BILLING CODE 9211–03–P

NUCLEAR REGULATORY COMMISSION

[NRC–2019–0073]

Stakeholder Input on Best Practices for Establishment and Operation of Local Community Advisory Boards in Response to a Portion of the Nuclear Energy Innovation and Modernization Act

AGENCY: Nuclear Regulatory Commission.

ACTION: Public meetings and webinar; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is undertaking activities to develop a report identifying best practices for establishment and

operation of local community advisory boards (CABs) associated with decommissioning activities, including lessons learned from existing boards, as required by the Nuclear Energy Innovation and Modernization Act (NEIMA). As part of developing the report, the NRC is hosting 11 public meetings and a public webinar to consult with host States, communities within the emergency planning zone of an applicable nuclear power reactor, and existing local CABs. In addition to these public meetings and public webinar, the NRC has developed a questionnaire to collect information regarding the areas identified in NEIMA with respect to the creation and operation of CABs. The results of the meetings, along with any other data received as a result of the NRC’s information collection activities associated with the NEIMA Section 108,

will be captured in a best practices report that will be submitted to Congress.

DATES: Comments must be filed by November 15, 2019. Public meetings and a public webinar to discuss best practices and lessons learned associated with CABs at decommissioning nuclear power reactors have been taking and will take place from August through October of 2019. Specific details regarding the dates, times, locations, and other logistical information for the public meetings and public webinar can be found on the NRC’s public website at <https://www.nrc.gov/waste/decommissioning/neima-section-108.html>.

ADDRESSES: You may submit comments by any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2019–0073. Address

questions about NRC docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301–287–9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Marlayna Vaaler Doell, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3178; email: NEIMA108.Resource@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2019–0073 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2019–0073.
- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC’s PDR:* You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2019–0073 in your comment submission. The NRC cautions you not to include identifying or contact information that

you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Introduction

The NRC is coordinating activities in accordance with Section 108 of NEIMA to develop a report identifying best practices for establishment and operation of CABs. The contents of this report, scheduled to be issued to Congress no later than July 14, 2020, will include (1) a description of the type of topics that might be brought before a CAB; (2) how the board’s input could inform the decision-making process of stakeholders for various decommissioning activities; how the board could interact with the NRC and other Federal regulatory bodies to promote dialogue between the licensee and affected stakeholders; and (3) how the board could offer opportunities for public engagement throughout all phases of the decommissioning process. The report will also include a discussion of the composition of existing CABs and best practices identified during the establishment and operation of such boards, including logistical considerations, frequency of meetings, the selection of board members, etc.

In developing a best practices report, and as required by NEIMA, the NRC is consulting with host States, communities within the emergency planning zone of an applicable nuclear power reactor, and existing CABs. This consultation includes hosting 11 Category 3 public meetings and at least 1 nationwide webinar. These public meetings are being held in locations that ensure geographic diversity across the United States, with priority given to States that (1) have a nuclear power reactor currently undergoing the decommissioning process; and (2) requested a public meeting under the provisions of NEIMA in accordance

with the **Federal Register** (FR) notice published on March 18, 2019 (84 FR 9841). At NRC Category 3 public meetings, the public is invited to participate by providing comments and asking questions.

In addition to these public meetings, the NRC has developed a questionnaire to collect information regarding the areas identified in NEIMA with respect to the creation and operation of CABs. The NRC is requesting responses from existing CABs in the vicinity of power reactors undergoing decommissioning, similar established stakeholder groups, or local government organizations. The questionnaire is available at <https://www.nrc.gov/waste/decommissioning/neima-local-comm-advisory-board-questionnaire.html>.

III. Category 3 Public Meeting Dates and Locations

Consistent with the consultation requirements in NEIMA Section 108, the NRC received requests for and identified the areas surrounding 11 nuclear power reactors as locations to host public meetings to discuss best practices and lessons learned for establishment and operation of CABs.

Public meetings have been held near the following eight reactors:

- (1) Palisades Nuclear Generating Station in Covert, Michigan, on August 21, 2019;
- (2) Humboldt Bay Nuclear Power Plant in Eureka, California, on August 26, 2019;
- (3) Diablo Canyon Power Plant in San Luis Obispo, California, on August 27, 2019;
- (4) San Onofre Nuclear Generating Station in San Clemente, California, on August 29, 2019;
- (5) Vermont Yankee Nuclear Power Plant in Vernon, Vermont, on September 10, 2019;
- (6) Pilgrim Nuclear Power Station in Plymouth, Massachusetts, on September 11, 2019;
- (7) Kewaunee Power Station in Kewaunee, Wisconsin, on September 24, 2019; and
- (8) Zion Nuclear Power Station in Zion, Illinois, on September 26, 2019.

