BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE478

Identification of Nations Engaged in Illegal, Unreported, or Unregulated Fishing, Bycatch, or Shark Fishing

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for information.

SUMMARY: NMFS is seeking information regarding nations whose vessels are engaged in illegal, unreported, or unregulated (IUU) fishing, bycatch of protected living marine resources (PLMRs), and/or fishing activities in waters beyond any national jurisdiction that target or incidentally catch sharks. Such information will be reviewed for the purposes of the identification of nations pursuant to the High Seas Driftnet Fishing Moratorium Protection Act (Moratorium Protection Act).

DATES: Information should be received on or before May 31, 2016. A public webinar will take place from 3 to 4:30 p.m. eastern daylight saving time on April 22, 2016.

ADDRESSES: Information may be submitted to either by mail to: NMFS Office of International Affairs and Seafood Inspection, Attn.: MSRA Information, F/IS 1315 East-West Highway, Silver Spring, MD 20910, or electronically to: IUU.PLMR.Sharks@noaa.gov. Information on how to participate in the April 22, 2016, public webinar will be posted online at <http://www.nmfs.noaa.gov/ia/>.

FOR FURTHER INFORMATION CONTACT: Kristin Rusello, phone 301-427-8376, or email kristin.rusello@noaa.gov.

SUPPLEMENTARY INFORMATION: The Shark Conservation Act of 2010 (Pub. L. 111-348) amended the Moratorium Protection Act by requiring that actions be taken by the United States to strengthen shark conservation. In November 2015, the Illegal, Unreported, and Unregulated Fishing Enforcement Act of 2015 (IUUFEA) (Pub. L. 114-81) further amended the Moratorium Protection Act by, among other things,

expanding the scope of information that can be used for the identification of nations to three years for the IUU fishing and bycatch provisions.

Specifically, the Moratorium Protection Act requires the Secretary of Commerce (Secretary) to identify in a biennial report to Congress those nations whose fishing vessels are engaged, or have been engaged at any point during the preceding three years, in IUU fishing. The definition of IUU fishing can be found at 50 CFR 300.201 and includes:

(1) Fishing activities that violate conservation and management measures required under an international fishery management agreement to which the United States is a party, including catch limits or quotas, capacity restrictions, bycatch reduction requirements, shark conservation measures, and data reporting;

(2) In the case of non-parties to an international fishery management agreement to which the United States is a party, fishing activities that would undermine the conservation of the resources managed under that agreement;

(3) Overfishing of fish stocks shared by the United States, for which there are no applicable international conservation or management measures or in areas with no applicable international fishery management organization or agreement, that has adverse impacts on such stocks;

(4) Fishing activity that has an adverse impact on vulnerable marine ecosystems such as seamounts, hydrothermal vents, cold water corals and other vulnerable marine ecosystems located beyond any national jurisdiction, for which there are no applicable conservation or management measures or in areas with no applicable international fishery management organization or agreement; and

(5) Fishing activities by foreign flagged vessels in U.S. waters without authorization of the United States.

In addition, the Secretary must identify in the biennial report those nations whose fishing vessels are engaged, or have been engaged at any point during the preceding three years in fishing activities in waters beyond any national jurisdiction that result in bycatch of a PLMR, or beyond the U.S. exclusive economic zone (EEZ) that result in bycatch of a PLMR shared by the United States, and that have not implemented measures to address that bycatch that are comparable in effectiveness to U.S. regulatory requirements. In this context, PLMRs are defined as non-target fish, sea turtles, sharks, or marine mammals that are protected under U.S. law or

international agreement, including the Marine Mammal Protection Act, the Endangered Species Act, the Shark Finning Prohibition Act, and the Convention on International Trade in Endangered Species of Wild Flora and Fauna. PLMRs do not include species, except sharks, managed under the Magnuson-Stevens Fishery Conservation and Management Act, the Atlantic Tunas Convention Act, or any international fishery management agreement. A list of species considered as PLMRs for this purpose is available online at: http://www.nmfs.noaa.gov/msa2007/docs/list_of_protected_lmr_act_022610.pdf.

Furthermore, the Shark Conservation Act requires that the Secretary of Commerce identify nations in a biennial report to Congress whose fishing vessels are engaged, or have been engaged during the calendar year prior to the biennial report in fishing activities or practices in waters beyond any national jurisdiction that target or incidentally catch sharks and the nation has not adopted a regulatory program to provide for the conservation of sharks, including measures to prohibit removal of any of the fins of a shark (including the tail) and discarding the carcass of the shark at sea, that is comparable to that of the United States, taking into account different conditions.

