Agenda

The Mid-Atlantic Fishery Management Council's *Summer Flounder, Scup, and Black Sea Bass* Advisory Panel, together with the Atlantic States Marine Fisheries Commission's Advisory Panel, will meet on Monday, November 14, 2016, via Webinar (see **DATES** and **ADDRESSES**). The purpose of this meeting is to discuss potential changes to the dates of the three commercial quota periods for

the *Scup* fishery. The three quota periods are each allocated a different percentage of the annual commercial quota and different possession limits are in effect during each period. During this meeting, advisors will review a preliminary analysis of the potential impacts of modifying the quota period dates, will review recommendations from the Monitoring Committee, and will have an opportunity to provide the Council with additional input on a potential management action to modify these dates.

A detailed agenda and background documents will be made available on the Council's Web site, at www.mafmc.org, prior to the meeting.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Stock ID webinars are as follows:

1. Participants will use review genetic studies, growth patterns, existing stock definitions, prior SEDAR stock ID recommendations, and any other relevant information on Gray Snapper stock structure.

2. Participants will make recommendations on biological stock structure and define the unit stock or stocks to be addressed through this assessment.

3. Participants will provide recommendations to address Council management jurisdictions, to support management of the stock or stocks, and specification of management benchmarks and fishing levels by Council jurisdiction in a manner consistent with the productivity measures of the stock.

4. Participants will document work group discussion and recommendations through a Data Workshop working paper for SEDAR 51.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.
