

required resources (stressors). The term “threat” may encompass—either together or separately—the source of the action or condition or the action or condition itself. However, the mere identification of any threat(s) or amelioration of any threat(s) may not be sufficient to compel a finding that the information in the petition is substantial information indicating that the petitioned action may be warranted. For a petition to delist a species, the information presented in the petition must include evidence sufficient to suggest that these threats affecting the species may have been ameliorated to the point that the species may no longer meet the definition of an endangered species or threatened species under the Act.

If we find that a petition presents such information, our subsequent status review will evaluate all identified threats by considering the individual-, population-, and species-level effects and the expected response by the species. We will evaluate individual threats and their expected effects on the species, then analyze the cumulative effect of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that are expected to have positive effects on the species—such as any existing regulatory mechanisms or conservation efforts that may ameliorate threats. It is only after conducting this cumulative analysis of threats and the actions that may ameliorate them, and the expected effect on the species now and in the foreseeable future, that we can determine whether the species meets the definition of an endangered species or threatened species under the Act (16 U.S.C. 1531 *et seq.*).

If we find that a petition presents substantial scientific or commercial information indicating that the petitioned action may be warranted, the Act requires that we promptly commence a review of the status of the species, and we will subsequently complete a status review in accordance with our prioritization methodology for 12-month findings (81 FR 49248; July 27, 2016).

Summary of Finding

Species and Range

Bone Cave harvestman (*Texella reyesi*); Texas.

Petition History

On June 2, 2014, we received a petition dated June 2, 2014, from John Yearwood, Kathryn Heidemann, Charles and Cheryl Shell, the Walter Sidney Shell Management Trust, the American

Stewards of Liberty, and Steven W. Carothers requesting that the endangered Bone Cave harvestman be delisted due to recovery and error in information. The petition clearly identified itself as a petition and included the requisite identification information for the petitioners, as required at that time at 50 CFR 424.14(a). We evaluated this petition under the 50 CFR 424.14 requirements that were in effect prior to October 27, 2016, as explained above under Background.

On June 1, 2015, the Service published a 90-day finding in the **Federal Register** (80 FR 30990) that the petition did not present substantial scientific or commercial information indicating that the petitioned action was warranted. On December 15, 2015, the American Stewards of Liberty, Charles and Cheryl Shell, Walter Sidney Shell Management Trust, Kathryn Heidemann, and Robert V. Harrison, Sr., challenged the June 1, 2015, 90-day finding in Federal district court. The Service subsequently sought the court’s permission to reconsider the 90-day finding after concluding that certain materials accompanying the petition were inadvertently not considered in the 2015 90-day finding. On December 22, 2016, the court granted the Service’s request and ordered the Service to deliver a new 90-day finding to the **Federal Register** on or before March 31, 2017. That deadline was subsequently extended to May 1, 2017. On May 4, 2017, the Service published a new 90-day finding in the **Federal Register** (82 FR 20861) that the petition did not present substantial scientific or commercial information indicating that the petitioned action was warranted.

On October 5, 2017, the American Stewards of Liberty, Charles and Cheryl Shell, Walter Sidney Shell Management Trust, Kathryn Heidemann, and Robert V. Harrison, Sr., challenged the May 4, 2017, 90-day finding in Federal district court. On March 28, 2019, the court vacated the 2017 90-day finding and remanded that 90-day finding to the Service for further consideration consistent with the court’s opinion. This finding addresses the 2014 petition in light of the court’s order.

Finding

Based on our review of the petition and sources cited in the petition, we find that the petition presents substantial scientific or commercial information indicating the petitioned action may be warranted for the Bone Cave harvestman due to potential reduction or amelioration of threats associated with development (Factor A) and predation (Factor C). The petition

also presents substantial information that the existing regulatory mechanisms may be adequate to address impacts of these threats (Factor D).

The basis for our finding on this petition, and other information regarding our review of the petition, can be found as an appendix at <http://www.regulations.gov> under Docket No. FWS-R2-ES-2017-0018 under “Supporting Documents.”

Conclusion

On the basis of our evaluation of the information presented in the petition under section 4(b)(3)(A) of the Act, we have determined that the petition summarized above for the Bone Cave harvestman presents substantial scientific or commercial information indicating that delisting the species may be warranted. Therefore, we are initiating a status review to determine whether delisting the species is warranted under the Act. At the conclusion of the status review, we will issue a finding, in accordance with section 4(b)(3)(B) of the Act, as to whether delisting the Bone Cave harvestman is not warranted, warranted, or warranted but precluded by pending proposals to determine whether any species is an endangered species or a threatened species.

Authors

The primary authors of this document are staff members of the Ecological Services Program, U.S. Fish and Wildlife Service.

Authority

The authority for these actions is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: September 9, 2019.

Margaret E. Everson,

Principal Deputy Director, U.S. Fish and Wildlife Service, Exercising the Authority of the Director, U.S. Fish and Wildlife Service.

National Oceanic and Atmospheric Administration

50 CFR Part 229

[Docket No. 191003-0054]

RIN 0648-BI76

List of Fisheries for 2020

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule, request for comment.

SUMMARY: The National Marine Fisheries Service (NMFS) publishes its proposed List of Fisheries (LOF) for 2020, as required by the Marine Mammal Protection Act (MMPA). The LOF for 2020 reflects new information on interactions between commercial fisheries and marine mammals. NMFS must classify each commercial fishery on the LOF into one of three categories under the MMPA based upon the level of mortality and serious injury of marine mammals that occurs incidental to each fishery. The classification of a fishery on the LOF determines whether participants in that fishery are subject to certain provisions of the MMPA, such as registration, observer coverage, and take reduction plan (TRP) requirements.

DATES: Comments must be received by November 12, 2019.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2019–0041, by either of the following methods:

Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal:

1. Go to www.regulations.gov/!
#!docketDetail;D=NOAA-NMFS-2019-0041;

2. Click the “Comment Now!” icon, complete the required fields;

3. Enter or attach your comments.

Mail: Submit written comments to Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT:

Jaclyn Taylor, Office of Protected Resources, 301–427–8402; Allison Rosner, Greater Atlantic Region, 978–281–9328; Jessica Powell, Southeast Region, 727–824–5312; Dan Lawson,

West Coast Region, 562–980–3209; Suzie Teerlink, Alaska Region, 907–586–7240; Kevin Brindock, Pacific Islands Region, 808–725–5146. Individuals who use a telecommunications device for the hearing impaired may call the Federal Information Relay Service at 1–800–877–8339 between 8 a.m. and 4 p.m. Eastern time, Monday through Friday, excluding Federal holidays.

SUPPLEMENTARY INFORMATION:

What is the List of Fisheries?

Section 118 of the MMPA requires NMFS to place all U.S. commercial fisheries into one of three categories based on the level of incidental mortality and serious injury of marine mammals occurring in each fishery (16 U.S.C. 1387(c)(1)). The classification of a fishery on the LOF determines whether participants in that fishery may be required to comply with certain provisions of the MMPA, such as registration, observer coverage, and take reduction plan requirements. NMFS must reexamine the LOF annually, considering new information in the Marine Mammal Stock Assessment Reports (SARs) and other relevant sources, and publish in the **Federal Register** any necessary changes to the LOF after notice and opportunity for public comment (16 U.S.C. 1387(c)(1)(C)).

How does NMFS determine in which category a fishery is placed?

