In addition to the selection criteria score, the EPA is required by 33 U.S.C. 3902(a) to "ensure a diversity of project types and geographical locations."

Following analysis by the WIFIA program staff, a final score is calculated for each project. Projects will be selected in order of score, subject to the requirement to ensure a diversity of project types and geographical locations. To ensure diversity, the EPA will establish a ceiling for each project type and geographical location. The EPA will select projects in rank order up until the point that the ceiling is reached. Thereafter, the next highest

project that adds diversity will be selected.

The scoring scales and guidance used to evaluate each project against the selection criteria are available in the WIFIA program handbook. Prospective borrowers considering WIFIA should review the WIFIA program handbook and discuss how the project addresses each of the selection criteria in the LOI submission.
