SUPPLEMENTARY INFORMATION:

I. Advisory Committee Background

The GPAC and LPAC are statutorily
mandated advisory committees that
provide recommendations and advice
on PHMSA's proposed safety standards,
risk assessments, and safety policies for
gas pipelines and for hazardous liquid
pipelines. Both committees were
established in accordance with the
Federal Advisory Committee Act
(FACA) and 49 U.S.C. 60115.

No later than 90 days after receiving
a proposed standard and supporting
analyses, the appropriate committee
prepares and submits a report to the
Secretary of Transportation on the
technical feasibility, reasonableness,
cost-effectiveness, and practicability of
the proposed standard. The Secretary
must publish each report, including any
recommended actions and minority
views. The Secretary is not bound by
the committee's conclusions. However,

if the Secretary rejects them, he must
publish the reasons.

Pursuant to 49 U.S.C. 60115, the
Secretary of Transportation has the
authority to appoint to each committee

agencies, and instrumentalities of the
U.S. Government and of the states; (2)
five individuals from the natural gas or
hazardous liquid industry, selected in

the individuals selected for each
committee from the government must be

industry must be currently in the active
operation of natural gas or hazardous
liquid pipelines or pipeline facilities. At
least one individual selected for each
committee serving from the industry
must have education, background, or
experience in risk assessment and cost-
benefit analysis.

each committee from the general public
must have education, background, or
experience in environmental protection
or public safety. At least one individual
selected for each committee serving
from the general public must have
education, background, or experience in
risk assessment and cost-benefit
analysis. At least one individual
selected for each committee from the
general public may not have any
financial interest in pipeline, petroleum,
or natural gas industries. No individuals
selected for a committee serving from
the general public may have a
significant financial interest in the
pipeline, petroleum, or gas industry.
