

Council's Subcommittee on Quantum Information Science "National Strategic Overview for Quantum Information Science" (hereafter "Strategic Overview") was released in September 2018. This document calls upon agencies to develop plans to address six key policy areas to enable continued American leadership in quantum information science. On behalf of Federal agencies the NSTC Subcommittee on Quantum Information Science seeks public input to inform the subcommittee as the Government develops potential means of addressing the specific policy recommendations included in the "Strategic Overview". Responders are asked to answer one or more of the following questions:

1. What specific actions could the US Government take that would contribute best to implementing the policy recommendations in the Strategic Overview? What challenges, not listed in section 3, should also be taken into account in implementation of the Strategic Overview recommendations?

2. What are the scientific and technological challenges that, with substantial resources and focus over the next ten years, will transform the QIS research and development landscape?

3. Regarding industrial engagement, what roles can the U.S. Government play in enabling the innovation ecosystem around QIS-related technologies? Are there critical barriers for industrial innovation in this space? How can these barriers be addressed? What role can the U.S. Government play in mitigating early or premature investment risks?

4. How can the U.S. Government engage with academia and other workforce development programs and stakeholders to appropriately train and maintain researchers in QIS while expanding the size and scope of the 'quantum-smart' workforce?

5. What existing infrastructure should be leveraged, and what new infrastructure could be considered, to foster future breakthroughs in QIS research and development?

6. What other activities/partnerships could the U.S. Government use to engage with stakeholders to ensure America's prosperity and economic growth through QIS research and development?

7. How can the United States continue to attract and retain the best domestic and international talent and expertise in QIS?

8. How can the United States ensure that US researchers in QIS have access to cutting-edge international technologies, research facilities, and knowledge?

B. Submitting Comments

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <http://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "NRC Form 748, National Source Tracking Transaction Report." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on August 1, 2018, 83 FR 37535.

1. *The title of the information collection:* NRC Form 748, National Source Tracking Transaction Report.
2. *OMB approval number:* 3150-0202.
3. *Type of submission:* Extension.
4. *The form number if applicable:* NRC Form 748.

5. *How often the collection is required or requested:* On occasion (at completion of a transaction, and at inventory reconciliation).

6. *Who will be required or asked to respond:* Licensees that manufacture, receive, transfer, disassemble, or dispose of nationally tracked sources.

7. *The estimated number of annual responses:* 18,927 (13,200 online + 480 batch upload + 5,247 NRC Form 748).

8. *The estimated number of annual respondents:* 1,400 (260 NRC Licensees + 1,140 Agreement State Licensees).

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 1,963.1 hours.

10. *Abstract:* In 2006, the NRC amended its regulations to implement a National Source Tracking System (NSTS) for certain sealed sources. The amendments require licensees to report certain transactions involving nationally tracked sources to the NSTS. These transactions include manufacture, transfer, receipt, disassembly, or disposal of the nationally tracked source. This information collection is mandatory and is used to populate the NSTS. National source tracking is part of a comprehensive radioactive source control program for radioactive materials of greatest concern. The NRC and Agreement States use the information provided by licensees in the NSTS to track the life cycle of the nationally tracked source from manufacture until disposal. NSTS enhances the ability of NRC and Agreement States to conduct inspections and investigations,

communicate information to other government agencies, and verify legitimate ownership and use of nationally tracked sources.

Dated at Rockville, Maryland, this 6th day of December 2018.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.
