## SUPPLEMENTARY INFORMATION:

### Background

GSA intends to prepare an EA to analyze the potential impacts resulting from proposed renovations associated with the Appraisers Building and U.S. Customs House Renovations Project.

The Project is located at 630 Sansome Street (Appraisers Building) and 555 Battery Street (U.S. Customs House), San Francisco, California. The Project is proposed in order to bring these buildings up to current building code, safety standards and serviceable condition and to prolong their useful life.

The Appraisers Building is a Class-B office building on a .86-acre site in the central business district of San Francisco. The original structure was constructed in 1944, and is nineteen stories above-ground, which includes the penthouse, loft, two levels of mechanical space, and three tiered-roof levels. This building is adjacent to the U.S. Customs House.

The U.S. Customs House is on a .86-acre site located on the northern edge of the city's financial district, occupying one-half of the block bounded by Sansome, Jackson, Battery and Washington Streets. The Class B structure was constructed in 1911 and is composed of two interconnected structures.

### Alternatives Under Consideration

The EA will consider one Action Alternative (the Proposed Action) and the No Action Alternative. The Action Alternative would consist of modernization work to repair, modify or replace certain building improvements and systems. The buildings would not be expanded in size and there would be no change in personnel staffing levels at each building. Construction is likely to impact parking access and traffic flow during construction.

Under the No Action Alternative, modernization enhancements to the existing buildings would not occur.

### Scoping Process

Scoping will be accomplished through public notifications in the *San Francisco Chronicle*, social media announcements, and direct mail correspondence to appropriate federal, state, and local agencies; surrounding property owners; and private organizations and citizens who have

previously expressed or are known to have an interest in the Project.

The primary purpose of the scoping process is for the public to assist GSA in determining the scope and content of the environmental analysis.

**B. Needs and Uses**

FAR subpart 9.2 and the associated clause at FAR 52.209-1, implement the statutory requirements of 10 U.S.C. 2319 and 41 U.S.C. 3311, which allow an agency to establish a qualification requirement for testing or other quality assurance demonstration that must be completed by an offeror before award of a contract. Under the qualification requirements, an end item, or a component thereof, may be required to be prequalified.

The clause at FAR 52.209-1, Qualification Requirements, requires offerors who have met the qualification requirements to identify the offeror's name, the manufacturer's name, source's name, the item name, service identification, and test number (to the extent known). This eliminates the need for an offeror to provide new information when the offeror, manufacturer, source, product or service covered by qualification requirement has already met the standards specified by an agency in a solicitation.

The contracting officer uses the information to determine eligibility for award when the clause at 52.209-1 is included in the solicitation. Alternatively, items not yet listed may be considered for award upon the submission of evidence of qualification with the offer.

**SUPPLEMENTARY INFORMATION:**

**Background**

The Project is proposed in order to improve structural safety for the public traveling underneath the building and for the tenants occupying the building above the Front Street underpass, located at 880 Front Street in San Diego, California. The portion of Front Street that extends below the building is referred to as the Front Street underpass. The existing building has five stories of federal office building space spanning above the roadway and two levels of parking structure beneath the roadway.

The Final EA addresses the Proposed Action Alternative and the No Action Alternative. The Action Alternative consists of structural enhancement improvements to the portion of the existing Edward J. Schwartz Federal Building over Front Street between E and F streets. Existing columns and beams supporting the building at the Front Street underpass would be reinforced with new steel beams and column support structures and pre-cast concrete paneling. Construction would require full and partial closure of Front Street between Broadway and F Street. Street closure options during construction of the Action Alternative are being considered and a comprehensive Traffic Control Plan will be prepared in coordination with the City of San Diego to address the street closure.

The No Action Alternative assumes that structural enhancements to the existing building would not occur. The Draft EA was made publicly available on November 16, 2018 for a 30-day period. The public review period closed on December 17, 2018. The Notice of Availability for the Draft EA was published in the **Federal Register** at 83