The three remaining public meetings will be held near the following reactors:

- (1) Indian Point Energy Center in Buchanan, New York, on October 2, 2019 (ADAMS Accession No. ML19232A505);
- (2) Oyster Creek Nuclear Generating Station in Forked River, New Jersey, on October 3, 2019 (ADAMS Accession No. ML19232A504); and
- (3) Crystal River 3 Nuclear Power Plant in Crystal River, Florida, on October 10, 2019 (ADAMS Accession No. ML19232A502).

Additionally, the NRC hosted a public webinar held on August 8, 2019, to obtain comments from individuals in other areas of the country.

Specific details regarding the dates, times, locations, and other logistical information for each of the meetings can be found on the NRC's NEIMA Section 108 public website at <https://www.nrc.gov/waste/decommissioning/neima-section-108.html>. For information about attending the NEIMA Section 108 Category 3 public meetings, please see the public website listed above or contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

IV. Local Community Advisory Board Questionnaire

The NRC is seeking input from existing CABs in the vicinity of power reactors undergoing decommissioning, similar established stakeholder groups, or local government organizations regarding best practices and lessons learned associated with CABs at decommissioning nuclear power reactors. Comments may be submitted by November 15, 2019. Comments submitted after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received by this date.

Dated at Rockville, Maryland, this 24th day of September, 2019.

For the Nuclear Regulatory Commission.

Bruce A. Watson,

Chief, Reactor Decommissioning Branch, Division of Decommissioning, Uranium Recovery, and Waste Programs, Office of Nuclear Material Safety and Safeguards.

NUCLEAR REGULATORY COMMISSION

[NRC-2019-0157]

Applicability of Existing Regulatory Guides to the Design, Construction, and Operation of an Independent Spent Fuel Storage Installation

AGENCY: Nuclear Regulatory Commission.

ACTION: Regulatory guide; withdrawal.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is withdrawing Regulatory Guide (RG) 3.53, "Applicability of Existing Regulatory Guides to the Design, Construction, and Operation of an Independent Spent Fuel Storage Installation." This document is being withdrawn because the information included in the RG has

been superseded by newer guidance and is therefore no longer needed.

DATES: The withdrawal of RG 3.53 takes effect on September 27, 2019.

ADDRESSES: Please refer to Docket ID NRC-2019-0157 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document, using the following methods:

- *Federal rulemaking website:* Go to <https://www.regulations.gov/> and search for Docket ID NRC-2019-0157. Address questions about NRC docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301-287-9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Document collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. The basis for the withdrawal of this regulatory guide is found in ADAMS under Accession No. ML19177A369.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT:

Haile Lindsay, Office of Nuclear Material Safety and Safeguards; telephone: 301-415-0616; email: Haile.Lindsay@nrc.gov, or Harriet Karagiannis, Office of Nuclear Regulatory Research; telephone: 301-415-2493; email: Harriet.Karagiannis@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION: The NRC is withdrawing RG 3.53 because it has been superseded and is no longer needed. RG 3.53 was published in July 1982 to describe the applicability of existing regulatory guides that would aid in the design, construction, and operation of an independent spent fuel

storage installation (ISFSI). At that time, there were no precedents for applications for ISFSIs, there was not a consolidated set of guidance, and information technology did not exist to provide guidance electronically for ISFSIs. The staff issued RG 3.53 to expedite the staff's reviews of ISFSI applications, which were anticipated under the new requirements in title 10 of the *Code of Federal Regulations* (10 CFR) part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High Level Radioactive Waste, and Reactor-Related Greater than Class C Waste."

Since 1982, many of the guidance documents and regulatory positions listed in the RG have been withdrawn or superseded by more current guidance. Examples of new or revised staff guidance for ISFSIs include RG 3.48, "Standard Format and Content for the Safety Analysis Report for an Independent Spent Fuel Storage Installation or Monitored Retrievable Storage Installation (Dry Storage)," RG 3.50, "Standard Format and Content for a Specific License Application for An Independent Spent Fuel Storage Installation or Monitored Retrievable Storage Facility," RG 3.60, "Design of an Independent Spent Fuel Storage Installation (Dry Storage)," and RG 3.62, "Standard Format and Content for the Safety Analysis Report for Onsite Storage of Spent Fuel Storage Casks." These guidance documents incorporate the lessons learned during the licensing process and from operational experiences with ISFSIs. The current information technology available today makes the numerous RGs in the areas of design, construction, and operation of an ISFSI readily available electronically on the NRC's public website and it is easy for applicants to navigate and identify these guides.

Dated at Rockville, Maryland, this 23rd day of September, 2019.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.
