

IV. Request for Public Comments on Changes

HUD continually strives to calculate FMRs that can serve as an effective program parameter while meeting the statutory requirement to use “the most recent available data.”

These methodology changes are not monodirectional; for example, the use of local forecast trend factors will cause FMRs to be higher in some areas and lower in others compared to using a national forecast trend factor. HUD is particularly interested in receiving comments on its intended approach for evaluating the accuracy of local trend factors using the RMSE and is interested in potential alternative methods for assessing the best local forecast model to select.

Hypothetical FY 2019 FMRs and Small Area FMRs, using these new methodology changes, are published at https://www.huduser.gov/portal/datasets/fmr.html#2020_documents.

V. Environmental Impact

This notice proposes changes in the way FMRs are calculated and does not constitute a development decision affecting the physical condition of specific project areas or building sites. Accordingly, under 24 CFR 50.19(c)(6), this notice is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Dated: May 29, 2019.

Todd M. Richardson,

General Deputy Assistant Secretary for Policy Development and Research.