The definitions for the fishery classification criteria can be found in the implementing regulations for section 118 of the MMPA (50 CFR 229.2). The criteria are also summarized here.

Fishery Classification Criteria

The fishery classification criteria consist of a two-tiered, stock-specific approach that first addresses the total impact of all fisheries on each marine mammal stock and then addresses the impact of individual fisheries on each stock. This approach is based on consideration of the rate, in numbers of animals per year, of incidental mortalities and serious injuries of marine mammals due to commercial fishing operations relative to the potential biological removal (PBR) level for each marine mammal stock. The MMPA (16 U.S.C. 1362 (20)) defines the PBR level as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population (OSP). This definition can also be found in the

implementing regulations for section 118 of the MMPA (50 CFR 229.2).

Tier 1: Tier 1 considers the cumulative fishery mortality and serious injury for a particular stock. If the total annual mortality and serious injury of a marine mammal stock, across all fisheries, is less than or equal to 10 percent of the PBR level of the stock, all fisheries interacting with the stock will be placed in Category III (unless those fisheries interact with other stock(s) for which total annual mortality and serious injury is greater than 10 percent of PBR). Otherwise, these fisheries are subject to the next tier (Tier 2) of analysis to determine their classification.

Tier 2: Tier 2 considers fishery-specific mortality and serious injury for a particular stock.

Category I: Annual mortality and serious injury of a stock in a given fishery is greater than or equal to 50 percent of the PBR level (i.e., frequent incidental mortality and serious injury of marine mammals).

Category II: Annual mortality and serious injury of a stock in a given fishery is greater than 1 percent and less than 50 percent of the PBR level (i.e., occasional incidental mortality and serious injury of marine mammals).

Category III: Annual mortality and serious injury of a stock in a given fishery is less than or equal to 1 percent of the PBR level (i.e., a remote likelihood of or no known incidental mortality and serious injury of marine mammals).

Additional details regarding how the categories were determined are provided in the preamble to the final rule implementing section 118 of the MMPA (60 FR 45086; August 30, 1995).

Because fisheries are classified on a per-stock basis, a fishery may qualify as one category for one marine mammal stock and another category for a different marine mammal stock. A fishery is typically classified on the LOF at its highest level of classification (e.g., a fishery qualifying for Category III for one marine mammal stock and for Category II for another marine mammal stock will be listed under Category II). Stocks driving a fishery’s classification are denoted with a superscript “1” in Tables 1 and 2.

Other Criteria That May Be Considered

The tier analysis requires a minimum amount of data, and NMFS does not have sufficient data to perform a tier analysis on certain fisheries. Therefore, NMFS has classified certain fisheries by analogy to other Category I or II fisheries that use similar fishing techniques or gear that are known to cause mortality

or serious injury of marine mammals, or according to factors discussed in the final LOF for 1996 (60 FR 67063; December 28, 1995) and listed in the regulatory definition of a Category II fishery. In the absence of reliable information indicating the frequency of incidental mortality and serious injury of marine mammals by a commercial fishery, NMFS will determine whether the incidental mortality or serious injury is “frequent,” “occasional,” or “remote” by evaluating other factors such as fishing techniques, gear used, methods used to deter marine mammals, target species, seasons and areas fished, qualitative data from logbooks or fishermen reports, stranding data, and the species and distribution of marine mammals in the area, or at the discretion of the Assistant Administrator for Fisheries (50 CFR 229.2).

Further, eligible commercial fisheries not specifically identified on the LOF are deemed to be Category II fisheries until the next LOF is published (50 CFR 229.2).

How does NMFS determine which species or stocks are included as incidentally killed or injured in a fishery?

The LOF includes a list of marine mammal species and/or stocks incidentally killed or injured in each commercial fishery. The list of species and/or stocks incidentally killed or injured includes “serious” and “non-serious” documented injuries as described later in the List of Species and/or Stocks Incidentally Killed or Injured in the Pacific Ocean and the Atlantic Ocean, Gulf of Mexico, and Caribbean sections. To determine which species or stocks are included as incidentally killed or injured in a fishery, NMFS annually reviews the information presented in the current SARs and injury determination reports. SARs are brief reports summarizing the status of each stock of marine mammals occurring in waters under U.S. jurisdiction, including information on the identity and geographic range of the stock, population statistics related to abundance, trend, and annual productivity, notable habitat concerns, and estimates of human-caused M/SI by source. The SARs are based upon the best available scientific information and provide the most current and inclusive information on each stock’s PBR level and level of interaction with commercial fishing operations. The best available scientific information used in the SARs and reviewed for the 2020 LOF generally summarizes data from 2012–2016. NMFS also reviews other

sources of new information, including injury determination reports, bycatch estimation reports, observer data, logbook data, stranding data, disentanglement network data, fishermen self-reports (*i.e.*, MMPA mortality/injury reports), and anecdotal reports from that time period. In some cases, more recent information may be available and used in the LOF.

For fisheries with observer coverage, species or stocks are generally removed from the list of marine mammal species and/or stocks incidentally killed or injured if no interactions are documented in the 5-year timeframe summarized in that year’s LOF. For fisheries with no observer coverage and for observed fisheries with evidence indicating that undocumented interactions may be occurring (*e.g.*, fishery has low observer coverage and stranding network data include evidence of fisheries interactions that cannot be attributed to a specific fishery) species and stocks may be retained for longer than 5 years. For these fisheries, NMFS will review the other sources of information listed above and use its discretion to decide when it is appropriate to remove a species or stock.

Where does NMFS obtain information on the level of observer coverage in a fishery on the LOF?

The best available information on the level of observer coverage and the spatial and temporal distribution of observed marine mammal interactions is presented in the SARs. Data obtained from the observer program and observer coverage levels are important tools in estimating the level of marine mammal mortality and serious injury in commercial fishing operations. Starting with the 2005 SARs, each Pacific and Alaska SAR includes an appendix with detailed descriptions of each Category I and II fishery on the LOF, including the observer coverage in those fisheries. For Atlantic fisheries, this information can be found in the LOF Fishery Fact Sheets. The SARs do not provide detailed information on observer coverage in Category III fisheries because, under the MMPA, Category III fisheries are not required to accommodate observers aboard vessels due to the remote likelihood of mortality and serious injury of marine mammals. Fishery information presented in the SARs’ appendices and other resources referenced during the tier analysis may include: Level of observer coverage; target species; levels of fishing effort; spatial and temporal distribution of fishing effort; characteristics of fishing gear and

operations; management and regulations; and interactions with marine mammals. Copies of the SARs are available on the NMFS Office of Protected Resources website at: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessment-reports-region>. Information on observer coverage levels in Category I, II, and III fisheries can be found in the fishery fact sheets on the NMFS Office of Protected Resources’ website: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/list-fisheries-summary-tables>. Additional information on observer programs in commercial fisheries can be found on the NMFS National Observer Program’s website: <https://www.fisheries.noaa.gov/national/fisheries-observers/national-observer-program>.

How do I find out if a specific fishery is in Category I, II, or III?

The LOF includes three tables that list all U.S. commercial fisheries by Category. Table 1 lists all of the commercial fisheries in the Pacific Ocean (including Alaska); Table 2 lists all of the commercial fisheries in the Atlantic Ocean, Gulf of Mexico, and Caribbean; and Table 3 lists all U.S. authorized commercial fisheries on the high seas. A fourth table, Table 4, lists all commercial fisheries managed under applicable TRPs or take reduction teams (TRT).

