

“CSC × 24 hrs” to represent Skp2 protein expression in CTCL Patients
 ➤ Six band images from Figure 5B in a paper published in *Biochemistry*¹ to represent Actin protein expression in eight (8) CTCL Patients, one (1) T-ALL Patient, and two (2) normal subjects in Figure 1 of *JCI* 2011 and Figure 3 (bottom panel) in R01 CA122737–01A2

- In Figure 8B (bottom part) in *JCI* 2011, also included as Figure 9 in R01 CA122737–01A2 and Slide 29 in the CREST Presentation, respondent falsely reused β-actin, Laminin B, alpha-tubulin, GFP-Pro-IL–16 and HSC70 band images of “Knockdown of HSC70 in Jurkat cells and Hut78 cells” as from Normal Human Patient and Normal Subject T-cells.

- In Figure 14A in R01 CA122737–01A2, respondent falsely reused GFP-Pro-IL–16 band images of “Knockdown of HSC70 in Jurkat cells” as AKT and phospho-AKT expression and the nuclear Pro-IL–16 band images from Figure 5B in *Biochemistry* 2002 as FOXO1 protein expression in human T-cells stimulated with IL–16.

- In Figure 14B in R01 CA122737–01A1 and R01 CA122737–01A2, respondent falsely reused band images from Figure 5B in *Biochemistry* 2002 that represents Anti-pro IL6 and Anti-Tubulin to represent FOXO1 protein expression in human T-cells.

- In Figure 9 in *JCI* 2011, respondent falsely reused band images representing CD26–T cells of CTCL Patient to also represent normal human subject control for CD26+ and control for CD26–T cells in the same figure.

- In Figure 5 in R01 CA122737–01A1, also included as Figure 4 in R01 CA122737–01A2, respondent reused and falsely relabeled band images within the same figure to represent different experimental conditions.

Respondent intentionally, knowingly, and recklessly falsified and/or fabricated Western blot data for siRNA knockdown of Heat shock cognate 71 kDa protein (HSC70) in Jurkat cells purportedly with two different siRNA constructs, by reusing and relabeling ten (10) band images from experiments on Hut78 cells and a failed experiment in Jurkat cells, and included them in four (4) figures in one manuscript, one published paper, one grant application, and one presentation.

Specifically, respondent reused band images of an unpublished Western blot figure, by:

- Reusing results of a single HSC70 siRNA knockdown on Hut78 cells and relabeling them to represent data from Jurkat cells in Figure 6 in the first submission of the *JCI* manuscript, Figure 6 in *JCI* 2011, and Figure 10 in R01 CA122737–01A2 (also included as Slide 27 in the CREST Presentation)
- reusing results for a second siRNA construct that failed to knockdown HSC70 in Jurkat cells and relabeling them as from control samples in Figure 6 in *JCI* 2011

Dr. Cruikshank entered into a Voluntary Exclusion Agreement (Agreement) and voluntarily agreed for a period of five (5) years, beginning on May 13, 2019:

- (1) To exclude himself from any contracting or subcontracting with any agency of the United States Government and from eligibility for or involvement in nonprocurement programs of the United States Government referred to as “covered transactions” pursuant to HHS’ Implementation (2 CFR part 376) of OMB Guidelines to Agencies on Governmentwide Debarment and Suspension, 2 CFR part 180 (collectively the “Debarment Regulations”); and
- (2) to exclude himself from serving in any advisory capacity to PHS including, but not limited to, service on any PHS advisory committee, board, and/or peer review committee, or as a consultant.

Description of the Need for the Information and Proposed Use

This collection of information is required specifically for the application and administration of the Department of Housing and Urban Development, Federal Housing Administration Section 242 Hospital Mortgage Insurance Program pursuant to 24 CFR 242, 241, 223(f), and 223(a)(7). The collection is a comprehensive set of HUD documents that are critically needed for processing applications and loan endorsements for FHA mortgage insurance under the Section 242 Hospital Mortgage Insurance Program, for ongoing asset management of such facilities, and other information related to these facilities for loan modifications, construction projects, and physical and environmental reviews. This information is requested and is used by the Office of Healthcare Facilities (OHF) and Office of Architecture and Engineering (OAE) within FHA's Office of Healthcare Programs (OHP).

The purpose for which the information is being collected by HUD is to review Section 242 applications to determine the eligibility of applicant hospitals for FHA mortgage insurance, underwrite insured hospital loans, ensure that the collateral securing each loan is adequate, capture administrative data, process initial/final endorsement, and manage FHA's hospital portfolio. Additional information related to loan modifications, construction projects, and physical and environmental reviews is collected if applicable.

The information being collected consists of various HUD forms that program participants complete with project specifications, technical descriptions, details, and/or signatures that are utilized by HUD during various stages of the application, underwriting, commitment, closing, and asset management processes involved with the administration of FHA's Section 242 mortgage insurance program.

The information is used by HUD staff for internal review of applications to determine if projects qualify for Section 242 hospital mortgage insurance and to manage and monitor the application,
