Post Fire Hazard Reduction and Salvage Project, Attn: Brenda Olson, Shasta-Trinity National Forest, 3644 Avtech Parkway, Redding, CA 96002. Comments may also be sent via email to comments-pacificsouthwest-shasta-trinity@fs.fed.us, or via facsimile to 530-226-2475.

FOR FURTHER INFORMATION CONTACT: Brenda Olson by phone at 530-226-2422, or by email at brendaolson@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

The Shasta-Trinity National Forest and Six Rivers National Forest have experienced wildfire on approximately 220,000 acres as a result of lighting in 2015. The majority of acres affected are the result of a July 30, 2015 lightning event. Much of the fire areas burned through National Forest System lands, but a number of private landowners were also affected. Approximately 161,000 acres of the Shasta-Trinity National Forest were burned. Wildfires affected most land allocations including designated Wilderness, Adaptive Management Areas, and Late-Successional Reserve, as well as Inventoried Roadless Areas. Fires burned in a mosaic of intensities; acres burned have been categorized into high, moderate and low severity based on Rapid Assessment of Vegetation Condition After Wildfire (RAVG) data. Five fire complexes and one separate

fire burned on the Shasta-Trinity National Forest:

- The Fork Complex near the communities of Hayfork, Post Mountain, and Wildwood (34,500 acres; 8,900 acres of high and moderate severity);
- The South Complex north and east of the community of Hyampom (29,400 acres; 5,900 acres high and moderate severity);
- The Mad River Complex near the communities of Mad River, Ruth, and Forest Glen (39,200 acres; 6,600 acres high and moderate severity);
- The Route Complex near the communities of Mad River and Hyampom (35,700 acres; 6,300 acres high and moderate severity);
- The River Complex near the Hoopa Reservation, the communities of Burnt Ranch and Denny, and within the Trinity Alps Wilderness Area (78,600 acres; 17,100 acres high and moderate severity); and
- The Saddle Fire northwest of the town of Hyampom (1,500 acres; 600 acres high and moderate severity).

A portion of the areas that burned at moderate and high severity had conifer forest cover prior to the fires (other acres were brush, grasslands or oak woodlands). The acres of conifer and mixed conifer forest that burned at high severity generally have no remaining live trees, and the areas that burned at moderate severity also have a high likelihood of deforestation or large pockets of mortality due to fire-injury. Many trees showing signs of live branches or tops immediately following the fire will be lost due to cambium death or secondary mortality from insects compounded by years of drought.

The areas affected by the 2015 wildfires on the Shasta-Trinity National Forest include vegetation along 387 miles of road (353 miles of National Forest System roads, 32 miles administered by state and county). Of these 387 miles, 248 miles are open to the public, including 233 miles through National Forest System lands. The vegetation along these roads experienced wildfire at varying degrees of intensity. Forested lands experiencing moderate and high intensity fire has resulted in a substantial number of dead and dying trees. Structural integrity of fire-killed trees has been compromised and it is expected many of them will fall during a wind or storm event.

Current conditions within the burned area differ from the desired condition as identified in the Shasta-Trinity National Forest Land and Resource Management Plan (Forest Plan; 1995). Trees that were killed by the fire become less stable and

increase the risk to all forest users. Once this material is on the ground and combined with the dead brush, fire behavior is likely to be more intense and more difficult to control. Because of the expected future fire behavior and the elevated risk of fire killed trees falling on firefighters, wildfire suppression strategies would be limited. Desired future conditions would be safe firefighter and public access; conditions that lead to a slower rate of wildfire spread and reduced intensity, with associated increased effectiveness of initial attack by firefighters; and roadside conditions that could be used as a line of defense for control of wildfires.

Within areas experiencing large scale disturbance on the Shasta-Trinity National Forest in 2015 due to wildfire, the purpose of this project is to move towards the desired conditions in the following ways:

1. Reduce hazards (*i.e.* fire-killed trees and excessive fuels) that threaten public and firefighter safety along open National Forest System, County, and State roads;
2. Sustain and establish forest cover; and,
3. Within the treated areas, capture the economic value of felled trees and support the economies of local communities by providing forest products.

