NUCLEAR REGULATORY COMMISSION

[NRC–2016–0098]

Disposition of Information Related to the Time Period That Safety-Related Structures, Systems, or Components Are Installed

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory issue summary; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is seeking public comment on a draft regulatory issue summary (RIS) to inform nuclear power reactor licensees of existing requirements related to dispositioning information pertaining to the capability of safety-related structures, systems, and components (SSCs) to perform their safety-related functions in nuclear power plants. The draft RIS addresses instances where a licensee becomes aware of credible information pertaining to the time period that a safety-related structure, system, or component is installed that may negatively impact its ability to perform its safety-related function or functions. Licensees must address this information consistent with their licensing basis and applicable NRC requirements.

DATES: Submit comments by July 18, 2016. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

II. Background

The NRC staff has developed draft RIS 2016-xx, "Disposition of Information Related to the Time Period that Safety-Related Structures, Systems, or Components are Installed," to clarify NRC requirements and programs that provide quality assurance and ensure the operability of safety-related SSCs. When a licensee either becomes aware that a safety-related SSC has been installed for longer than the amount of time described in the licensing basis, or becomes aware of credible information that challenges the presumption that a safety-related SSC can continue to perform its safety function(s), the licensee must assess the information consistent with their licensing basis and applicable NRC requirements. These instances must be addressed in accordance with a licensee's NRC-approved quality assurance program, operability/functionality determination process, and corrective action program.

The NRC issues RISs to communicate with stakeholders on a broad range of matters. This may include clarification

of existing requirements and regulations.

Proposed Action

The NRC is requesting public comment on the draft RIS. The NRC plans to hold a public meeting to discuss this draft RIS. All comments that are to receive consideration in the final RIS must still be submitted electronically or in writing as indicated in the **ADDRESSES** section of this document. Additional details regarding the meeting will be posted at least 10 days prior to the public meeting on the NRC's Public Meeting Schedule Web site at <http://www.nrc.gov/public-involve/public-meetings/index.cfm>. The NRC staff will make a final determination regarding issuance of the RIS after it considers any public comments received in response to this request.

Dated at Rockville, Maryland, this 3rd day of May 2016.

For the Nuclear Regulatory Commission.

Eric M. Thomas,

Operating Experience Branch, Division of Inspection and Regional Support, Office of Nuclear Reactor Regulation.
