I. Introduction

Pursuant to § 3050.11, the Commission initiates a rulemaking proceeding to consider changes to analytical principles related to periodic reports. In particular, the Commission intends to establish the methodology for which delivery costs estimate should be used to calculate the passthroughs for Periodicals Outside County Carrier Route Basic Flats (Carrier Route Basic).

II. Proposal

Background. On April 22, 2019, MPA—The Association of Magazine Media (MPA) filed a motion requesting that the Commission amend specific portions of the FY 2018 Annual Compliance Determination Report (ACD).¹ In particular, MPA stated that the passthrough for Carrier Route Basic was incorrectly calculated, which resulted in errors on pages 19 and 20 of the FY2018 ACD. *Id.* MPA presented calculations that use alternative unit delivery costs, which result in a higher cost avoidance for Carrier Route Basic and a lower passthrough. *Id.* at 3. In its response, the Postal Service stated that it did not disagree with MPA's methodology.² The Postal Service explained that the delivery costs between Carrier Route Basic and Machinable Non-Auto Flats should translate into a non-zero delivery cost avoidance for Carrier Route Basic. *Id.*

Although there was no disagreement between MPA and the Postal Service on the methodology, the Commission

found that the Postal Service had previously used a different methodology in prior fiscal years.³ The Commission also found there was no rulemaking to establish the unit cost avoidance calculation, and the Postal Service had not explicitly stated why the unit cost estimate it used was the appropriate methodology. Since the calculations using either methodology would not materially change the Commission's findings in the FY 2018 ACD, the Commission denied MPA's motion for correction. Order No. 5094 at 5. However, the Commission stated that it would initiate a rulemaking to establish the appropriate methodology for use in future dockets. *Id.* at 4-5.

Proposal. The passthrough calculations for Carrier Route Basic are based on cost avoidances for mail processing and delivery. The Postal Service uses USPS Marketing Mail proxies for Periodicals delivery costs. Library Reference USPS-FY18-19 contains the FY 2018 unit delivery cost workbooks, including a workbook with delivery costs for flat-shaped mail disaggregated for whether the pieces are delivered in Flats Sequencing System (FSS) zones.⁴ The

"FSSDeliveryModel18," Table 2, contains three estimates for both USPS Marketing Mail Flats and Carrier Route Flats costs, which are: (1) Delivery costs for pieces destinating in FSS zones, (2) delivery costs for pieces destinating in non-FSS zones, and (3) delivery costs for all pieces.

The Postal Service and the Commission have historically used delivery costs for pieces destinating in non-FSS zones to calculate the cost avoidance and passthrough for Carrier Route Basic. MPA used the delivery costs for all pieces for the unit cost estimate. MPA Motion at 3. The Postal Services did not disagree with this approach. Postal Service Response at 2.

To improve the accuracy of the avoidable cost estimates, the Commission proposes to use the delivery costs for all pieces as the unit cost estimate used to calculate the cost avoidance and passthrough for Carrier Route Basic.

Rationale and impact. In the FY 2015 ACR and FY 2015 ACD, when the proxies were first introduced, it was more appropriate to use the pieces destinating in non-FSS zones as proxies because separate prices for FSS Flats were also offered. Only pieces

destinating to non-FSS zones would be prepared and processed as Carrier Route or 5-Digit. FSS Flats passthroughs were calculated using pieces destinating in FSS zones.⁵ In Docket No. R2017–1, the Postal Service removed FSS Flats.⁶ Since separate FSS Flats prices are no longer available, Carrier Route and 5-Digit pieces are being prepared and processed for all zones. With this pricing and operational change, it would be more accurate to use USPS Marketing Mail Flats and Carrier Route Flats for all pieces as the proxies for calculating Periodicals passthroughs.⁷ MPA and the Postal Service both supported this methodology in Docket No. ACR2018.

III. Notice and Comment

The Commission initiates Docket No. RM2019–4 to establish the methodology for which delivery costs estimate should be used to calculate the passthroughs for Periodicals Outside County Carrier Route Basic Flats. Interested persons may submit comments on the Proposal no later than June 14, 2019. Pursuant to 39 U.S.C. 505, Samuel M. Poole is designated as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. RM2019–4 to establish the methodology for which delivery costs estimate should be used to calculate the passthroughs for Periodicals Outside County Carrier Route Basic Flats.

2. Comments by interested persons in this proceeding are due no later than June 14, 2019.

3. Pursuant to 39 U.S.C. 505, the Commission appoints Samuel M. Poole to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

4. The Secretary shall arrange for publication of this Order in the **Federal Register**.

By the Commission.

Stacy L. Ruble,

Secretary.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R02–OAR–2019–0157, FRL–9993–68–Region 2]

Approval of Air Quality Implementation Plans; New York; Cross-State Air Pollution Rule; NO_x Ozone Season Group 2, NO_x Annual and SO₂ Group 1 Trading Programs

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the New York State Implementation Plan (SIP) addressing requirements of the Cross-State Air Pollution Rule (CSAPR). Under the CSAPR, large electricity generating units in New York are subject to Federal Implementation Plans (FIPs) requiring the units to participate in CSAPR federal trading programs for ozone season emissions of nitrogen oxides (NO_x), annual emissions of NO_x, and annual emissions of sulfur dioxide (SO₂). This action proposes to approve into New York’s SIP the State’s regulations that replace the default allowance allocation provisions of the CSAPR federal trading programs for ozone season NO_x, annual NO_x, and annual SO₂ emissions.

DATES: Comments must be received on or before June 20, 2019.

ADDRESSES: Submit your comments, identified by Docket ID number EPA–R02–OAR–2019–0157, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit

FOR FURTHER INFORMATION CONTACT: Kenneth Fradkin, Air Programs Branch, Environmental Protection Agency, 290 Broadway, 25th Floor, New York, New York 10007–1866, (212) 637–3702, or by email at fradkin.kenneth@epa.gov.

SUPPLEMENTARY INFORMATION: The EPA proposes to approve New York’s November 30, 2018 SIP submittal concerning CSAPR¹ trading programs for ozone-season emissions of NO_x, annual emissions of NO_x, and annual emissions of SO₂. The EPA also proposes to approve New York’s revised list of definitions that was submitted to the EPA on July 23, 2015. We have published a direct final rule approving the State’s SIP revision(s) in the Rules and Regulations section of this **Federal Register**, because we view this as a noncontroversial action and anticipate no relevant adverse comment. We have explained our reasons for this action in the preamble to the direct final rule. If we receive no adverse comment, we will not take further action on this proposed rule. If we receive adverse comment, we will withdraw the direct final rule and it will not take effect. We would address all public comments in any subsequent final rule based on this proposed rule. We do not intend to institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information, please see the information provided in the **ADDRESSES** section of this document.

Large Electric Generating Units (EGUs) in New York are subject to CSAPR FIPs that require the units to participate in the federal CSAPR NO_x Ozone Season Group 2 Trading Program, the federal CSAPR NO_x Annual Trading Program, and the federal CSAPR SO₂ Group 1 Trading Program. CSAPR provides a process for the submission and approval of SIP revisions to replace certain provisions of the CSAPR FIPs while the remaining FIP provisions continue to apply. This type of CSAPR SIP is termed an abbreviated SIP.

The New York State Department of Environmental Conservation (DEC) amended portions of Title 6 of the New York Codes, Rules and Regulations (6 NYCRR) in order to incorporate CSAPR requirements into the State’s rules and allow the DEC to allocate CSAPR allowances to regulated entities in New
