k. *Description of Request:* The licensee requests a temporary variance of the minimum flow requirements in the Eel River below Scott Dam and the East Branch of the Russian River. The licensee explains that Lake Pillsbury only filled to 80 percent this year due to: Dry spring conditions; the April 1, 2016 closure schedule of the spillway gates for dam safety purposes; and minimum and supplemental flow releases. Therefore, in order to conserve water resources, ensure that adequate water is available for minimum flow releases and regular water deliveries later in the year, and avoid Lake Pillsbury bank sloughing and water turbidity, the licensee proposes to reduce minimum flow releases at the project. Specifically, the licensee proposes to reduce flows in the Eel River below Scott Dam from the required 60 cubic feet per second (cfs) normal year requirement to the 20 cfs critical year requirement. The licensee

would also reduce minimum flows in the East Branch Russian River from the 75 cfs normal year requirement to the 25 cfs dry year requirement, and possibly the 5 cfs critical year requirement, depending on storage conditions and in consultation with the resource agencies and stakeholders. In conjunction with the proposed variance, the licensee proposes to provide no more than 50 cfs to the Potter Valley Irrigation District (PVID) through the East Branch Russian River.

The licensee also proposes to establish a Potter Valley Drought Working Group, comprised of the resource agencies and stakeholders, which would meet twice monthly during the variance to determine appropriate release levels within the framework of the proposed variance. The licensee requests that once a flow is established, that a 24-hour average flow be used as the compliance criteria for the corresponding compliance point. Finally, the licensee proposes to file monthly compliance reports with the Commission, and to provide bi-monthly email reports to the resource agencies and stakeholders.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371.
