Title: FAA Acquisition Management System (FAAAMS).

Form Numbers: Please see https://fast.faa.gov/Procurement_Forms.cfm for all forms.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on April 8, 2019 (84 FR 13987). No comments were received in response to this Notice. The FAAAMS establishes policies and internal procedures for FAA acquisition. Section 348 of Public Law 104-50 directed FAA to establish an acquisition system. The information collection is carried out as an integral part of FAA's acquisition process. Various portions of the AMS describe information needed from vendors seeking or already doing business with FAA. Our contracting offices collect the information to plan, solicit, award, administer and close individual contracts. Our small business office collects information to promote and increase small business participation in FAA contracts. AMS requires information collection through forms in the following areas (specific information collected varies by the nature of each form):

IC-1 Market Surveys/Requests for Information—In the initial stage of a

procurement, these activities are used to identify products and services available to meet FAA needs, as well as to obtain vendor comments on draft requirements identified to satisfy an FAA need. The information obtained is important in determining the acquisition strategy in such areas as the evaluation criteria for competitive proposals or whether to set the procurement aside for a particular size of business.

Total Number of Form Responses per Year—8,572.

Average Burden Houses per Response—7.94.

Annual Burden Hours—68,044.

Business Declaration—collect information on business size of prospective vendors.

SF-330 Architect-Engineer Qualifications—collect information from prospective architect-engineer firms on their qualifications.

IC-2 Solicitations—In the next stage of a procurement, these activities are used to evaluate proposals with vendor-specific technical solutions, capabilities, and other qualifications such as subcontracting plans that may result in the award of a contract for a defined FAA need. The extent and nature of the information required from vendors varies depending on the nature of the goods and/or services procured, as well as the size and complexity of the FAA requirements.

Total Number of Form Responses per Year—28,798.

Average Burden Houses per Response—20.93.

SF-18/33/1447—Request for Quotations/Solicitation, Offer, and Award/Solicitation/Contract—request contractor quotes/proposals.

SF-1442 Solicitation, Offer, and Award—vendor responses to

construction, alteration, or repair solicitations.

IC-3 Post-Award Contract

Administration—Depending on the complexity and size of the contract, various activities are ongoing after contract award in areas such as bonds (e.g., for construction contracts), small business subcontracting (e.g., applying to large businesses), the tracking and management of Government Property, and invoicing.
