Consultation

A detailed assessment of the human remains was made by the Heard Museum professional staff in consultation with representatives of Ak-Chin Indian Community (previously listed as the Ak Chin Indian Community of the Maricopa (Ak Chin) Indian Reservation, Arizona); Gila River Indian Community of the Gila River Indian Reservation, Arizona; Hopi Tribe of Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; Tohono O'odham Nation of Arizona; Yavapai-Prescott Indian Tribe (previously listed as the Yavapai-Prescott Tribe of the Yavapai Reservation, Arizona); and Zuni Tribe of the Zuni Reservation, New Mexico.

History and Description of the Remains

In 1972, human remains representing, at minimum, one individual were removed from near Camp Verde in Yavapai County, AZ by Tim Bailey. The human remains are of a child of unknown gender. They were donated to the Heard Museum in 1973, at which time they were assigned the catalog numbers NA-SW-SG-A2-1 and NA-SW-SG-K-2. No known individuals were identified. The 19 associated funerary objects are: One bowl, one pottery sherd, one bead, three fragments of an obsidian tool, two quartzite flakes, 10 animal bones, and one corn cob.

The bowl was identified as Flagstaff Black-on-white. The vessel was re-attributed as Puebloan based on Wood's classification of this type as an Anasazi type (Wood 1987:98). The cultural affiliation of the human remains was changed to Hohokam based on the presence of cremated bone and obsidian lithics. The bowl is a Puebloan pottery type. Possibly, it was a trade item. Alternatively, it is associated with the burial of a Hohokam person outside of his/her culture area whose religious convictions were respected upon death (see Wilcox 1987:135). Based on the cremated bone and pottery type of the cremation vessel, the human remains are not likely to be Sinagua.

The Hohokam lived in central and southern Arizona from about A.D. 1 to 1450. The style of pottery known as Flagstaff Black-on-white was made by Ancestral Puebloans and dates from A.D. 1130 to 1230. In 1990, the Ak-Chin Indian Community, Gila River Indian Community, Salt River Pima-Maricopa Community, and Tohono O'odham

Nation adopted a joint statement asserting their cultural affiliation to ancestors described as "Hohokam." In 1994, the Hopi Tribe asserted its cultural affiliation to Hohokam and Hisatsinom (Puebloan). In 1995, the Pueblo of Zuni asserted its cultural affiliation to Hohokam and Puebloan. In 1995, the Yavapai-Prescott Tribe asserted its cultural affiliation to human remains found near the area of Montezuma Well (near Camp Verde).

Consultation

A detailed assessment of the human remains was made by the University of Oregon Museum of Natural and Cultural History professional staff in consultation with representatives of the Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona.

History and Description of the Remains

In 1925, human remains representing, at minimum, two individuals were removed from a location in Phoenix in Maricopa, AZ. In 1984 the human remains were donated to the museum by a private party and accessioned into the collection (museum cat. #11–571). The human remains consist of two individuals, an adult and a child. No known individuals were identified. According to the accession records, the 28 associated funerary objects were contained in a ceramic jug. The associated funerary objects include: One ceramic jug, one bone bead, two bone bead fragments, one bone effigy, two bone awls, two drilled pieces of animal bone, one piece of deer bone, 17 disc beads with cloth, and one projectile point.

Historical documents, ethnographic sources, and oral history indicate that the Pima-Maricopa people have occupied the Phoenix area since precontact times. Based on archeological context, the two individuals above were determined to be of Native American ancestry and

Pima-Maricopa. The Pima-Maricopa are represented today by the Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona.
