Abstract: The Clean Air Act (CAA) contains several provisions directing the EPA to require source owners to conduct monitoring to support certification as to their status of compliance with applicable requirements. These provisions are set forth in section 504 and section 114 of the CAA. Under CAA section 504(c), each operating permit must "set forth inspection, entry, monitoring, compliance, certification and reporting requirements to assure compliance with the permit terms and conditions." See also CAA section 504(c) (each permit shall require reporting of monitoring the EPA and such other conditions as are necessary to assure compliance). CAA section 504(b) allows to prescribe by rule, methods and procedures for determining compliance, recognizing that continuous emissions monitoring systems need not be required if other procedures or methods provide sufficiently reliable and timely information for determining compliance. Section 114(a)(1) of the

CAA provides additional authority concerning monitoring, reporting, and recordkeeping requirements. This section provides the Administrator with the authority to require any owner/operator of a source to install and to operate monitoring systems and to record the resulting monitoring data. The EPA promulgated the Compliance Assurance Monitoring (CAM) Rule, 40 CFR part 64, on October 22, 1997 (62 FR 54900), pursuant to these provisions. In accordance with CAA section 114(c) and CAA section 503(e), the monitoring information source owners must submit must also be available to the public except under circumstances set forth in section 114(c) of the CAA. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations are listed in 40 CFR part 9.

Form numbers: None.

Respondents/affected entities: Entities potentially affected by this section are all facilities required to have an operating permit under title V of the CAA. See section 502(a) of the CAA, which defines the sources to obtain a title V permit. See also 40 CFR 70.2 and 71.2.

Respondent's obligation to respond: Mandatory under title V of the CAA. See section 502(a) of the CAA, which defines the sources required to obtain a title V permit. See also 40 CFR 70.2 and 71.2.

Estimated number of respondents: There are 21,448 pollutant specific emission units (PSEUs), where the number of respondents is the number of PSEUs subject to the compliance assurance monitoring rule, and 117 permitting authorities. Therefore, the estimated number of respondents is 21,565 (total).

Frequency of response: At least every 6 months per title V, 40 CFR 70.6(a)(3)(iii)(A) and (B).

Total estimated burden: 24,590 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$999,211 (per year), includes \$0 annualized capital or operation and maintenance costs.

Changes in estimates: There is a decrease of 26,490 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to an updated estimate of the number of sources and permits subject to the 40 CFR part 70 programs (a reduction of 1,768 permits), an increase in the number of permitting authorities (an addition of one), and a decrease in the

number of CAM plan renewal review hours (a decrease of 5.5 hours per occurrence), rather than any new federal mandates (i.e., changes in paperwork requirements to respondents). The decrease in total estimated burden hours leads to a decrease in total estimated cost.

Dated: August 21, 2019.

Penny Lassiter,

Director, Sector Policies and Program Division.
