

SUPPLEMENTARY INFORMATION:

Title: Qualitative Feedback on Agency Service Delivery.

OMB Control Number: 0579–0377.

Type of Request: Extension of approval of an information collection.

Abstract: This information collection activity provides a means for the Animal and Plant Health Inspection Service (APHIS) to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with APHIS' commitment to improving service delivery.

By qualitative feedback, we mean information that provides useful insights on perceptions and opinions, but not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences, and expectations; provide an early warning of issues with service; or focus attention on areas where communication, training, or changes in operations might improve delivery of products or services. This collection will allow for ongoing, generic collaborative and actionable communications between APHIS and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on APHIS' services will be unavailable.

APHIS will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collection is voluntary;
- The collection is low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden hours per respondent) and is low cost for both the respondents and the Federal Government;
- The collection is non-controversial and does not raise issues of concern to other Federal agencies;
- The collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;

• Personally identifiable information is collected only to the extent necessary and is not retained;

• Information gathered is intended to be used only internally for general service improvement and program management purposes and is not intended for release outside of APHIS (if released, APHIS must indicate the qualitative nature of the information);

• Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

• Information gathered will yield qualitative information (*i.e.* the collection will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study).

As a general matter, this information collection will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.25 hours per response.

Respondents: Individuals and households; businesses and organizations; State, local, or Tribal governments; and foreign federal governments.

Estimated annual number of respondents: 70,000.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 70,000.

Estimated total annual burden on respondents: 17,500 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 16th day of August 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

Title: 7 CFR part 1738, Rural Broadband Loans and Loan Guarantee Program.

OMB Control Number: 0572–0130.

Type of Request: Revision of a currently approved information collection.

Abstract: The Rural Utilities Service (RUS), is authorized by Title VI, Rural Broadband Access, of the Rural Electrification Act of 1936, as amended (RE Act), to provide loans and loan guarantees to fund the cost of construction, improvement, or acquisition of facilities and equipment for the provision of broadband service in eligible rural areas in the States and Territories of the United States. 7 CFR part 1738 prescribes the types of loans available, facilities financed, and eligible applicants, as well as minimum equity requirements to be considered for a loan. In addition, 7 CFR part 1738 outlines the process through which RUS will consider applicants under the priority consideration required in Title VI.

The term of the loan is based on the expected composite economic life based on the depreciation rates of the facilities financed. The term of the loan can be as high as 35 years. These loans are secured by a first lien on the borrower's broadband system. In the interest of protecting loan security and accomplishing the statutory objective of a sound program of rural broadband service access, Title VI of the RE Act further requires that RUS make or guarantee a loan only if there is reasonable assurance that the loan, together with all outstanding loans and obligations of the borrower, will be repaid in full within the time agreed.
