

all of the carriers involved are Class III carriers.

If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than August 8, 2018 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36208, must be filed with the Surface Transportation Board, 395 E Street SW, Washington, DC 20423-0001. In addition, one copy of each pleading must be served on Audrey L. Brodrick, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 800, Chicago, IL 60606-2832.

Board decisions and notices are available on our website at WWW.STB.GOV.

Decided: July 27, 2018.

By the Board, Amy C. Ziehm, Acting Director, Office of Proceedings.

Andrea Pope-Matheson,
Clearance Clerk.

BILLING CODE 4915-01-P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36207]

St. Paul & Pacific Railroad Company, LLC—Change in Operators Exemption—Santa Cruz and Monterey Bay Railway Company

St. Paul & Pacific Railroad Company (SPR), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to assume operations over approximately 31 miles of track (the Line) owned by the Santa Cruz County Regional Transportation Commission (RTC) extending from milepost 0.433 at Watsonville Junction to milepost 31.39 at Davenport, Cal. The verified notice indicates that the Line was formerly operated by the Santa Cruz and Monterey Bay Railway Company (SCM) before SCM's cessation of operations in June 2018. Based on projected annual revenues, SPR expects to be a Class III carrier after consummation of the proposed transaction. SPR states that it will enter into an operating agreement with RTC governing SPR's operation of, and provision of rail common carrier service on, the Line. Pursuant to a separate agreement, SCM will transfer its permanent and exclusive freight operations to SPR.

This transaction is related to a concurrently filed verified notice of exemption in *Progressive Rail Inc.—Continuance in Control Exemption—St. Paul & Pacific Railroad Company, LLC*, Docket No. FD 36208, in which Progressive Rail Incorporated, SPR's parent company, seeks to continue in control of SPR upon SPR's becoming a Class III rail carrier.

SPR states that the proposed operation of the Line does not involve any provision or agreement that would limit future interchange with a third-party connecting carrier. SPR certifies that its annual rail revenues as a result of this transaction are not expected to exceed \$5 million, and it will not result in SPR becoming a Class I or Class II rail carrier. Under 49 CFR 1150.32(b), a change in operator requires that notice be given to shippers. SPR states that it has provided notice of the proposed change in operators to the four shippers on the Line.

The earliest this transaction may be consummated is August 15, 2018, the effective date of the exemption.

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than August 8, 2018 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36207, must be filed with the Surface Transportation Board, 395 E Street SW, Washington, DC 20423-0001. In addition, one copy of each pleading must be served on Audrey L. Brodrick, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 800, Chicago, IL 60606-2832.

Board decisions and notices are available on our website at WWW.STB.GOV.

Decided: July 27, 2018.

By the Board, Amy C. Ziehm, Acting Director, Office of Proceedings.

Andrea Pope-Matheson,
Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA-2018-0008-N-5]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Notice of information collection; request for comment.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, FRA seeks approval of the Information Collection Requests (ICRs) abstracted below. Before submitting these ICRs to the Office of Management and Budget (OMB) for approval, FRA is soliciting public comment on specific aspects of the activities identified below.

DATES: Interested persons are invited to submit comments on or before October 1, 2018.

ADDRESSES: Submit written comments on the ICRs activities by mail to either: Mr. Robert Brogan, Information Collection Clearance Officer, Office of Railroad Safety, Regulatory Analysis Division, RRS-21, Federal Railroad Administration, 1200 New Jersey Avenue SE, Room W33-497, Washington, DC 20590; or Ms. Kim Toone, Information Collection Clearance Officer, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Avenue SE, Room W34-212, Washington, DC 20590. Commenters requesting FRA to acknowledge receipt of their respective comments must include a self-addressed stamped postcard stating, "Comments on OMB Control Number 2130-XXXX" (the relevant OMB control number for each ICR is listed below), and should also include the title of the ICR.

Alternatively, comments may be faxed to (202) 493-6216 or (202) 493-6497, or emailed to Mr. Brogan at Robert.Brogan@dot.gov, or Ms. Toone at Kim.Toone@dot.gov. Please refer to the assigned OMB control number in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Information Collection Clearance Officer, Office of Railroad Safety, Regulatory Analysis Division, RRS-21, Federal Railroad

Administration, 1200 New Jersey Avenue SE, Room W33-497, Washington, DC 20590 (telephone: (202) 493-6292) or Ms. Kim Toone, Information Collection Clearance Officer, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Avenue SE, Room W34-212, Washington, DC 20590 (telephone: (202) 493-6132).

