

published on the APEP website to communicate the testing results to the public. The Agency plans to begin implementation of the new risk-based testing program by 2022 when the initial round of registration review is completed.

The Agency will maintain flexibility responding to evolving healthcare issues that may require the risk factors to be updated periodically as new, relevant information becomes available. The Agency is soliciting feedback on the proposed draft Strategy to include specific questions (Unit III.B). As necessary, respondents may propose alternatives to the recommendations described in the draft Strategy, and the Agency will consider them for inclusion appropriateness on a case-by-case basis.

At places in these guidance documents, the Agency uses the word "should." In this document, use of "should" with regard to an action means that the action is recommended rather than required.

B. What topics is the Agency seeking public input on?

The Agency is particularly interested in input from all interested stakeholders related to the following questions:

Focus Questions

1. Please comment on the proposed risk factors and refinements, their proposed prioritization, their strengths and limitations, and recommendations for other risk factors not considered.

2. Are the options provided for sample collection suitable for the purpose of the testing program, and if not, what approaches would you suggest to optimize sample collection. Please provide advantages and disadvantages to your recommendations as appropriate.

3. Should the Agency and/or stakeholders conduct the laboratory evaluation (formulation chemistry and product efficacy) of disinfectant products? Provide examples to support your opinions and itemize situations where one approach would be more favorable versus the other.

4. Please comment on the flexibility and feasibility of the example workplan approach (See Appendix A, draft Strategy).

5. Please comment on the proposed communication strategy to convey test results to registrants and the general public including the preferred frequency of updates.

6. Please provide suggested routes for resolution of efficacy failures. Previously, these were addressed by "regulatory fixes" to include retesting, label amendments, etc.
