A. Program Description

The Nationally Significant Freight and Highway Projects (NSFHP) program, as established by the Fixing America's Surface Transportation Act (FAST Act), Public Law 114–94, section 1105 (23 U.S.C. 117), will provide Federal financial assistance to freight and highway projects of national or regional significance. The Department will also refer to NSFHP grants as Fostering Advancements in Shipping and Transportation for the Long-term Achievement of National Efficiencies (FASTLANE) grants. The FASTLANE program provides dedicated, discretionary funding for projects that address critical freight issues facing our nation's highways and bridges, and for the first time in the U.S. Department of Transportation's 50-year history, establishes broad, multiyear eligibilities for freight infrastructure.

To better adapt to national and regional population growth, compete in the global economy, and meet the needs of consumers and industry, the United States needs a strong multimodal transportation system. *Beyond Traffic 2045: Trends and Choices (Beyond Traffic)*,¹ the Department's 30-year framework for the future, outlines changing local and global patterns, including population and employment growth in burgeoning megaregions and significant growth in freight movement by ton and value. The report affirms the need to address freight bottlenecks that severely constrain system performance and capacity. The Department's draft National Freight Strategic Plan,² released in October 2015, further
