On March 12, 2018, Commerce issued its Second Remand Results, wherein, considering the Court's order, and under respectful protest, Commerce selected Thai import data under HTS category 2804.69 to value Trina's byproduct offset for scrapped solar modules for purposes of its normal value calculations.⁹

On May 25, 2018, the Court issued its decision in *Jinko Solar III* sustaining Commerce's Second Remand Results.¹⁰

Timken Notice

In its decision in *Timken*,¹¹ as clarified by *Diamond Sawblades*,¹² the United States Court of Appeals for the Federal Circuit held that, pursuant to section 516A(e) of the Tariff Act of 1930, as amended (the Act), Commerce must publish a notice of a court decision that is not "in harmony" with a Commerce determination and must suspend liquidation of entries pending a "conclusive" court decision. The Court's May 25, 2018, final judgment sustaining Commerce's Second Remand Redetermination constitutes a final decision of the Court that is not in harmony with Commerce's *Final Determination*. This notice is published in fulfillment of the publication requirements of *Timken*. Accordingly, Commerce will continue the suspension of liquidation of the subject merchandise pending the expiration of the period of appeal, or if appealed, pending a final and conclusive court decision. We have not amended the *Final Determination* because valuing Trina's scrapped solar modules using Thai import data under HTS category 2804.69 rather than South African import data under HTS subheading 8548.10 did not result in a change to the weighted average dumping margin calculated for Trina in the *Final Determination*.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: U.S. Caribbean Commercial Fishermen Census.

OMB Control Number: 0648-0716.

Form Number(s): None.

Type of Request: Regular (revision and extension of a currently approved information collection).

Number of Respondents: 1,500.

Average Hours per Response: 30 minutes.

Burden Hours: 750.

The National Marine Fisheries Service (NMFS) proposes to conduct a census of small-scale fishermen operating in the United States (U.S.) Caribbean. The extension for the data collection applies only to the Commonwealth of Puerto Rico because the data collection was completed in the U.S. Virgin Islands. The proposed socio-economic study will collect information on demographics, capital investment in fishing gear and vessels, fishing and marketing practices, economic performance, and miscellaneous attitudinal questions. The data gathered will be used for the development of amendments to fishery management plans, which require descriptions of the human and economic environment and socio-economic analyses of regulatory proposals. The information collected will also be used to strengthen fishery management decision-making and satisfy various legal mandates under the Magnuson-Stevens Fishery Conservation and Management Act (U.S.C. 1801 *et seq.*), Executive Order 12866, Regulatory Flexibility Act, Endangered Species Act, and National Environmental Policy Act, and other pertinent statutes.

Affected Public: Business or other for-profit organizations.

Frequency: One time.
