

students' reading, mathematics, and science literacy. PISA was first administered in 2000 and is conducted every three years. The United States has participated in all of the previous cycles and is participating in 2021 in order to track trends and to compare the performance of U.S. students with that of students in other education systems. PISA 2021 is sponsored by the Organization for Economic Cooperation and Development (OECD). In the United States, PISA is conducted by the National Center for Education Statistics (NCES), within the U.S. Department of Education. In each administration of PISA, one of the subject areas (reading, mathematics, or science literacy) is the major domain and has the broadest content coverage, while the other two subjects are the minor domains. PISA emphasizes functional skills that students have acquired as they near the end of mandatory schooling (aged 15 years), and students' knowledge and skills gained both in and out of school environments. PISA 2021 will focus on mathematics literacy as the major domain. Reading and science literacy will also be assessed as minor domains, with additional assessment of financial literacy. In addition to the cognitive assessments described above, PISA 2021 will include questionnaires administered to school principals and assessed students. To prepare for the main study in 2021, PISA countries will conduct a field test in the spring of 2020, primarily to evaluate newly developed assessment and questionnaire items but also to test the assessment operations. The PISA 2021 field test data collection will occur in the U.S.A. from March–April 2020 and the main study data collection from September–November 2021. This submission requests approval for: All recruitment and data collection activities related to the 2020 field test, and the overarching plan and recruitment of schools for the PISA 2021 main study.