Are high seas fisheries included on the LOF?

Beginning with the 2009 LOF, NMFS includes high seas fisheries in Table 3 of the LOF, along with the number of valid High Seas Fishing Compliance Act (HSFCA) permits in each fishery. As of 2004, NMFS issues HSFCA permits only for high seas fisheries analyzed in accordance with the National Environmental Policy Act (NEPA) and the Endangered Species Act (ESA). The authorized high seas fisheries are broad in scope and encompass multiple specific fisheries identified by gear type. For the purposes of the LOF, the high seas fisheries are subdivided based on gear type (*e.g.*, trawl, longline, purse seine, gillnet, troll, etc.) to provide more detail on composition of effort within these fisheries. Many fisheries operate in both U.S. waters and on the high seas, creating some overlap between the fisheries listed in Tables 1 and 2 and those in Table 3. In these cases, the high seas component of the fishery is not considered a separate fishery, but an extension of a fishery operating within U.S. waters (listed in Table 1 or 2). NMFS designates those fisheries in

Tables 1, 2, and 3 by a “*” after the fishery’s name. The number of HSFCA permits listed in Table 3 for the high seas components of these fisheries operating in U.S. waters does not necessarily represent additional effort that is not accounted for in Tables 1 and 2. Many vessels/participants holding HSFCA permits also fish within U.S. waters and are included in the number of vessels and participants operating within those fisheries in Tables 1 and 2.

HSFCA permits are valid for 5 years, during which time Fishery Management Plans (FMPs) can change. Therefore, some vessels/participants may possess valid HSFCA permits without the ability to fish under the permit because it was issued for a gear type that is no longer authorized under the most current FMP. For this reason, the number of HSFCA permits displayed in Table 3 is likely higher than the actual U.S. fishing effort on the high seas. For more information on how NMFS classifies high seas fisheries on the LOF, see the preamble text in the final 2009 LOF (73 FR 73032; December 1, 2008). Additional information about HSFCA permits can be found at <https://www.fisheries.noaa.gov/permit/high-seas-fishing-permits>.

Where can I find specific information on fisheries listed on the LOF?

Starting with the 2010 LOF, NMFS developed summary documents, or fishery fact sheets, for each Category I and II fishery on the LOF. These fishery fact sheets provide the full history of each Category I and II fishery, including: When the fishery was added to the LOF; the basis for the fishery’s initial classification; classification changes to the fishery; changes to the list of species and/or stocks incidentally killed or injured in the fishery; fishery gear and methods used; observer coverage levels; fishery management and regulation; and applicable TRPs or TRTs, if any. These fishery fact sheets are updated after each final LOF and can be found under “How Do I Find Out if a Specific Fishery is in Category I, II, or III?” on the NMFS Office of Protected Resources’ website: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-protection-act-list-fisheries>, linked to the “List of Fisheries Summary” table. NMFS is developing similar fishery fact sheets for each Category III fishery on the LOF. However, due to the large number of Category III fisheries on the LOF and the lack of accessible and detailed information on many of these fisheries, the development of these fishery fact sheets is taking significant time to complete. NMFS began posting Category

III fishery fact sheets online with the LOF for 2016.

Am I required to register under the MMPA?

Owners of vessels or gear engaging in a Category I or II fishery are required under the MMPA (16 U.S.C. 1387(c)(2)), as described in 50 CFR 229.4, to register with NMFS and obtain a marine mammal authorization to lawfully take non-endangered and non-threatened marine mammals incidental to commercial fishing operations. Owners of vessels or gear engaged in a Category III fishery are not required to register with NMFS or obtain a marine mammal authorization.

How do I register, renew and receive my Marine Mammal Authorization Program authorization certificate?

NMFS has integrated the MMPA registration process, implemented through the Marine Mammal Authorization Program (MMAP), with existing state and Federal fishery license, registration, or permit systems for Category I and II fisheries on the LOF. Participants in these fisheries are automatically registered under the MMAP and are not required to submit registration or renewal materials.

In the Pacific Islands, West Coast, and Alaska regions, NMFS will issue vessel or gear owners an authorization certificate via U.S. mail or with their state or Federal license or permit at the time of issuance or renewal. In the Greater Atlantic and Southeast Regions, NMFS will issue vessel or gear owners an authorization certificate via U.S. mail automatically at the beginning of each calendar year.

Vessel or gear owners who participate in fisheries in these regions and have not received authorization certificates by the beginning of the calendar year, or with renewed fishing licenses, must contact the appropriate NMFS Regional Office (see **FOR FURTHER INFORMATION**). Authorization certificates may also be obtained by visiting the MMAP website <https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-authorization-program#obtaining-a-marine-mammal-authorization-certificate>.

The authorization certificate, or a copy, must be on board the vessel while it is operating in a Category I or II fishery, or for non-vessel fisheries, in the possession of the person in charge of the fishing operation (50 CFR 229.4(e)). Although efforts are made to limit the issuance of authorization certificates to only those vessel or gear owners that participate in Category I or II fisheries, not all state and Federal

license or permit systems distinguish between fisheries as classified by the LOF. Therefore, some vessel or gear owners in Category III fisheries may receive authorization certificates even though they are not required for Category III fisheries.

Individuals fishing in Category I and II fisheries for which no state or Federal license or permit is required must register with NMFS by contacting their appropriate Regional Office (see **ADDRESSES**).

Am I required to submit reports when I kill or injure a marine mammal during the course of commercial fishing operations?

In accordance with the MMPA (16 U.S.C. 1387(e)) and 50 CFR 229.6, any vessel owner or operator, or gear owner or operator (in the case of non-vessel fisheries), participating in a fishery listed on the LOF must report to NMFS all incidental mortalities and injuries of marine mammals that occur during commercial fishing operations, regardless of the category in which the fishery is placed (I, II, or III) within 48 hours of the end of the fishing trip or, in the case of non-vessel fisheries, fishing activity. “Injury” is defined in 50 CFR 229.2 as a wound or other physical harm. In addition, any animal that ingests fishing gear or any animal that is released with fishing gear entangling, trailing, or perforating any part of the body is considered injured, regardless of the presence of any wound or other evidence of injury, and must be reported.

Mortality/injury reporting forms and instructions for submitting forms to NMFS can be found at: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-authorization-program#reporting-a-death-or-injury-of-a-marine-mammal-during-commercial-fishing-operations> or by contacting the appropriate regional office (see **FOR FURTHER INFORMATION**). Forms may be submitted via any of the following means: (1) Online using the electronic form; (2) emailed as an attachment to nmfs.mireport@noaa.gov; (3) faxed to the NMFS Office of Protected Resources at 301–713–0376; or (4) mailed to the NMFS Office of Protected Resources (mailing address is provided on the postage-paid form that can be printed from the web address listed above). Reporting requirements and procedures are found in 50 CFR 229.6.

Am I required to take an observer aboard my vessel?

Individuals participating in a Category I or II fishery are required to

accommodate an observer aboard their vessel(s) upon request from NMFS. MMPA section 118 states that the Secretary is not required to place an observer on a vessel if the facilities for quartering an observer or performing observer functions are so inadequate or unsafe that the health or safety of the observer or the safe operation of the vessel would be jeopardized; thereby authorizing the exemption of vessels too small to safely accommodate an observer from this requirement. However, U.S. Atlantic Ocean, Caribbean, or Gulf of Mexico large pelagics longline vessels operating in special areas designated by the Pelagic Longline Take Reduction Plan implementing regulations (50 CFR 229.36(d)) will not be exempted from observer requirements, regardless of their size. Observer requirements are found in 50 CFR 229.7.

