SUPPLEMENTARY INFORMATION:

Proposed Action: The proposed action is approval of the construction and operation of a wind energy facility as described in the COP submitted by Vineyard Wind on Lease Area OCS-A 0501. The COP proposes to construct, operate, maintain, and eventually decommission an up to 800 MW wind energy facility on the OCS offshore Massachusetts within the proposed Project area. Vineyard Wind's COP proposes installing up to 100 wind turbine generators, each with a capacity of between 8 and 10 MW. Foundations would be 100 monopiles or up to 10 jacket foundations and the remainder monopiles. The proposed facility would also include one or two offshore substations or electrical service platforms. The Vineyard Wind COP also proposes an export cable from the wind energy facility to shore that would occur within the range of design parameters outlined in the COP. Vineyard Wind has identified two potential export cable landfalls: One near the town of Yarmouth and one near the town of Barnstable, both in the Commonwealth of Massachusetts. Onshore construction and staging would take place at the New Bedford Marine Commerce Terminal facility. At its nearest point, the project area is approximately 12 nautical miles from the southeast corner of Martha's Vineyard and a similar distance from the southwest side of Nantucket. The turbines would be located in water depths ranging from approximately 37

to 49 meters (approximately 121 to 161 feet).

Alternatives: In preparing the Draft EIS and in consideration of scoping comments, BOEM conducted an initial evaluation of a full range of alternatives. BOEM eliminated from further consideration alternatives that were technically or economically infeasible, did not provide environmental benefits, or otherwise did not meet BOEM's purpose and need. BOEM's Draft EIS carries forward for full evaluation a reasonable range of alternatives to the proposed action. The alternatives include the proposed action, a different cable landfall location, a reduction in project size, several options for modified wind turbine layouts, and a no-action alternative to disapprove the COP. This Draft EIS analyzes each alternative in detail, including direct, indirect, and cumulative environmental effects. The Draft EIS also considers proposed mitigation measures that BOEM may select. Compliance with existing laws and regulations by Vineyard Wind and BOEM may require additional measures or modifications to the measures described in the Draft EIS.

Once BOEM completes the Final EIS and associated consultations, BOEM will decide whether to approve, approve with modification, or disapprove the Vineyard Wind COP. If BOEM approves the COP and the proposed facility is constructed, the lessee must submit a plan to decommission the facilities before the lease term ends.

Availability of the Draft EIS: The Draft EIS, Vineyard Wind COP, and associated information are available on BOEM's website at: <https://www.boem.gov/Vineyard-Wind/>. BOEM will distribute digital copies of the Draft EIS to interested parties upon request. If you require a paper copy, BOEM will provide one upon request, as long as copies are available. You may request a CD, paper copy, or the location of a library with a paper copy of the Draft EIS by calling (703) 787-1346.

Cooperating Agencies: On March 30, 2018, BOEM published in the **Federal Register** a Notice of Intent to prepare the Draft EIS. Nine agencies are participating as cooperating agencies in the preparation of the Draft EIS: The Bureau of Safety and Environmental Enforcement, the U.S. Environmental Protection Agency, the National Oceanic and Atmospheric Administration, the U.S. Army Corps of Engineers, the U.S. Coast Guard, the Massachusetts Office of Coastal Zone Management, the Rhode Island Department of Environmental Management, the Rhode Island Coastal Resource Management Council, and the Narragansett Indian Tribe.
