

**Needs and Uses:** The Commission is requesting OMB approval for a revision to an existing information collection. Currently, OMB Collection No. 3060–0392, among other things, tracks the burdens associated with utilities defending against complaints brought by incumbent local exchange carriers (ILECs) related to unreasonable rates, terms, and conditions for pole attachments. In *Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment*, WC Docket No. 17–84, WT Docket No. 17–70, Third Report and Order and Declaratory Ruling, FCC 18–111 (2018), the Commission, among other things, revised section 1.1414 of its rules to establish a presumption that an ILEC is similarly situated to an attacher that is a telecommunications carrier or a cable television system providing telecommunications services for purposes of obtaining comparable pole attachment rates, terms, or conditions. The Commission also established a presumption that an incumbent LEC may be charged no higher than the Commission-defined pole attachment rate for telecommunications carriers, as determined in accordance with section 1.1406(e)(2). To rebut these presumptions, the utility must demonstrate by clear and convincing evidence that the incumbent LEC receives benefits under its pole attachment agreement with a utility that materially advantages the incumbent LEC over other telecommunications carriers or cable television systems providing telecommunications services on the same poles. As a result, now there is an incremental paperwork burden on utilities should they elect to challenge the presumption that incumbent LECs are entitled to rates, terms, and conditions of similarly-situated telecommunications attachers. None of the other paperwork burdens as set forth in the 2018 renewal of OMB Collection No. 3060–0392 will change. The Commission will use the information collected under this revision to 47 CFR 1.1414 to hear and resolve pole access complaints brought by ILECs and to determine the merits of the complaints.

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

The SEIS for the San Ysidro LPOE Improvements Project is intended to supplement the Final Environmental Impact Statement (EIS) that was adopted for the San Ysidro LPOE Improvements Project in August, 2009 (2009 Final EIS). In September, 2009, GSA prepared a Record of the Decision (ROD) that approved the Preferred Alternative (2009 Approved Project) that was identified in the 2009 Final EIS.

In May, 2014, GSA adopted a Final SEIS that evaluated changed circumstances and proposed modifications to the 2009 Approved Project that identified a Preferred Alternative that was approved by GSA through a ROD in August 2014 (2014 Approved Supplemental Project).

In August, 2015, GSA prepared a Revision to the 2014 Final SEIS to document minor design changes and provide specific information that was not available or known at the time when the 2009 Final EIS or 2014 Final SEIS was prepared (2015 Revision). The 2009 Approved Project, 2014 Approved Supplemental Project, and 2015 Revision are collectively referred to as the “Approved Project.”

This SEIS documents and evaluates changed circumstances and proposed modifications to the Approved Project since adoption of the 2009 Final EIS and 2014 Final SEIS and preparation of the 2015 Revision. The Approved Project with proposed modifications is referred to as the “Revised Project.”

The Approved Project and Revised Project entail the reconfiguration and