Am I required to comply with any marine mammal TRP regulations?

Table 4 provides a list of fisheries affected by TRPs and TRTs. TRP regulations are found at 50 CFR 229.30 through 229.37. A description of each TRT and copies of each TRP can be found at: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-take-reduction-plans-and-teams>. It is the responsibility of fishery participants to comply with applicable take reduction regulations.

Where can I find more information about the LOF and the MMAP?

Information regarding the LOF and the MMAP, including registration procedures and forms; current and past LOFs; descriptions of each Category I and II fishery and some Category III fisheries; observer requirements; and marine mammal mortality/injury reporting forms and submittal procedures; may be obtained at: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-protection-act-list-fisheries>, or from any NMFS Regional Office at the addresses listed below:

NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930–2298, Attn: Allison Rosner;

NMFS, Southeast Region, 263 13th Avenue South, St. Petersburg, FL 33701, Attn: Jessica Powell;

NMFS, West Coast Region, Long Beach Office, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213, Attn: Dan Lawson;

NMFS, Alaska Region, Protected Resources, P.O. Box 22668, 709 West

9th Street, Juneau, AK 99802, Attn: Suzie Teerlink; or

NMFS, Pacific Islands Regional Office, Protected Resources Division, 1845 Wasp Blvd., Building 176, Honolulu, HI 96818, Attn: Kevin Brindock.

Sources of Information Reviewed for the 2019 LOF

NMFS reviewed the marine mammal incidental mortality and serious injury information presented in the SARs for all fisheries to determine whether changes in fishery classification are warranted. The SARs are based on the best scientific information available at the time of preparation, including the level of mortality and serious injury of marine mammals that occurs incidental to commercial fishery operations and the PBR levels of marine mammal stocks. The information contained in the SARs is reviewed by regional Scientific Review Groups (SRGs) representing Alaska, the Pacific (including Hawaii), and the U.S. Atlantic, Gulf of Mexico, and Caribbean. The SRGs were established by the MMPA to review the science that informs the SARs, and to advise NMFS on marine mammal population status, trends, and stock structure, uncertainties in the science, research needs, and other issues.

NMFS also reviewed other sources of new information, including marine mammal stranding and entanglement data, observer program data, fishermen self-reports, reports to the SRGs, conference papers, FMPs, and ESA documents.

The LOF for 2020 was based on, among other things, stranding data; fishermen self-reports; and SARs, primarily the 2018 SARs, which are based on data from 2012–2016. The SARs referenced in this LOF include: 2016 (82 FR 29039; June 27, 2017), 2017 (83 FR 32093; July 11, 2018) and 2018 (84 FR 28489; June 19, 2019). The SARs are available at: <https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessment-reports-region>.

Summary of Changes to the LOF for 2020

The following summarizes changes to the LOF for 2020, including the classification of fisheries, fisheries listed, the estimated number of vessels/persons in a particular fishery, and the species and/or stocks that are incidentally killed or injured in a particular fishery. NMFS re-classifies one fishery in the LOF for 2020. NMFS also makes changes to the estimated number of vessels/persons and list of

species and/or stocks killed or injured in certain fisheries. The classifications and definitions of U.S. commercial fisheries for 2020 are identical to those provided in the LOF for 2019 with the changes discussed below. State and regional abbreviations used in the following paragraphs include: AK (Alaska), CA (California), GMX (Gulf of Mexico), HI (Hawaii), NC (North Carolina), OR (Oregon), WA (Washington), and WNA (Western North Atlantic).

Commercial Fisheries in the Pacific Ocean

Classification of Fisheries

NMFS proposes to rename the Category III CA/OR coonstripe shrimp fishery to the CA coonstripe shrimp fishery and clarifies that the OR coonstripe shrimp pot fishery is a component of the Category III WA/OR shrimp pot/trap fishery. NMFS also proposes to reclassify the CA coonstripe shrimp fishery from a Category III to a Category II based on one incident of an entangled humpback whale that would have been classified as a serious injury if the whale had not been subsequently disentangled (Carretta *et al.*, 2019).

Targeted effort for coonstripe shrimp with pot gear is limited to fishing effort in California, where a specific permit exists for the coonstripe shrimp fishery. In Oregon and Washington, there have been only a few landings of small amounts of coonstripe shrimp with pot gear over the last 5 years (PacFIN landings data). As a result, the CA coonstripe shrimp pot fishery is distinct in terms of management and fishery participation. The WA/OR shrimp pot/trap fishery is categorized as a Category III fishery on the LOF. This fishery encompasses the very limited effort for coonstripe shrimp as well as other shrimp species, such as pink shrimp and spot prawn in both WA and OR. Given that fishing with pot/trap gear for shrimp in OR and WA is already associated with the WA/OR shrimp pot/trap fishery, we propose to clarify that the limited coonstripe shrimp pot fishing effort that may occur in OR is associated with the Category III WA/OR shrimp pot/trap fishery.

In July 2017, a humpback whale was reported entangled near Crescent City, CA, in multiple sets of fishing gear, including coonstripe shrimp pot gear. While this humpback whale was ultimately disentangled, Carretta *et al.* (2019) determined this entanglement would have constituted a serious injury or mortality for the CA/OR/WA stock of humpback whale without human intervention. Most of the gear associated

with the entanglement was identified as coonstripe shrimp pot gear. This one entanglement event results in an estimate of at least 0.2 M/SI per year, which equates to 1.2 percent of the current PBR (PBR = 16.7 whales; Carretta *et al.*, 2019a) for the CA/OR/WA stock of humpback whale. The estimated total fisheries M/SI for the CA/OR/WA stock of humpback whale is 14.1, which is greater than 10 percent of PBR (Tier 1 analysis). Therefore, because the estimated M/SI is between 1 and 50 percent of PBR (Tier 2 analysis), NMFS proposes to reclassify the CA coonstripe shrimp fishery as a Category II fishery.

Fishery Name and Organizational Changes and Clarification

NMFS proposes to clarify that the Category II AK Southeast salmon drift gillnet fishery and Category III AK Southeast salmon purse seine fishery include both the AK Metlakatla salmon drift gillnet fishery and the AK Metlakatla salmon purse seine fishery. The Metlakatla Indian Community manages fisheries, including the commercial salmon fisheries, within their jurisdiction (Annette Island Reserve). The Metlakatla salmon fisheries are fished in the same region and using the same gear types as the corresponding State-managed salmon fisheries; therefore, NMFS clarifies that the Metlakatla commercial salmon fishing fleets are included in the AK Southeast salmon purse seine and AK Southeast salmon drift gillnet fisheries. Based on this proposed clarification, NMFS also proposes to remove the Category III AK Metlakatla salmon purse seine fishery from the LOF.

