SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Requirements for Electrically Operated Toys.

OMB Number: 3041-0035.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of electrically operated toys and other electrically operated articles.

Estimated Number of Respondents: 40 firms that manufacture or import electrically operated toys and other

electrically operated articles have been identified; based on manufacturer and importer records for sales and distribution of inventory, there are approximately 10 models each year per firm for which testing and recordkeeping is required resulting in 400 records (40 firms x 10 models) per year.

Estimated Time per Response: Based on discussion with a trade association for the toy industry, we estimate that the tests required by the regulations can be performed on one model in 16 hours and that four hours of recordkeeping is required per model. In addition, each firm may spend 30 minutes or less per model on labeling requirements.

Total Estimated Annual Burden: 6400 hours for testing burden (16 hours x 400 records); 1600 hours for recordkeeping (4 hours x 400 records); 200 hours for labeling (40 firms x 1/2 hour x 10 models) for a total annual burden of 8200 hours per year.

General Description of Collection: The regulations in 16 CFR part 1505 establish performance and labeling requirements for electrically operated toys and children's articles to reduce unreasonable risks of injury to children from electric shock, electrical burns, and thermal burns associated with those products. Manufacturers and importers of electrically operated toys and children's articles are required to maintain records for three years on: (1) Material and production specifications; (2) the quality assurance program used; (3) results of all tests and inspections conducted; and (4) sales and distribution of electrically operated toys and children's articles.
