

TABLE 3—TRICARE HOME HEALTH CLAIMS BY SEVERITY AND AGE GROUP, FY 2017

Category based on clinical and functional severity	N	Percent	Percent of category by age group			
			<19	19–44	45–64	65+
Most Severe	3,317	17	9	1	15	20
Moderately Severe	9,288	48	64	43	48	47
Less Severe	5,339	27	9	30	28	27
Least Severe	1,518	8	18	13	6	5
Total	19,462	100	100	100	100	100

The HHVBP model applies to all Medicare-certified HHAs in each of the nine selected states, which covered approximately 25 percent of total TRICARE claims in fiscal year (FY) 2017. However, those HHAs for which Medicare-certification is not available due to the specialized beneficiary categories they serve (*e.g.*, those HHAs specializing solely in the treatment of TRICARE beneficiaries that are under the age of 18 or receiving maternity care) are exempt from the HHVBP adjustment methodology. These specialized HHAs must qualify for corporate services provider status under the Program and are paid for covered professional services under the CMAC reimbursement system, and would not participate in the TRICARE HHVBP.

C. Implementation

The new demonstration is effective January 1, 2020 and will continue until the end of Medicare's HHVBP model on December 31, 2022, unless terminated earlier by the Director, DHA, or Administrator, Centers for Medicare and Medicaid Services.

D. Evaluation

This demonstration project will assist the Department in evaluating the feasibility of incorporating the HHVBP model in the TRICARE program. Regular status reports and a full analysis of demonstration outcomes will be conducted consistent with the requirements in the TRICARE Operations Manual, Chapter 29, Section 1.

TRICARE's hypothesis is that payments that are linked to quality outcomes will:

(1) Be administratively feasible, meaning that the demonstration will be successfully implemented and

administered within a reasonable margin of the DHA's estimate of this demonstration;

(2) Improve the quality of care delivered over time; and

(3) Be cost-neutral or result in modest long-term cost savings.

Success shall be defined as:

(1) Implementation and ongoing maintenance costs do not exceed 2 percent of the annual TRICARE total spend on home health care in the HHVBP demonstration states, and a high percentage of TRICARE HHAs provide their TPS scores.

(2) Measurable and statistically significant improvements in the quality of care received by TRICARE beneficiaries occurs, year-over-year, with averages from 2014–2018 serving as the baseline data period.

(3) The average acuity-adjusted home health cost per TRICARE beneficiary or episode in the HHVBP states increases at a slower rate or at the same rate compared to the same measure in the non-HHVBP states.

Following the end of each 12 months in the demonstration, DHA will measure and report the preceding data to the Director, DHA, along with a recommendation of whether to continue or discontinue the demonstration.

In the 12 months following termination of the demonstration, DHA shall make a report available to the public on the DHA website which details the findings of this demonstration, and potential next steps, if the demonstration is found to be successful in achieving the anticipated results. Continuation of the demonstration, or a transition into the Basic program reimbursement methodologies will be issued via appropriate **Federal Register** Notice or rulemaking action, and will be based on

a demonstration that the pilot met the benchmarks set for success that are established in this Notice and Implementing Instructions.
