Abstract: The New Source Performance Standards (NSPS) for Incinerators (40 CFR part 60, subpart E) apply to existing incinerators that charge more than 45 metric tons per day (50 tons per day) of solid waste, and that commenced either construction or modification after August 17, 1971. Solid waste is defined as refuse, more than 50 percent of which is municipal type waste consisting of a mixture of paper, wood, yard wastes, food wastes, plastics, leather, rubber, and other combustibles, and noncombustible materials such as glass and rock.

Owners and operators of existing incinerators that charge more than 45 metric tons per day (50 tons per day) of solid waste, and that commenced construction or modification after August 17, 1971 are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the applicable standards in 40 CFR part 60, subpart E. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with 40 CFR part 60, subpart E.

Form Numbers: None.

Respondents/affected entities:

Existing incinerators that charge more than 45 metric tons per day (50 tons per day) of solid waste, and that commenced either construction or modification after August 17, 1971.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart E).

Estimated number of respondents: 82 (total).

Frequency of response: Initially and occasionally.

Total estimated burden: 8,490 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$796,000 (per year), which includes \$247,000 in annualized capital/startup and/or operation & maintenance costs and labor costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is negative or non-existent. There is an increase in O&M costs in

this ICR compared to the previous ICR. The annual O&M costs for the PM CMS have been increased to 2018 dollars using the CEPCI Equipment Cost Index.

Director, Regulatory Support Division.
