AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR)—NESHAP for Solvent Extraction for Vegetable Oil Production (40 CFR part 63, subpart GGGG) (Renewal), EPA ICR Number 1947.07, OMB Control Number 2060–0471—to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through April 30, 2018. Abstract: The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 63, subpart A), and any changes, or additions to the Provisions are specified at 40 CFR part 63, subpart GGGG. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility and records of solvent, HAP content, and oilseed inventory. Reports are required annually at a minimum.

Form numbers: None.

Respondents/affected entities:

Owners or operators of vegetable oil production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart GGGG).

Estimated number of respondents: 90 (total).

Frequency of response: Initially, occasionally, and annually.

Total estimated burden: 33,400 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$3,510,000 (per year). There are no annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease in the respondent labor hours and number of responses in this ICR compared to the previous ICR. This adjustment corrects the number of sources that submit a notification of compliance status. This is a one-time notification that only applies to the one reconstructed source, and is not an annual burden.

Director, Regulatory Support Division.

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR)—NSPS for Electric Utility Steam Generating Units, EPA ICR No. 1053.12, OMB Control No. 2060-0023—to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as the specific requirements at 40 CFR part 60, subpart Da. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form numbers: None.

Respondents/affected entities: Electric utility steam generating facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart Da).

Estimated number of respondents: 743 (total).

Frequency of response: Initially, quarterly and semiannually.

Total estimated burden: 177,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$31,900,000 (per year), includes \$13,300,000 for both

annualized capital operation & maintenance costs.

Changes in the estimates: There is an adjustment increase in the respondent burden, labor costs, and capital/O&M cost from the most-recently approved ICR. This increase is not due to any program changes. The change in burden and costs is due to an increase in the number of sources. This ICR assumes an industry growth rate of 11 respondents per year, which results in an increase of 33 respondents since the last ICR renewal period. The industry growth also results in an increase in O&M costs.

Director, Regulatory Support Division.