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501-3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to provide 60-days' notice to the public to allow comment on information collection activities before seeking OMB approval of the activities. *See* 44 U.S.C. 3506, 3507; 5 CFR 1320.8-12. Specifically, FRA invites interested parties to comment on the following ICRs regarding: (1) Whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the

methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology. *See* 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment may reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations mandate. In summary, FRA reasons that comments received will advance three objectives: (1) Reduce reporting burdens; (2) organize information collection requirements in a "user-friendly" format to improve the use of such information; and (3) accurately assess the resources expended to retrieve and produce information requested. *See* 44 U.S.C. 3501.

The summaries below describe the ICRs that FRA will submit for OMB clearance as the PRA requires:

Title: Railroad Locomotive Safety Standards and Event Recorders.

OMB Control Number: 2130-0004.

Abstract: The Locomotive Safety Standards at 49 CFR part 229 require railroads to inspect, repair, and maintain locomotives, including their event recorders to ensure they are safe and free of defects. Crashworthy locomotive event recorders provide FRA with verifiable factual information about how trains are operated. These devices are used by FRA and State inspectors for part 229 enforcement. The information garnered from crashworthy event recorders is used by railroads to monitor railroad operations and by railroad employees (locomotive engineers, train crews, dispatchers) to improve train handling, and promote the safe and efficient operation of trains throughout the country, based on a surer knowledge of different control inputs.

Type of Request: Extension with Change of a Currently Approved Information Collection.

Affected Public: Businesses.

Form(s): FRA F 6180.49A.

Respondent Universe: 741 railroads.

Frequency of Submission: On occasion.

Title: Railroad Signal System.

OMB Control Number: 2130–0006.

Abstract: The regulations pertaining to railroad signal systems are contained in 49 CFR parts 233 (Signal System Reporting Requirements), 235 (Instructions Governing Applications for Approval of a Discontinuance or Material Modification of a Signal System), and 236 (Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Signal and Train Control Systems, Devices, and Appliances). Section 233.5 provides that each railroad must report to FRA within 24 hours after learning of an accident or incident arising from signal failure (e.g., failure of a signal appliance, device, method or system to function or indicate as required by 49 CFR part 236 that results in a more favorable aspect than intended) or other condition hazardous to the movement of a train. Section 233.7 provides that each railroad must report signal failures within 15 days in accordance with the instructions printed on Form FRA F 6180.14.

Part 235 of title 49 of the Code of Federal Regulations sets forth the specific conditions under which FRA will approve the modification or discontinuance of railroad signal systems. These regulations also describe the process that should be followed by a railroad to seek such an approval. The application process prescribed under 49 CFR part 235 enables FRA to obtain the necessary information to make logical and informed decisions concerning railroad requests to modify or discontinue signal systems. Section 235.5 requires railroads to apply for FRA approval to discontinue or

materially modify railroad signal systems. However, section 235.7 cites signal system changes that do not require FRA approval such as removal of an interlocking where a drawbridge has been permanently closed by the formal approval of another governmental agency. Section 235.8 allows railroads to seek relief from the requirements in 49 CFR part 236. Sections 235.10, 235.12, and 235.13 explain where the application must be submitted, what information must be included, what the format should be, and who is authorized to sign the application. FRA provides public notice concerning applications for relief and allows individuals and organizations to protest the granting of an application for relief. Section 235.20 describes the protest process, including essential information that must accompany the protest, the address for filing the protest, the time limit for filing the protest, and the requirement that a person requesting a public hearing explain why written statements cannot be used to explain his or her position.

