

Final Rule. The rule was proposed on June 6, 2013 (78 FR 34178), and promulgated on March 15, 2015 (80 FR 12264). The rule includes requirements that involve collecting information from states with areas designated nonattainment for the 2008 8-hour ozone NAAQS. These information collection milestones include but are not limited to state submissions of attainment demonstrations, RFP plans, and RACT determinations. The burden estimate in the original ICR assumed 26 state air agency respondents (state and local air agencies), including the District of Columbia, responsible for meeting attainment planning obligations for 46 designated nonattainment areas for the 2008 ozone NAAQS. The revised burden estimate in this proposed ICR renewal incorporates changes to the original estimate that affect 17 respondents with jurisdiction over 30 nonattainment areas that are in various stages of planning for attainment or maintenance of the 2008 ozone NAAQS. The time period covered by this ICR is February 1, 2018, through January 31, 2021.

Burden Statement: The estimated public reporting and recordkeeping burden for the original ICR was 120,000 labor hours for the 3-year period, for an estimated average burden of 4,615 hours per respondent (the number of respondents was assumed to be 26). The incremental public reporting and recordkeeping burden for this proposed collection of information is estimated to total 62,000 hours, for an average of 3,647 hours per affected respondent (the number of respondents is assumed to be 17) over the 3-year period covered by this ICR renewal. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; to train personnel to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and, to transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the agency's estimate, which is only briefly summarized here:

Respondents/Affected Entities: State and local governments.

Estimated total number of affected respondents: 17.

Frequency of response: Annual.

Estimated total additional annual burden hours: 20,667 hours.

Estimated total additional annual cost: \$1,404,757. This includes an estimated burden cost of \$0 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

The total estimated respondent burden during the 3-year period of this ICR renewal is 62,000 hours, compared with a total estimated respondent burden of 120,000 hours identified for the 3-year period covered by the original ICR approved by OMB.

What is the next step in the process for this ICR?

The EPA will consider the comments received on this proposal and will amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, the EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
