Consultation

A detailed assessment of the human remains was made by staff at Indiana University-Purdue University Fort Wayne (IPFW) in consultation with the Peoria Tribe of Indians of Oklahoma, as requested by the Federal Highway Administration (FHWA). Additional consultation was conducted by FHWA and the Indiana Department of Transportation Environmental Services, Cultural Resources Office (INDOT-CRO) with representatives of the Delaware Nation, Oklahoma; Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; Miami Tribe of Oklahoma; Ottawa Tribe of Oklahoma; Peoria Tribe of Indians of Oklahoma; and the Shawnee Tribe.

Following transfer of the human remains to the ISMHS, additional invitations to consult were sent by letter from the ISMHS to the Absentee-Shawnee Tribe of Indians of Oklahoma; Citizen Potawatomi Nation, Oklahoma; Eastern Shawnee Tribe of Oklahoma; Forest County Potawatomi Community, Wisconsin; Ho-Chunk Nation of Wisconsin; Nottawaseppi Huron Band of the Potawatomi, Michigan (previously listed as the Huron Potawatomi, Inc.); Pokagon Band of Potawatomi Indians, Michigan and Indiana; and the Winnebago Tribe of Nebraska.

History and Description of the Remains

On July 7, 2010, human remains representing, at minimum, one individual were removed from site 12T59/530 within Prophetstown State Park, in Tippecanoe County, IN, during archeological work conducted under Indiana Department of Historic Preservation and Archaeology (DHPA) plan 3513, permit 201022. This Phase 111 data recovery was prompted by a wetland and forest mitigation project associated with the SR 25 Hoosier Heartland Corridor (INDOT DES No. 0901664, formerly 9802920). The human remains were recovered from state-owned land.

Upon recovering the human remains, IPFW archeology staff contacted the Tippecanoe County Coroner, who determined that the remains were over 100 years old. Also notified was staff from Prophetstown State Park and the Indiana Department of Transportation

(INDOT), as well as Indiana State Archaeologist Dr. Rick Jones. FHWA notified the Peoria Tribe of Indians of Oklahoma by letter dated July 26, 2010, and the Miami Tribe of Oklahoma and Shawnee Tribe by letter dated November 16, 2010. In co-operation between the FHWA, INDOT, and archeologists from IPFW, the human remains were temporarily housed at IPFW while initial consultation proceeded with the tribes listed in this notice and INDOT. On December 5, 2013, the human remains were transferred from IPFW to the ISMHS.

Upon consultation with the Peoria Tribe of Indians of Oklahoma, the human remains were inventoried and an osteological analysis by staff at IPFW was conducted. Staff identified the human remains as belonging to a single individual, approximately 18–24 months of age at death. Analyses also indicated no apparent pathologies apparent or evidence of pre- or peri-mortem skeletal trauma. Given the incomplete nature of the human remains (only a portion of the upper body is present) as well as the age of the individual, sex or stature could not be determined. No known individuals were identified. The one associated funerary object is a pipe made of green stone that appears to mimic the bowls found on 18th century metal tomahawk pipes. The pipe bowl is shaped like the more common kaolin clay pipes and is similar to examples recovered from the Wea village near Ouiatenon.