More information regarding the identification process and how the information received will be used in that process can be found in the regulations codified at 50 CFR 300.200. Note that the timeframe for activities to be considered for IUU fishing and bycatch identifications has not been changed to reflect the amendments in the IUUFEA to three years each.

The fourth biennial report to Congress was submitted in February 2015 and is available online at: http://www.nmfs.noaa.gov/ia/iuu/msra_page/2015noaareptcongress.pdf. The report identified six nations for IUU fishing.

In fulfillment of its requirements under the Moratorium Protection Act, NMFS is preparing the fifth biennial report to Congress, which will identify nations whose fishing vessels are engaged in IUU fishing or fishing practices that result in bycatch of PLMRs, shark catch in waters beyond any national jurisdiction without a regulatory program comparable to the United States. NMFS is soliciting information from the public that could assist in its identification of nations engaged in activities that meet the criteria described above for IUU fishing, PLMR bycatch, or shark catch in waters beyond any national jurisdiction. Some

types of information that may prove useful to NMFS include:

- Documentation (photographs, etc.) of IUU activity or fishing vessels engaged in PLMR bycatch or catch of sharks on the high seas;
 - Documentation (photographs, etc.) of fishing vessels engaged in shared PLMR bycatch in any waters beyond the U.S. EEZ;
 - Fishing vessel records;
 - Trade data supporting evidence that a nation's vessels are engaged in shark catch on the high seas;
 - Reports from off-loading facilities, port-side government officials, enforcement agents, military personnel, port inspectors, transshipment vessel workers and fish importers;
 - Sightings of vessels included on RFMO IUU vessel lists;
 - RFMO catch documents and statistical document programs;
 - Nation's domestic regulations for bycatch and shark conservation and management;
 - Action or inaction at the national level, resulting in non-compliance with RFMO conservation and management measures, such as exceeding quotas or catch limits, or failing to report or misreporting data of the nation's fishing activities; and
 - Reports from governments, international organizations, or nongovernmental organizations.
- NMFS will consider all available information, as appropriate, when making a determination whether or not to identify a particular nation in the biennial report to Congress. As stated previously, NMFS is limited in the data it may use as the basis of a nation's identification. This information includes IUU fishing activity and bycatch of PLMRs in 2014, 2015 and 2016, and shark fishing activity in waters beyond any national jurisdiction in 2016. Information should be as specific as possible as this will assist NMFS in its review. NMFS will consider several criteria when determining whether information is appropriate for use in making identifications, including:
- Corroboration of information;
 - Whether multiple sources have been able to provide information in support of an identification;
 - The methodology used to collect the information;
 - Specificity of the information provided;
 - Susceptibility of the information to falsification and alteration; and
 - Credibility of the individuals or organization providing the information.

Dated: March 3, 2016.

John Henderschedt,

Director, Office of International Affairs and Seafood Inspection, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE469

Endangered Species; File No. 19627

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that the NMFS Southeast Fisheries Science Center, 75 Virginia Beach Drive, Room 207, Miami, FL 33149 [Responsible Party: Dr. Bonnie Ponwith, Ph.D.], has applied in due form for a permit to take loggerhead (*Caretta caretta*), green (*Chelonia mydas*), Kemp's ridley (*Lepidochelys kempii*), hawksbill (*Eretmochelys imbricata*), leatherback (*Dermochelys coriacea*), and unidentified hardshell sea turtles for purposes of scientific research.

DATES: Written, telefaxed, or email comments must be received on or before April 7, 2016.

ADDRESSES: The application and related documents are available for review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 19627 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific

reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT:

Arturo Herrera or Amy Hapeman, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The applicant requests a five-year permit to research sea turtles that interact with commercial fisheries and other authorized activities in the Gulf of Mexico and East Coast of the United States. The purpose of the project is to: (1) Monitor the take of sea turtles by observed fisheries, (2) collect data that can enhance efforts to estimate total bycatch and the effects of bycatch on the sea turtle subpopulations, (3) and document interactions at various life stages to help in the recovery process of these species. Researchers would be authorized to handle, photograph, measure, weigh, flipper and passive integrated transponder tag, tissue sample, temporary carapace mark, and salvage specimens legally taken during commercial fishing activities. Up to 86 green, 571 loggerhead, 165 Kemp's ridley, 77 hawksbill, 253 leatherback, 20 olive ridley, and 14 unidentified sea turtles would be sampled annually.

Dated: March 2, 2016.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