Based on the Forest Plan and post fire assessment, we have identified a need to:

- Provide for public safety and protection of structures by managing fuel loading, distribution and arrangement within Wildland Urban Interface for low flame lengths and rate of spread (Forest Plan 4–18);
- Remove danger/hazard trees (Forest Plan 4–26);
- Reduce surplus activity fuels that remain after meeting wildlife, riparian, soil and other environmental needs (Forest Plan, pg. 4–17);
- Create conditions that will support the restoration of fire to its natural role in the ecosystem (Forest Plan 4–4).
- Establish forest stands at densities appropriate to contribute to forest harvest in the future and to maintain wildlife habitat (Forest Plan, pg. 4–154).
- Quickly recover the monetary value of wood through salvage and sale, where feasible and appropriate, to provide economic stimulus to local communities (Forest Plan 4–5).

Proposed Action

Dead vegetation will be treated on National Forest System lands along 233 miles of roads open to the public (*i.e.* National Forest System Roads (NFS),

county roads, and state highways) that burned during the 2015 wildfire season. Treatments are proposed along 233 miles of public roads which cross National Forest System lands, including:

- 153 miles of NFS Maintenance Level 2 (accessible with high clearance vehicles) roads;
- 34 miles of NFS Maintenance Level 3 (accessible with passenger cars) roads;
- 19 miles of NFS Maintenance Level 4 (paved) roads; and
- 27 miles of state and county roads.

Treatments along these roads could include:

- Remove or treat dead vegetation (using one of the “treatment types” listed below) within a 300 foot total width buffer. Width of the buffer on either side of the road would change but would always total 300 feet; *i.e.* if conditions lend to a wider treatment on the uphill side, the uphill side may be treated up to 275 feet from the road and the downhill side would be treated for 25 feet from the road. The area of treatment is approximately 8,100 acres. The minimum treatment area along either side of the road will be 25 feet. Treatment types for both initial entry and maintenance could include:
 - Hand felling of dead trees and brush. Dead vegetation will be identified at the time of treatment.
 - Mastication, which pulverizes or chops standing trees and logs into small particles. This treatment can include mowing, mulching, or chipping.
 - Lopping woody debris (slash) and scattering around the treated area, which redistributes woody material.
 - Hand piling slash, which reduces surface fuels.
 - Machine piling slash, which reduces surface fuels.
 - Pile burning, which reduces surface fuels.
 - Jackpot burning, which is a burning method used to reduce heavy intermittent fuel concentrations, where fuels are not continuous enough to carry a broadcast fire.
 - Broadcast burning, which is a burning method used where heavy continuous fuel concentrations exist.
 - Chipping, which pulverizes or chops trees, brush, and logs into small particles.
- Maintain treated areas through understory burning, where feasible.
- Utilize wood products whenever possible. This can include salvage logs, commercial or personal firewood, biomass removal, etc.
- Large timber sales are expected to be feasible on up to 128 miles of the roads proposed for treatment.
- Provide for future forest cover through planting, utilizing a species

composition consistent with historic conditions, with spacing between seedlings of 18 to 30 feet.

- Create a control line on the outside edge of treatment areas where necessary to maintain fuel reductions with prescribed fire.

- Where appropriate, stumps of freshly cut conifers will be treated with an EPA-registered borate compound to prevent spread of *Heterobasidion* root disease.

- Trees or snags that are imminent hazards to the road and/or operations would be felled; trees that are felled outside the treatment buffer would be left onsite.

- No treatments are proposed within Wilderness.

- Additional Resource Protection Measures will be developed to address resource concerns for wildlife, watersheds, soils and other issues that are identified.

Fuels reduction treatment goals are to:

- Reduce downed logs to 10–20 tons per acre. Downed logs includes woody material >3-inches in diameter including fuels created by salvage and suppression actions.

- Reduce dead brush by 50–100%.

Responsible Official

David R. Myers, Forest Supervisor, Shasta-Trinity National Forest.

