

area, and any potential exposures were controlled through the deed restriction. No future five-year reviews are needed because the MCL cleanup goals have been attained throughout the Site, all monitoring wells have been closed, and the deed restriction is being terminated.

Community Involvement

EPA held community meetings before and during the Site cleanup, most recently in 2009. EPA released a fact sheet shortly before publication of this Notice informing the community of the proposal to delete the surface soil portion of the Site from the NPL and how to submit comments.

Determination That the Site Meets the Criteria for Deletion in the NCP

EPA has followed all procedures required by 40 CFR 300.425(e), Deletion from the NPL. EPA consulted with the State of California prior to developing this Notice. EPA determined that the responsible party has implemented all appropriate response actions required and that no further response action for the Site is appropriate. EPA is publishing a notice in a local newspaper, The Santa Clara Weekly, of its intent to delete the Site and how to submit comments. EPA placed copies of documents supporting the proposed deletion in the Site information repositories; these documents are available for public inspection and copying.

The implemented groundwater remedy achieved the degree of cleanup and protection specified in the ROD for the Site. The selected remedial action objectives and associated cleanup levels for the groundwater are consistent with agency policy and guidance. Based on information currently available to EPA, no further Superfund response is needed to protect human health and the environment.

Significant New Use Rules on Certain Chemical Substances (19–1.F)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing significant new use rules (SNURs) under the Toxic Substances Control Act (TSCA) for 31 chemical substances, 30 of which were the subject of premanufacture notices (PMNs) and 1 (a microorganism) that was the subject of a Microbial Commercial Activity Notice (MCAN). 17 of these chemical substances are subject to Orders issued by EPA pursuant to the TSCA. This action would require persons who intend to manufacture (defined by statute to include import) or process any of these 31 chemical substances for an activity that is proposed as a significant new use to notify EPA at least 90 days before commencing that activity. The required notification initiates EPA’s evaluation of the use, under the conditions of use for that chemical substance, within the

applicable review period. Persons may not commence manufacture or processing for the significant new use until EPA has conducted a review of the notice, made an appropriate determination on the notice, and has taken such actions as are required by that determination.
