Rural Utilities Service

Title: Seismic Safety of New Building Construction, 7 CFR 1792, Subpart C.

OMB Control Number: 0572-0099.

Summary of Collection: Seismic hazards present a serious threat to people and their surroundings. These hazards exist in most of the United States, not just on the West Coast. Unlike hurricanes, times and location of earthquakes cannot be predicted; most earthquakes strike without warning and, if of substantial strength, strike with great destructive forces. To reduce risks to life and property from earthquakes, Congress enacted the Earthquake Hazards Reduction Act of 1977 (Pub. L. 95-124, 42 U.S.C. 7701 *et seq.*) and directed the establishment and maintenance of an effective earthquake reduction program. As a result, the National Earthquake Hazards Reduction Program (NEHRP) was established. The objectives of the NEHRP include the development of technologically and economically feasible design and construction methods to make both new and existing structures earthquake resistant, and the development and promotion of model building codes. 7 CFR part 1792, subpart C, identifies acceptable seismic standards which must be employed in new building construction funded by loans, grants, or guarantees made by the Rural Utility Service (RUS) or the Rural Telephone Bank (RTB) or through lien accommodations or subordinations approved by RUS or RTB.

Need and Use of the Information: Borrowers and grant recipients must provide to RUS a written acknowledgment from a registered architect or engineer responsible for the designs of each applicable building stating that the seismic provisions to 7 CFR part 1792, subpart C will be used in the design of the building. RUS will use this information to: (1) Clarify and inform the applicable borrowers and grant recipients about seismic safety requirements; (2) improve the effectiveness of all RUS programs; and (3) reduce the risk to life and property through the use of approved building codes aimed at providing seismic safety.