49 CFR part 236 contains FRA's signal system requirements. Section 236.110 requires that the results of signal system tests required under §§ 236.102–109; §§ 236.376–236.387; § 236.576–577; and §§ 236.586–589 be recorded on pre-printed forms provided by the railroad or by electronic means, subject to FRA approval. These forms must show the name of the railroad, place and date of the test conducted, type of equipment tested, results of the test, describe any repairs, replacements, and adjustments performed on the equipment that has been tested, and the condition in which the equipment was left. This section also requires that the employee conducting the test must sign the form and that the record be retained at the

office of the supervisory official. Test results made in compliance with § 236.587, must be retained for 92 days. The results of all other tests required under §§ 236.102–109; §§ 236.376–236.387; §§ 236.576–577; § 236.586; and §§ 236.588–589, including results of periodic tests, must be retained until the next record is filed, but no less than one year. Additionally, § 236.587 requires each railroad to make a departure test of the cab signal, automatic train stop, or train control devices on locomotives before the locomotives enter equipped territory. This section further requires that whoever performs the departure test must certify in writing that the test was properly performed. The certification and test results must be posted in the locomotive cab with a copy of the certification and test results retained at the office of the supervisory official. However, if it is impractical to leave a copy of the certification and test results at the location where the test is conducted, then the test results must be transmitted to the dispatcher or another designated official who must keep a written record of the test results and the name of the person performing the test. All records prepared under this section are required to be retained for 92 days. Finally, § 236.590 requires railroads to clean and inspect the pneumatic apparatus of automatic train stop, train control, or cab signal devices on locomotives as required by § 229.29(a).

Title: Inspection Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment (Power Brakes).

OMB Control Number: 2130–0008.

Abstract: Recognizing the importance of upgrading rail technologies, Congress in 1980 passed the Rock Island Railroad Transition and Employee Assistance Act (the “Rock Island Act”), which, inter alia, provides statutory relief for the implementation of new technologies. More specifically, when certain statutory requirements preclude the development or implementation of more efficient railroad transportation equipment or other transportation innovations, the applicable section of the Rock Island Act, currently codified at 49 U.S.C. 20306, provides the

Secretary of Transportation with the authority to grant an exemption to those requirements based on evidence received and findings developed at a hearing. In accordance with that statute, FRA held a public hearing and invoked its discretionary authority under 49 U.S.C. 20306 to provide a limited exemption from § 20303 for freight trains and freight cars operating with electronically controlled pneumatic (ECP) brake systems. In doing so, FRA revised the regulations governing freight power brakes and equipment in October 2008 by adding a new subpart G. The revisions are designed to provide for and encourage the safe implementation and use of ECP brake system technologies. These revisions contain specific requirements relating to design, interoperability, training, inspection, testing, handling defective equipment, and periodic maintenance related to ECP brake systems. The final rule also

provides flexibility to facilitate the voluntary adoption of this advanced brake system technology. The collection of information is used by FRA to monitor and enforce regulatory requirements related to power brakes on freight cars, including the requirements related to ECP brake systems. The collection of information is also used by locomotive engineers and road crews to verify that the terminal air brake test has been performed in a satisfactory manner.

232.209—Class II Brake Tests—Communication of results of roll-by inspections to train operator.	741 Railroads	159,740 comments	3 seconds	133
232.213—Extended Haul Trains—Designations of such trains in writing to FRA.	83,000 Long Distance Train Movements.	250 letters of designation.	15 minutes	63
232.303—General Requirements—Repair Track Brake Test: Tagging cars needing to be moved for such tests.	1,600,000 Freight Cars	5,600 tags	5 minutes	467
—Stenciling/markings of location of last repair track brake test/single car test required by section 232.305.	1,600,000 Freight Cars	240,000 marks/stencillings.	5 minutes	20,000
232.305—Single Car Tests/Records	1,600,000 Freight Cars	240,000 tests/records ...	60 minutes	240,000
232.307—Request to Modify Single Car Air Brake Test Procedures.	AAR	1 request + 3 copies	20 hours + 5 minutes ...	20
—Statement Affirming That Request Copies Have been Served on Designated Employee Representatives.	AAR	1 statement + 4 copies ..	30 minutes + 5 minutes	1
—Comment on Modification Request	RR Industry/Public/Interested Parties	2 comments	8 hours	16
232.309—Equipment and devices performing single car air brake tests: Testing and Calibrations.	640 Shops	5,000 tests	30 minutes	2,500
232.403—Design Standards For One-way EOT Devices—Request to FRA for unique code for each rear unit.	245 Railroads	12 requests	5 minutes	1
232.407—Operations Requiring 2-Way EOTs: Communications between helper locomotive engineer with engineer on the head end of the train.	245 Railroads	50,000 radio chats	30 seconds	417
232.409—Inspection and Testing of 2-Way EOTs: Notice to engineer of successful test.	245 Railroads	447,500 notices	30 seconds	3,729