Number of Vessels/Persons

NMFS proposes to update the estimated number of vessels/persons in the Pacific Ocean (Table 1) as follows:

Category I

- HI deep-set longline fishery from 142 to 145 vessels/persons;

Category II

- HI shallow-set longline fishery from 13 to 18 vessels/persons;
- American Samoa longline fishery from 20 to 15 vessels/persons;
- CA thresher shark/swordfish drift gillnet (≥ 14 inch (in) mesh) fishery from 18 to 14 vessels/persons;
- CA halibut/white seabass and other species set gillnet (> 3.5 in mesh) fishery from 50 to 37 vessels/persons;
- CA yellowtail, barracuda, and white seabass drift gillnet (mesh size ≥ 3.5 in and < 14 in) fishery from 30 to 22 vessels/persons;

- WA Puget Sound Region salmon drift gillnet fishery from 210 to 154 vessels/persons;
- CA coonstripe shrimp pot fishery from 36 to 14 vessels/persons;
- CA spiny lobster fishery from 194 to 186 vessels/persons;
- CA spot prawn pot fishery from 25 to 23 vessels/persons;
- CA Dungeness crab pot fishery from 570 to 501 vessels/persons;
- OR Dungeness crab pot fishery from 433 to 342 vessels/persons;
- WA/OR/CA sablefish pot fishery from 309 to 155 vessels/persons;
- WA coastal Dungeness crab pot fishery from 228 to 197 vessels/persons;

Category III

- American Samoa bottomfish handline fishery from 1092 to 2095 vessels/persons.

List of Species and/or Stocks Incidentally Killed or Injured in the Pacific Ocean

NMFS proposes to add the Eastern North Pacific stock of gray whale to the list of species/stocks incidentally killed or injured in the Category II CA thresher shark/swordfish drift gillnet (≥ 14 in mesh) fishery. An observer documented a gray whale mortality in the CA thresher shark/swordfish drift gillnet in 2013 (Carretta *et al.*, 2019).

NMFS proposes to add the Eastern North Pacific stock of gray whale to the list of species/stocks incidentally killed or injured in the Category II CA halibut/white seabass and other species set gillnet (> 3.5 in mesh) fishery based on a self-reported entanglement in 2015.

NMFS proposes to add the Alaska stock of ribbon seal to the list of species/stocks incidentally killed or injured in the Category II AK Bering Sea Aleutian Islands rockfish trawl fishery based on an observed mortality in 2014.

NMFS proposes to add CA/OR/WA stock of humpback whale to the list of species/stocks incidentally killed or injured in the Category II CA coonstripe shrimp pot fishery based on a non-serious injury in 2017 (Carretta *et al.*, 2019). This entangled humpback whale was ultimately disentangled, however, Carretta *et al.* (2019) determined this entanglement would have constituted a serious injury or mortality for the CA/OR/WA stock of humpback whale without human intervention.

NMFS proposes to add the California stock of long-beaked common dolphin to the list of species/stocks incidentally killed or injured in the Category II CA spot prawn pot fishery based on a stranding report. In 2017, a long-beaked common dolphin was found dead and entangled in CA spot prawn pot gear (Carretta *et al.*, 2019).

NMFS proposes to add the Western U.S. stock of Steller sea lion to, and remove the Alaska stock of Dall's porpoise from, the list of species/stocks incidentally killed or injured in the Category II AK Bering Sea Aleutian Islands Pacific cod longline fishery. Four Steller sea lion mortalities were observed, three in 2015 and one in 2014. There have been no recent Dall's porpoise mortalities or serious injuries observed.

NMFS proposes to add the Eastern U.S. stock of Steller sea lion to the list of species/stocks incidentally killed or injured in the Category II AK Gulf of Alaska sablefish longline fishery based on an observed mortality in 2015.

NMFS proposes to add four stocks to the list of species/stocks incidentally killed or injured in the Category III to WA/OR/CA groundfish, bottomfish longline/set line fishery based on observed injuries and mortalities reported in Jannot *et al.* 2018: (1) U.S. stock of California sea lion; (2) California breeding stock of Northern elephant seal; (3) CA/OR/WA stock of sperm whale; and (4) Eastern U.S. stock of Steller sea lion.

NMFS proposes to add the Alaska stock of Dall's porpoise to the list of species/stocks incidentally killed or injured in the Category III AK Kodiak salmon purse seine fishery based on a self-reported mortality in 2013.

NMFS proposes to add the Eastern U.S. stock of Steller sea lion to the list of species/stocks incidentally killed or injured in the Category III AK Gulf of Alaska halibut longline fishery based on an observed mortality in 2015.

NMFS proposes to add two stocks to the list of species/stocks incidentally killed or injured in the Category III AK Bering Sea Aleutian Islands Pacific cod trawl fishery: (1) Alaska stock of ribbon seal based on an observed mortality in 2014; and (2) Alaska stock of bearded seal based on an observed mortality in 2013.

NMFS proposes to remove the Hawaii stock of sperm whale from the list of species/stocks incidentally killed or injured in the Category I Hawaii deep-set longline fishery. From 2012–2016, there were no observed mortalities or injuries of the Hawaii stock of sperm whale in the Hawaii deep-set longline fishery (Bradford, 2018, Carretta *et al.*, 2018).

NMFS proposes to remove the Alaska stock of Dall's porpoise from the list of species/stocks incidentally killed or injured in the Category II AK Aleutian Islands pollock trawl fishery based on no recently observed mortalities or injuries.

NMFS proposes to remove the Hawaii stock of short-finned pilot whale from the list of species/stocks incidentally killed or injured in the Category II HI shallow-set longline fishery. From 2012–2016, there were no observed mortalities or injuries of the Hawaii stock of short-finned pilot whale in the Hawaii shallow-set longline fishery (Bradford, 2018, Carretta *et al.*, 2018).

NMFS proposes to remove two stocks from the list of species/stocks incidentally killed or injured in the Category II American Samoa longline fishery including: (1) Unknown stock of Cuvier's beaked whale; and (2) unknown stock of bottlenose dolphin. There were no observed mortalities or injuries of Cuvier's beaked whales or bottlenose dolphins in the American Samoa longline fishery from 2012–2016 (Bradford, 2018, Bradford and Forney, 2017).

NMFS proposes to remove the Alaska stock of ribbon seal from the list of species/stocks incidentally killed or injured in the Category III AK Aleutian Islands Atka mackerel trawl fishery based on no recently observed mortalities or injuries.

Commercial Fisheries in the Atlantic Ocean, Gulf of Mexico, and Caribbean

Fishery Name and Organizational Changes and Clarification

NMFS proposes to add a superscript “1” to the Western North Atlantic stock of gray seals to indicate it is driving the Category I classification of the Northeast sink gillnet fishery. The gray seal mean combined annual mortality in the Northeast sink gillnet fishery is estimated to be 821 animals each year, which represents 59.1 percent of PBR (1,389 animals). Observer coverage from 2012–2016 was 15, 11, 18, 14 and 10 percent, respectively.

NMFS proposes to add a superscript “1” to the Central Georgia estuarine stock of bottlenose dolphins to indicate it is driving the Category II classification of the Atlantic blue crab trap/pot fishery. In 2011 and 2013, there were two documented bottlenose dolphins entangled in crab trap/pot gear. The mean annual estimated mortality and serious injury is 21.1 percent of PBR (1.9) (Waring *et al.*, 2016).

NMFS proposes to add a superscript “1” to the Western North Atlantic stock of gray seals to indicate it is driving the Category II classification of the mid-Atlantic bottom trawl fishery. The gray seal mean combined annual mortality in the mid-Atlantic bottom trawl fishery is 20 animals per year, which represents 1.4 percent of PBR (1,389 animals).

Observer coverage from 2012–2016 was 5, 6, 8, 9 and 9.7 percent, respectively.

