Supplementary Information

Title of Collection: Generic Clearance of the National Center for Science and Engineering Statistics Improvement Projects.

OMB Control Number: 3145–0174.

Type of Request: Intent to seek approval to extend, with revisions, an information collection for three years.

Abstract: Established within the National Science Foundation by the America COMPETES Reauthorization Act of 2010 § 505, codified in the National Science Foundation Act of 1950, as amended, the National Center for Science and Engineering Statistics (NCSES)—one of 13 principal federal statistical agencies—serves as a central Federal clearinghouse for the collection, interpretation, analysis, and dissemination of objective data on science, engineering, technology, research and development for use by practitioners, researchers, policymakers, and the public. NCSES conducts about a dozen nationally-representative surveys to obtain the data for these purposes. The Generic Clearance will be used to ensure that the highest quality data are obtained from these surveys. State of the art methodology will be used to develop, evaluate, and test questionnaires and survey concepts as well as to improve survey and statistical methodology. This may include field or pilot tests of questions for future large scale surveys, as needed. The Generic Clearance will also be used to test and evaluate data dissemination tools and methods, in an effort to improve access for data users.

Use of the Information: The purpose of these studies is to use the latest and most appropriate methodology to improve NCSES surveys, evaluate new data collection efforts, and evaluate data dissemination tools and mechanisms. Methodological findings may be presented externally. Improved NCSES surveys, data collections, and data dissemination will help policymakers in decisions on research and development funding, graduate education, and the scientific and engineering workforce, as well as contributing to reduced survey costs.

Expected Respondents: The respondents will be from industry, academia, nonprofit organizations,

members of the public, and State, local, and Federal governments. Respondents will be either individuals or institutions, depending on the topic under investigation. NCSES expects to use both qualitative and quantitative procedures, in various modes (e.g., in-

person, telephone, web). Up to 7,595 respondents will be contacted across all projects. No respondent will be contacted more than twice in one year under this generic clearance. Every effort will be made to use technology to

limit the burden on respondents from small entities.

Estimate of Burden: NCSES estimates that a total reporting and recordkeeping burden of 15,610 hours will result from activities to improve its surveys. The calculation is shown in Table 1.

TABLE 1—POTENTIAL SURVEYS FOR IMPROVEMENT PROJECTS, WITH THE NUMBER OF RESPONDENTS AND BURDEN HOURS

	Number of respondents	Number of hours

Comments: On March 12, 2019 we published in the **Federal Register** (84 FR 10842) a 60-day notice of our intent to request reinstatement of this information collection authority from OMB. In that notice, we solicited public comments for 60 days ending May 13, 2019. One comment was received, which came from Paul Clark via the web on April 19, 2019. Mr. Clark's comment consisted of a paper concerning access to engineering education and accreditation, especially for minorities and working-class adults. We respond to Mr. Clark's comment below.

Response: NSF believes that the comment does not pertain to the collection of information under the generic clearance, which is focused on survey improvement activities. Therefore, NSF is proceeding with the clearance request.

Dated: May 7, 2019.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.
