

between the Nuclear Island and Adjacent Buildings.”

For the reasons set forth in section 3.2 of the NRC staff's Safety Evaluation, which can be found in ADAMS under Accession No. ML18120A345, the Commission finds that:

A. the exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified DCD Tier 1 information, with corresponding changes to appendix C of the Facility Combined License, as described in the licensee's request dated February 1, 2018. This exemption is related to, and necessary for the granting of License Amendment No. 127 (Unit 3) and 126 (Unit 4), which is being issued concurrently with this exemption.

3. As explained in section 5.0 of the NRC staff's Safety Evaluation (ADAMS Accession No. ML18120A345), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated February 1, 2018 (ADAMS Accession No. ML18032A359), the licensee requested that the NRC amend the COLs for VEGP, Units 3 and 4, COLs NPF-91 and NPF-92. The proposed amendment is described in section I of this **Federal Register** notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or COL, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on February 27, 2018 (83 FR 8519). No comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemptions and issued the amendments that the licensee requested on February 1, 2018.

The exemptions and amendments were issued on June 15, 2018, as part of a combined package to the licensee (ADAMS Accession No. ML18120A348).

Dated at Rockville, Maryland, this 5th day of July 2018.
