POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records in this system are maintained in a secure, password-protected electronic system.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The Department will submit a retention and disposition schedule that covers the records contained in this system to the National Archives and Records Administration (NARA) for review. The records will not be destroyed until such time as NARA approves said schedule.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Security protocols for this system of records meet all required security standards. The contractor will be required to ensure that information identifying individuals is in files physically separated from other research data and electronic files identifying individuals are separated from other electronic research data files. The contractor and subcontractor will maintain security of the complete set of all master data files and documentation. Access to individually identifiable data will be strictly controlled. All information will be kept in locked file cabinets during nonworking hours, and work on hardcopy data will take place in a single room, except for data entry.

Physical security of electronic data also will be maintained. Security features that protect project data will include: Password-protected accounts that authorize users to use the contractor's and subcontractor's systems but to access only specific network directories and network software; user rights and directory and file attributes that limit those who can use particular directories and files and determine how they can use them; and additional security features that the network administrators will establish for projects as needed. The contractor's and subcontractor's employees who "maintain" (collect, maintain, use, or disseminate) data in this system must comply with the requirements of the

Privacy Act and the confidentiality standards in section 183 of the ESRA (20 U.S.C. 9573).
