USDA may disclose information contained in a record in this system of records under the routine uses listed, without the consent of the individual if the disclosure is compatible with a purpose for which the record was collected, as follows:

- To the U.S. Department of Justice (DOJ), a court or other tribunal, or another party before such tribunal, when USDA, any component thereof, or any employee in his or her individual capacity where DOJ (or USDA where it is authorized to do so) has agreed to represent the employee, or the United States where USDA determines that the litigation is likely to affect directly the operations of USDA or any of its components, is a party to the litigation or has an interest in such litigation, and USDA determines that the use of such records by DOJ, the court, or other tribunal, or the other party before such tribunal is relevant and necessary to the litigation; provided, however, that in each case, USDA determines that such disclosure is compatible with the purpose for which the records were collected. In the event that materials in this system indicate a violation of law, whether civil or criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule, or order issued pursuant thereto, the relevant records may be disclosed to the appropriate agency, whether Federal, State, local, or foreign, charged with the responsibility of investigation or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

- To a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. Disclosure may be made to the U.S. Civil Rights Commission in response to its request for information.

- To appropriate agencies, entities, and persons when (1) USDA suspects or has confirmed that there has been a breach of the system of records; (2) USDA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, USDA (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is

reasonably necessary to assist in connection with USDA's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

- To another Federal agency or Federal entity, when USDA determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

- To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for OASCR, when necessary to accomplish an agency function related to this system of records; provided however that these individuals are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to USDA officers and employees.

- To the National Archives and Records Administration (NARA) or General Services Administration (GSA), pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

Probable or potential effects on the privacy of individuals: Although there is some risk to the privacy of individuals, that risk is outweighed by the benefit of a vendor-managed system. In addition, the safeguards in place by MicroPact protect against unauthorized disclosure. Records are accessible only to individuals who are authorized. Logical, physical, and electronic safeguards are employed to ensure security. CRES has successfully attained "the authority to operate," the security assessment, and authorization process, as well as successfully attained risk assessments, to include security scanning and patching.
