Title of Collection: Study of An Information Strategy to Increase Enrollment in Postsecondary Education.

OMB Control Number: 1850—NEW.

Type of Review: A new information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 2,013.

Total Estimated Number of Annual Burden Hours: 594.

Abstract: This demonstration study will evaluate the use of a promising messaging strategy designed to help TRIO Educational Opportunity Center (EOC) grantees meet the program's goal of increasing college enrollment. EOCs are hosted at postsecondary institutions or nonprofit organizations and generally serve low-income individuals who are 19 years and older—most of whom are

potential first-generation college-goers. The study will evaluate whether systematic text messaging can enhance EOCs' counseling services and lead to increased Free Application for Student Aid (FAFSA) completion and postsecondary education enrollment rates. Across 20 EOCs, approximately 6,000 adults will be randomly assigned to receive EOCs' typical services or to receive EOCs' typical services plus the text messaging.

Title of Collection: Impact Evaluation of Parent Messaging Strategies on Student Attendance.

OMB Control Number: 1850—NEW.

Type of Review: A new information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Individuals or Households.

Total Estimated Number of Annual Responses: 1,890.

Total Estimated Number of Annual Burden Hours: 597.

Abstract: Most school districts have policies in place to systematically address student absenteeism, which remains a considerable problem across grade levels in many parts of the country. Typical attendance practices include parent notification by letters, phone calls, parent meetings, home visitation, and, for students with significant numbers of absences, referrals to truancy programs and family courts. Such practices can be costly.

Text messaging interventions are becoming increasingly popular—in fields such as public health and prevention—due to their low cost, scalability, and evidence of impact. School districts have increasing capacity to use technology to implement messaging interventions. Thus, an

evaluation to determine whether a text messaging intervention can improve student attendance in a cost effective manner is warranted.

To our knowledge, this project is the first multidistrict random assignment study of the impact of a text messaging intervention for parents on student attendance and achievement. In addition, consistent with the Consolidated and Further Continuing Appropriations Act, 2015 (Pub. L. 113–235), which provides the legislative authority to conduct this study, this study will focus on low-performing schools with high levels of poverty and student absenteeism.