NMFS proposes to remove the superscript “1” from the Western North Atlantic stock of long-finned pilot whales to indicate the stock is no longer driving the Category I classification of the Atlantic Ocean, Caribbean, Gulf of Mexico large pelagics longline fishery. The long-finned pilot whale mean combined annual mortality in the pelagic longline fishery is estimated to be 2.6 animals per year, which represents 7.4 percent of PBR. Observer coverage from 2012–2016 was 7, 9, 10, 12 and 15, respectively.

Number of Vessels/Persons

NMFS proposes updates to the estimated number of vessels/persons in the Atlantic Ocean, Gulf of Mexico, and Caribbean (Table 2) as follows:

Category I

- Atlantic Ocean, Caribbean, Gulf of Mexico large pelagics longline fishery from 280 to 201 vessels/persons;

Category II

- NC inshore gillnet fishery from 2,850 to 2,676 vessels/persons;
- Southeastern U.S. Atlantic shark gillnet fishery from 23 to 21 vessels/persons;
- Southeastern U.S. Atlantic, Gulf of Mexico stone crab trap/pot fishery from 1,384 to 1,101 vessels/persons;
- Atlantic blue crab trap/pot fishery from 7,714 to 6,679 vessels/persons;
- NC long haul seine fishery from 30 to 22 vessels/persons.

List of Species and/or Stocks Incidentally Killed or Injured in the Atlantic Ocean, Gulf of Mexico, and Caribbean

NMFS proposes to add the Western North Atlantic stock of hooded seal to the list of species/stocks incidentally killed or injured in the Category I Mid-Atlantic gillnet fishery based on an observed hooded seal mortality in 2016. Observer coverage from 2012–2016 was 2, 3, 5, 6 and 8 percent, respectively.

NMFS proposes to add the Sarasota Bay, Little Sarasota Bay stock of bottlenose dolphin to the list of species/stocks incidentally killed or injured in the Category II Southeastern U.S. Atlantic, Gulf of Mexico stone crab trap/pot fishery. In 2016, one dolphin was disentangled from commercial stone crab trap/pot gear (Hayes *et al.*, 2019).

NMFS proposes to add the Mississippi River Delta stock of bottlenose dolphin to the list species/stocks incidentally killed or injured in the Category II Gulf of Mexico menhaden purse seine fishery based on

two self-reported mortalities documented in 2018.

NMFS proposed to add the Mobile Bay, Bonsecour Bay stock of bottlenose dolphin to the list of species/stocks incidentally killed or injured in the Category III Gulf of Mexico blue crab trap/pot fishery based on one documented entangled stranding mortality in 2015 (Hayes *et al.*, 2019).

NMFS proposes to remove two stocks from the list of species/stocks incidentally killed or injured in the Category I Northeast sink gillnet fishery: (1) Western North Atlantic stock of hooded seal; and (2) Western North Atlantic long-finned pilot whale. The last observed M/SI of these stocks in the Northeast sink gillnet fishery in was in 2004 and 2010, respectively, and the fishery continues to be observed.

Following consultation with the U.S. Fish and Wildlife Service (USFWS), NMFS proposes to remove the Florida stock of West Indian manatee from the list species/stocks incidentally killed or injured in the Category II Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl fishery. From 2008 to 2012, there were no documented fishery related injuries or mortalities in shrimp trawl fisheries (USFWS, 2014). NMFS also proposes to update the Atlantic spotted dolphin, GMX continental and oceanic stock name on the list of species and/or stocks incidentally killed or injured in the Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl fishery to the stock's current name, Atlantic spotted dolphin, Northern Gulf of Mexico.

Commercial Fisheries on the High Seas

Number of Vessels/Persons

NMFS proposes updates to the estimated number of HSFCA permits for high seas fisheries (Table 3) as follows:

Category I

- Atlantic highly migratory species longline fishery from 67 to 53 HSFCA permits;
- Western Pacific pelagic longline (HI deep-set component) fishery from 142 to 145 HSFCA permits;

Category II

- Pacific highly migratory species drift gillnet fishery from 6 to 5 HSFCA permits;
- South Pacific tuna purse seine fishery from 38 to 33 HSFCA permits;
- South Pacific albacore troll longline fishery from 11 to 6 HSFCA permits;
- South Pacific tuna longline fishery from 3 to 2 HSFCA permits;
- Western Pacific pelagic longline (HI shallow-set component) fishery from 13 to 18 HSFCA permits;

- Pacific highly migratory species handline/pole and line fishery from 48 to 41 HSFCA permits;
- South Pacific albacore troll handline/pole and line fishery from 15 to 11 HSFCA permits;
- Western Pacific pelagic handline/pole and line fishery from 6 to 5 HSFCA permits;
- Atlantic highly migratory species troll fishery from 1 to 0 HSFCA permits;
- South Pacific albacore troll fishery from 24 to 17 HSFCA permits;
- South Pacific tuna troll fishery from 3 to 1 HSFCA permits;
- Western Pacific pelagic troll fishery from 6 to 5 HSFCA permits;

Category III

- Northwest Atlantic bottom longline fishery from 2 to 3 HSFCA permits;
- Pacific highly migratory species longline fishery from 128 to 108 HSFCA permits;
- Pacific highly migratory species purse seine fishery from 10 to 5 HSFCA permits;
- Pacific highly migratory species troll fishery from 150 to 119 HSFCA permits.

List of Species and/or Stocks Incidentally Killed or Injured on the High Seas

NMFS proposes to remove the Hawaii stock of sperm whale from the list of species/stocks incidentally killed or injured in the Category I Hawaii deep-set longline fishery. From 2012–2016, there were no observed mortalities or injuries for the Hawaii stock of sperm whale in the Hawaii deep-set longline fishery (Bradford, 2018, Carretta *et al.*, 2018).

NMFS proposes to remove the Hawaii stock of short-finned pilot whale from the list of species/stocks incidentally killed or injured in the Category II HI shallow-set longline fishery. From 2012–2016, there were no observed mortalities or injuries for the Hawaii stock of short-finned pilot whale in the Hawaii shallow-set longline fishery (Bradford, 2018, Carretta *et al.*, 2018).

List of Fisheries

The following tables set forth the list of U.S. commercial fisheries according to their classification under section 118 of the MMPA. Table 1 lists commercial fisheries in the Pacific Ocean (including Alaska), Table 2 lists commercial fisheries in the Atlantic Ocean, Gulf of Mexico, and Caribbean, Table 3 lists commercial fisheries on the high seas, and Table 4 lists fisheries affected by TRPs or TRTs.

In Tables 1 and 2, the estimated number of vessels or persons

participating in fisheries operating within U.S. waters is expressed in terms of the number of active participants in the fishery, when possible. If this information is not available, the estimated number of vessels or persons licensed for a particular fishery is provided. If no recent information is available on the number of participants, vessels, or persons licensed in a fishery, then the number from the most recent LOF is used for the estimated number of vessels or persons in the fishery. NMFS acknowledges that, in some cases, these estimates may be inflations of actual effort. For example, the State of Hawaii does not issue fishery-specific licenses, and the number of participants reported in the LOF represents the number of commercial marine license holders who reported using a particular fishing gear type/method at least once in a given year, without considering how many times the gear was used. For these fisheries, effort by a single participant is counted the same whether the fisherman used the gear only once or every day. In the Mid-Atlantic and New England fisheries, the numbers represent the potential effort for each fishery, given the multiple gear types for which several state permits may allow. Changes made to Mid-Atlantic and New England fishery participants will not affect observer coverage or bycatch estimates, as observer coverage and bycatch estimates are based on vessel trip reports and landings data. Tables 1 and 2 serve to provide a description of the fishery's potential effort (state and Federal). If NMFS is able to extract more accurate information on the gear types used by state permit holders in the future, the numbers will be updated to reflect this change. For additional information on fishing effort in fisheries found on Table 1 or 2, contact the relevant regional office (contact information included above in **SUPPLEMENTARY INFORMATION**).