CFR section	Respondent universe	Total annual responses	Average time per response	Total annual burden hours
—Testing telemetry equipment for accuracy: Date and location of last test or calibration affixed to outside of both front & rear unit.	245 Railroads	1,350 markings	60 seconds	23
232.503—Process to Introduce New Brake System Technology—Request to FRA for special approval.	741 Railroads	1 request/letter	60 minutes	1
—Pre-Revenue Service Demonstration of New Brake Technology: Request to FRA for approval prior to using in revenue service.	741 Railroads	1 request	3 hours	3
232.505—Pre-Revenue Service Acceptance Testing Plan: Maintenance Procedure—Subsequent Years.	741 Railroads	1 procedure	160 hours	160
—Amendments	741 Railroads	1 amendment	40 hours	40
—Design Descriptions—Petitions	741 Railroads	1 petition	67 hours	67
—Results Pre-Revenue Service Acceptance Testing.	741 Railroads	1 report	13 hours	13
—Description of Brake Systems Technologies Previously Used in Revenue Service.	741 Railroads	1 description	40 hours	40
232.603—ECP Requirements: Brakes—Modification of Standards: AAR or Industry Representative request to FRA.	4 Railroads/AAR	1 request + 2 copies	8 hours + 5 minutes	8
—RR Statement Affirming Copy of Modification Request to Employee Reps.	4 Railroads	4 statements+ 24 copies	60 minutes + 5 minutes	6
—Comments on Modification Request	Public/Interested Parties.	4 comments	2 hours	8
232.607—ECP Trains Class I Brake Test & Inspection/: Notification to locomotive engineer it was successfully performed.	4 Railroads	750 tests + 750 notices	90 minutes + 45 seconds.	1,134
—Cars Added en Route—Tests/Notifications.	4 Railroads	50 tests + 50 notices	60 minutes + 45 seconds.	51
—Non-ECP Cars Added—Inspections and Tagging of Defective Equipment.	2000 Cars	25 insp. + 50 tags	5 minutes + 2.5 minutes.	4
232.609—Handling of Defective Equipment w/ ECP Brake Systems—Tagging.	25 Cars	25 tags	2.5 minutes	1
—Train in ECP Mode w/Less Than 85% of Cars w/Operative Brakes—Insp. + Tagging.	20 Cars	10 insp. + 20 tags	5 minutes + 2.5 minutes.	2
—Freight Cars w/ECP Systems Found with Defective Non-Safety Appliance—Tagging.	25 Cars	25 tags	2.5 minutes	1
—Conventional Train Operating with ECP Stand Alone Brake Systems—Tagging.	25 Cars	50 tags	2.5 minutes	2
—Procedures for Handling ECP Brake System Repairs.	1 Railroad	1 procedure	24 hours	24
—Submission to FRA of ECP Brake System Repair Locations—Lists.	1 Railroad	1 list	8 hours	8
—Notice to FRA of Change in List	1 Railroad	1 notification	60 minutes	1
232.611—Periodic Maintenance: Inspection & Repair of ECP Cars Before Release from Repair Shop or Track.	500 Freight Cars	300 inspections and records.	10 minutes	50
—Petitions for Special Approval of Pre-Revenue Service Acceptance Testing Plan.	AAR	1 petition + 2 copies	24 hours+ 5 minutes	24
—Single Car Brake Test on ECP Retrofitted Cars.	2,500 Freight Cars	50 tests/records	45 minutes	38
—Modification of Single Car Test Standard	AAR	1 procedure	40 hours	40

Total Estimated Annual Responses:
30,519,495.

Total Estimated Annual Burden:
1,045,550 hours.

Under 44 U.S.C. 3507(a) and 5 CFR 1320.5(b) and 1320.8(b)(3)(vi), FRA informs all interested parties that it may not conduct or sponsor, and a

respondent is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Authority: 44 U.S.C. 3501–3520.

Juan D. Reyes III,
Chief Counsel.
