II. Discussion

Critical boiling transition (CBT) occurs when a flow regime that has a higher heat transfer rate transitions to a flow regime that has a significantly lower heat transfer rate. Models that predict a CBT are a necessary part of reactor safety analysis because they are used to determine plant safety limits. Therefore, the review of CBT models has been a focus of the NRC since its inception in 1975.

Draft NUREG/KM–0013 describes NRC practice and staff experience in evaluating CBT models and organizes that practice and staff experience in the form of a credibility assessment framework that combines aspects of goal structure notation and maturity assessment. The NRC has performed many such assessments in the past and has generated this framework based on the experience of the current NRC staff and previous reviews performed by the staff as summarized in its evaluations. This document includes a survey of the important technical and regulatory literature; a detailed technical discussion of CBT models and their application; and a framework for CBT models that reflects NRC practice as a whole, including the level of evidence previously accepted to address the various issues relevant to the evaluation of CBT models. Accordingly, the NRC is requesting comments on the NUREG–0013/KM description of the NRC practice and experience in evaluating CBT models and the adequacy of the assessment framework presented.

The framework presented in NUREG–0013/KM is intended as a “textbook” reference for those interested in the assessment of the credibility of CBT models, particularly as applied to reactor safety analysis. Nonetheless, Draft NUREG–0013/KM is not guidance to the NRC staff, applicants for NRC licenses, or current NRC licensees, and, if finalized, would not constitute backfitting, as defined in title 10 of the *Code of Federal Regulations* (10 CFR) 50.109 (the Backfit Rule), or otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. In the future, the NRC staff may decide to reference NUREG–0013/KM in guidance to the NRC staff or guidance to applicants or licensees, *i.e.*, through an update to the Standard Review Plan or new Interim Staff Guidance, or update to a Regulatory Guide, respectively. Should the NRC staff decide to do so, the NRC staff will seek public comment on the use of NUREG–0013/KM as guidance and will assess any 10 CFR 50.109 backfitting and part 52 issue

finality considerations arising from such use.

Dated at Rockville, Maryland, this 20th day of March 2019.

For the Nuclear Regulatory Commission.

Division of Safety Systems, Office of Nuclear
Reactor Regulation.*

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "NRC Form 790, Classification Record." The NRC hereby informs potential respondents

that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on November 14, 2018 (83 FR 56885).

1. *The title of the information collection:* NRC Form 790, "Classification Record."

2. *OMB approval number:* 3150-0052.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* NRC Form 790.

5. *How often the collection is required or requested:* On occasion. NRC Form 790 is required each time an authorized classifier makes a classification determination to classify, declassify, or downgrade a document.

6. *Who will be required or asked to respond:* NRC licensees, licensees' contractors, and certificate holders who classify and declassify NRC information.

7. *The estimated number of annual responses:* 500.

8. *The estimated number of annual respondents:* 2.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 54 hours.

10. *Abstract:* Completion of the NRC Form 790 is a mandatory requirement for NRC licensees, licensees' contractors, and certificate holders who classify and declassify NRC information in accordance with Executive Order 13526, "Classified National Security Information," the Atomic Energy Act, and implementing directives. The NRC uses the information on the form to report statistics related to its security classification program on an annual basis to the Information Security Oversight Office.