For high seas fisheries, Table 3 lists the number of valid HSFCA permits currently held. Although this likely overestimates the number of active participants in many of these fisheries, the number of valid HSFCA permits is the most reliable data on the potential effort in high seas fisheries at this time. As noted previously in this LOF, the number of HSFCA permits listed in Table 3 for the high seas components of fisheries that also operate within U.S. waters does not necessarily represent additional effort that is not accounted for in Tables 1 and 2. Many vessels holding HSFCA permits also fish within U.S. waters and are included in the number of vessels and participants

operating within those fisheries in Tables 1 and 2.

Tables 1, 2, and 3 also list the marine mammal species and/or stocks incidentally killed or injured (seriously or non-seriously) in each fishery based on SARs, injury determination reports, bycatch estimation reports, observer data, logbook data, stranding data, disentanglement network data, fishermen self-reports (*i.e.*, MMAP reports), and anecdotal reports. The best available scientific information included in these reports is based on data through 2016. This list includes all species and/or stocks known to be killed or injured in a given fishery, but also includes species and/or stocks for which there are anecdotal records of a mortality or injury. Additionally, species identified by logbook entries, stranding data, or fishermen self-reports (*i.e.*, MMAP reports) may not be verified. In Tables 1 and 2, NMFS has designated those species/stocks driving a fishery's classification (*i.e.*, the fishery is classified based on mortalities and serious injuries of a marine mammal stock that are greater than or equal to 50 percent (Category I), or greater than 1 percent and less than 50 percent (Category II), of a stock's PBR) by a "1" after the stock's name.

In Tables 1 and 2, there are several fisheries classified as Category II that have no recent documented mortalities or serious injuries of marine mammals, or fisheries that did not result in a mortality or serious injury rate greater than 1 percent of a stock's PBR level based on known interactions. NMFS has classified these fisheries by analogy to other Category I or II fisheries that use similar fishing techniques or gear that are known to cause mortality or serious injury of marine mammals, as discussed in the final LOF for 1996 (60 FR 67063; December 28, 1995), and according to factors listed in the definition of a "Category II fishery" in 50 CFR 229.2 (*i.e.*, fishing techniques, gear types, methods used to deter marine mammals, target species, seasons and areas fished, qualitative data from logbooks or fishermen reports, stranding data, and the species and distribution of marine mammals in the area). NMFS has designated those fisheries listed by analogy in Tables 1 and 2 by adding a "2" after the fishery's name.

There are several fisheries in Tables 1, 2, and 3 in which a portion of the fishing vessels cross the exclusive economic zone (EEZ) boundary and therefore operate both within U.S. waters and on the high seas. These fisheries, though listed separately on Table 1 or 2 and Table 3, are considered the same fisheries on either side of the

EEZ boundary. NMFS has designated those fisheries in each table by a “*” after the fishery’s name.

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
Category I		
<i>Longline/Set Line Fisheries:</i> HI deep-set longline* ^	145	Bottlenose dolphin, HI Pelagic; False killer whale, HI Pelagic; ¹ False killer whale, MHI Insular; ¹ False killer whale, NWHI; Humpback whale, Central North Pacific; Kogia spp. (Pygmy or dwarf sperm whale), HI; Pygmy killer whale, HI; Risso’s dolphin, HI; Rough-toothed dolphin, HI; Short-finned pilot whale, HI; Striped dolphin, HI.
Category II		
<i>Gillnet Fisheries:</i> CA thresher shark/swordfish drift gillnet (≥14 in mesh)*	14	Bottlenose dolphin, CA/OR/WA offshore; California sea lion, U.S.; Dall’s porpoise, CA/OR/WA; Gray whale, Eastern North Pacific; Humpback whale, CA/OR/WA; Long-beaked common dolphin, CA; Minke whale, CA/OR/WA; Northern elephant seal, CA breeding; Northern right-whale dolphin, CA/OR/WA; Pacific white-sided dolphin, CA/OR/WA; Risso’s dolphin, CA/OR/WA; Short-beaked common dolphin, CA/OR/WA; Short-finned pilot whale, CA/OR/WA; ¹ Sperm Whale, CA/OR/WA. ¹
CA halibut/white seabass and other species set gillnet (>3.5 in mesh).	37	California sea lion, U.S.; Gray whale, Eastern North Pacific; Harbor seal, CA; Humpback whale, CA/OR/WA; ¹ Long-beaked common dolphin, CA; Northern elephant seal, CA breeding; Sea otter, CA; Short-beaked common dolphin, CA/OR/WA.
CA yellowtail, barracuda, and white seabass drift gillnet (mesh size ≥3.5 in and <14 in) ² .	22	California sea lion, U.S.; Long-beaked common dolphin, CA; Short-beaked common dolphin, CA/OR/WA.
AK Bristol Bay salmon drift gillnet ²	1,862	Beluga whale, Bristol Bay; Gray whale, Eastern North Pacific; Harbor seal, Bering Sea; Northern fur seal, Eastern Pacific; Pacific white-sided dolphin, North Pacific; Spotted seal, AK; Steller sea lion, Western U.S.
AK Bristol Bay salmon set gillnet ²	979	Beluga whale, Bristol Bay; Gray whale, Eastern North Pacific; Harbor seal, Bering Sea; Northern fur seal, Eastern Pacific; Spotted seal, AK.
AK Kodiak salmon set gillnet	188	Harbor porpoise, GOA; ¹ Harbor seal, GOA; Humpback whale, Central North Pacific; Humpback whale, Western North Pacific; Sea otter, Southwest AK; Steller sea lion, Western U.S.
AK Cook Inlet salmon set gillnet	736	Beluga whale, Cook Inlet; Dall’s porpoise, AK; Harbor porpoise, GOA; Harbor seal, GOA; Humpback whale, Central North Pacific; ¹ Sea otter, South central AK; Steller sea lion, Western U.S.
AK Cook Inlet salmon drift gillnet	569	Beluga whale, Cook Inlet; Dall’s porpoise, AK; Harbor porpoise, GOA; ¹ Harbor seal, GOA; Steller sea lion, Western U.S.
AK Peninsula/Aleutian Islands salmon drift gillnet ²	162	Dall’s porpoise, AK; Harbor porpoise, GOA; Harbor seal, GOA; Northern fur seal, Eastern Pacific.
AK Peninsula/Aleutian Islands salmon set gillnet ²	113	Harbor porpoise, Bering Sea; Northern sea otter, Southwest AK; Steller sea lion, Western U.S.
AK Prince William Sound salmon drift gillnet	537	Dall’s porpoise, AK; Harbor porpoise, GOA; ¹ Harbor seal, GOA; Northern fur seal, Eastern Pacific; Pacific white-sided dolphin, North Pacific; Sea otter, South central AK; Steller sea lion, Western U.S. ¹
AK Southeast salmon drift gillnet	474	Dall’s porpoise, AK; Harbor porpoise, Southeast AK; Harbor seal, Southeast AK; Humpback whale, Central North Pacific; ¹ Pacific white-sided dolphin, North Pacific; Steller sea lion, Eastern U.S.
AK Yakutat salmon set gillnet ²	168	Gray whale, Eastern North Pacific; Harbor Porpoise, Southeast AK; Harbor seal, Southeast AK; Humpback whale, Central North Pacific (Southeast AK).
WA Puget Sound Region salmon drift gillnet (includes all inland waters south of US-Canada border and eastward of the Bonilla-Tatoosh line-Treaty Indian fishing is excluded).	154	Dall’s porpoise, CA/OR/WA; Harbor porpoise, inland WA; ¹ Harbor seal, WA inland.
<i>Trawl Fisheries:</i>		