Nature of Decision To Be Made

The Forest Supervisor will decide whether to implement the proposed action, take an alternative action that meets the purpose and need or take no action.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. This project is within Wildland Urban Interface and as such is consistent with the Healthy Forest Restoration Act of 2003 (HFRA), which contains provisions to expedite hazardous fuels reduction and forest restoration projects on federal lands. Project authorized under HFRA are defined under Section 102(a) of the act and are designed to actively involve the public (Section 104(e) and (f) of the act). In an effort to provide for collaborative design of this project or alternatives, you are invited to participate in open public meetings at the following locations and times: Hyampom Community Center on November 30, 2015 at 5:00 p.m.; Weaverville Board of Supervisor's Chambers on December 1, 2015 at 5:00 p.m.; Trinity County Fairgrounds dining hall in Hayfork on December 2, 2015 at 5:00 p.m.; Ruth

Lake Community Services District Hall in Mad River on December 3, 2015; and, Burnt Ranch School on December 4, 2015 at 5:00 p.m. Additional project information is available on the project Web site: <http://www.fs.usda.gov/project/?project=48060>.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and alternative means of meeting the purpose and need.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, anonymous comments will not provide the respondent with standing to participate in subsequent administrative review or judicial review. An Emergency Situation Determination will be requested for this project consistent with regulations at 36 CFR 218.21. An Emergency Situation Determination would eliminate the 30-day Objection period prior to a decision.

Dated: November 17, 2015.

David R. Myers,

Forest Supervisor.

BILLING CODE 3410–11–P

DEPARTMENT OF COMMERCE

International Trade Administration

[Docket No.: 151106999–5999–01]

Call for Applications for the International Buyer Program Calendar Year 2017

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice and Call for Applications.

SUMMARY: In this notice, the U.S. Department of Commerce (DOC) International Trade Administration (ITA) announces that it will begin accepting applications for the International Buyer Program (IBP) for calendar year 2017 (January 1, 2017, through December 31, 2017). The announcement also sets out the objectives, procedures and application review criteria for the IBP. The purpose of the IBP is to bring international

buyers together with U.S. firms in industries with high export potential at leading U.S. trade shows. Specifically, through the IBP, the ITA selects domestic trade shows which will receive ITA assistance in the form of global promotion in foreign markets, provision of export counseling to exhibitors, and provision of matchmaking services at the trade show. This notice covers selection for IBP participation during calendar year 2017.

DATES: Applications for the IBP must be received by Friday, January 8, 2016.

ADDRESSES: The application form can be found at www.export.gov/ibp.

Applications may be submitted by any of the following methods: (1) Mail/Hand Delivery Service: International Buyer Program, Trade Promotion Programs, International Trade Administration, U.S. Department of Commerce, Ronald Reagan Building, 1300 Pennsylvania Ave. NW., Suite 800M—Mezzanine Level—Atrium North, Washington, DC 20004; (2) Facsimile: (202) 482–7800; or (3) email: IBP2017@trade.gov. Facsimile and email applications will be accepted as interim applications, but must be followed by a signed original application that is received by the program no later than five (5) business days after the application deadline. To ensure that applications are received by the deadline, applicants are strongly urged to send applications by express delivery service (e.g., U.S. Postal Service Express Delivery, Federal Express, UPS, etc.).

FOR FURTHER INFORMATION CONTACT:

Vidya Desai, Acting Director, International Buyer Program, Trade Promotion Programs, International Trade Administration, U.S. Department of Commerce, 1300 Pennsylvania Ave. NW., Ronald Reagan Building, Suite 800M—Mezzanine Level—Atrium North, Washington, DC 20004; Telephone (202) 482–2311; Facsimile: (202) 482–7800; Email: IBP2017@trade.gov.

SUPPLEMENTARY INFORMATION: The IBP was established in the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100–418, codified at 15 U.S.C. 4724) to bring international buyers together with U.S. firms by promoting leading U.S. trade shows in industries with high export potential. The IBP emphasizes cooperation between the DOC and trade show organizers to benefit U.S. firms exhibiting at selected events and provides practical, hands-on assistance such as export counseling and market analysis to U.S. companies interested in exporting. Shows selected for the IBP will provide a venue for U.S. companies