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
AK Bering Sea, Aleutian Islands flatfish trawl	32	Bearded seal, AK; Gray whale, Eastern North Pacific; Harbor porpoise, Bering Sea; Harbor seal, Bering Sea; Humpback whale, Western North Pacific; ¹ Killer whale, AK resident; ¹ Killer whale, GOA, AI, BS transient; ¹ Northern fur seal, Eastern Pacific; Ringed seal, AK; Ribbon seal, AK; Spotted seal, AK; Steller sea lion, Western U.S.; ¹ Walrus, AK.
AK Bering Sea, Aleutian Islands pollock trawl	102	Bearded Seal, AK; Beluga whale, Bristol Bay; Beluga whale, Eastern Bering Sea; Beluga whale, Eastern Chukchi Sea; Harbor seal, AK; Humpback whale, Central North Pacific; Humpback whale, Western North Pacific; Northern fur seal, Eastern Pacific; Ribbon seal, AK; Ringed seal, AK; Spotted seal, AK; Steller sea lion, Western U.S. ¹
AK Bering Sea, Aleutian Islands rockfish trawl	17	Killer whale, ENP AK resident; ¹ Killer whale, GOA, AI, BS transient; ¹ Ribbon seal, AK.
<i>Pot, Ring Net, and Trap Fisheries:</i>		
CA coonstripe shrimp pot	14	Gray whale, Eastern North Pacific; Harbor seal, CA; Humpback whale, CA/OR/WA.
CA spiny lobster	186	Bottlenose dolphin, CA/OR/WA offshore; Humpback whale, CA/OR/WA; ¹ Gray whale, Eastern North Pacific; Southern sea otter.
CA spot prawn pot	23	Gray whale, Eastern North Pacific; Humpback whale, CA/OR/WA; ¹ Long-beaked common dolphin, CA.
CA Dungeness crab pot	501	Blue whale, Eastern North Pacific; ¹ Gray whale, Eastern North Pacific; Humpback whale, CA/OR/WA. ¹
OR Dungeness crab pot	342	Gray whale, Eastern North Pacific; Humpback whale, CA/OR/WA. ¹
WA/OR/CA sablefish pot	155	Humpback whale, CA/OR/WA. ¹
WA coastal Dungeness crab pot	197	Gray whale, Eastern North Pacific; Humpback whale, CA/OR/WA. ¹
<i>Longline/Set Line Fisheries:</i>		
AK Bering Sea, Aleutian Islands Pacific cod longline	45	Killer whale, Eastern North Pacific AK resident; Killer whale, GOA, BSAI transient; ¹ Northern fur seal, Eastern Pacific; Ringed seal, AK; Spotted seal, AK; Steller sea lion, Western U.S.
AK Gulf of Alaska sablefish longline	295	Sperm whale, North Pacific; Steller sea lion, Eastern U.S.; Steller sea lion, Western U.S.
HI shallow-set longline * ^	18	Blainville's beaked whale, HI; Bottlenose dolphin, HI Pelagic; False killer whale, HI Pelagic; ¹ Humpback whale, Central North Pacific; Risso's dolphin, HI; Rough-toothed dolphin, HI; Striped dolphin, HI.
American Samoa longline ²	15	False killer whale, American Samoa; Rough-toothed dolphin, American Samoa; Short-finned pilot whale, unknown.
HI shortline ²	9	None documented.
Category III		
<i>Gillnet Fisheries:</i>		
AK Kuskokwim, Yukon, Norton Sound, Kotzebue salmon gillnet.	1,778	Harbor porpoise, Bering Sea.
AK Prince William Sound salmon set gillnet	29	Harbor seal, GOA; Humpback whale, Central North Pacific; Sea otter, South central AK; Steller sea lion, Western U.S.
AK roe herring and food/bait herring gillnet	920	None documented.
CA set gillnet (mesh size <3.5 in)	296	None documented.
HI inshore gillnet	36	Bottlenose dolphin, HI; Spinner dolphin, HI.
WA Grays Harbor salmon drift gillnet (excluding treaty Tribal fishing).	24	Harbor seal, OR/WA coast.
WA/OR Mainstem Columbia River eulachon gillnet	15	None documented.
WA/OR lower Columbia River (includes tributaries) drift gillnet.	110	California sea lion, U.S.; Harbor seal, OR/WA coast.
WA Willapa Bay drift gillnet	82	Harbor seal, OR/WA coast; Northern elephant seal, CA breeding.
<i>Miscellaneous Net Fisheries:</i>		
AK Cook Inlet salmon purse seine	83	Humpback whale, Central North Pacific.
AK Kodiak salmon purse seine	376	Dall's porpoise, AK; Humpback whale, Central North Pacific; Humpback whale, Western North Pacific.
AK Southeast salmon purse seine	315	Humpback whale, Central North Pacific.
AK roe herring and food/bait herring beach seine	10	None documented.

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
AK roe herring and food/bait herring purse seine	356	None documented.
AK salmon beach seine	31	None documented.
AK salmon purse seine (Prince William Sound, Chignik, Alaska Peninsula).	936	Harbor seal, GOA; Harbor seal, Prince William Sound.
WA/OR sardine purse seine	42	None documented.
CA anchovy, mackerel, sardine purse seine	65	California sea lion, U.S.; Harbor seal, CA.
CA squid purse seine	80	Long-beaked common dolphin, CA Short-beaked common dolphin, CA/OR/WA.
CA tuna purse seine *	10	None documented.
WA/OR Lower Columbia River salmon seine	10	None documented.
WA/OR herring, smelt, squid purse seine or lampara	130	None documented.
WA salmon purse seine	75	None documented.
WA salmon reef net	11	None documented.
HI lift net	17	None documented.
HI inshore purse seine	<3	None documented.
HI throw net, cast net	23	None documented.
HI seine net	24	None documented.
<i>Dip Net Fisheries:</i>		
CA squid dip net	115	None documented.
<i>Marine Aquaculture Fisheries:</i>		
CA marine shellfish aquaculture	unknown	None documented.
CA salmon enhancement rearing pen	>1	None documented.
CA white seabass enhancement net pens	13	California sea lion, U.S.
HI offshore pen culture	2	None documented.
WA salmon net pens	14	California sea lion, U.S.; Harbor seal, WA inland waters.
WA/OR shellfish aquaculture	23	None documented.
<i>Troll Fisheries:</i>		
WA/OR/CA albacore surface hook and line/troll	705	None documented.
CA halibut hook and line/handline	unknown	None documented.
CA white seabass hook and line/handline	unknown	None documented.
AK Bering Sea, Aleutian Islands groundfish hand troll and dinglebar troll.	unknown	None documented.
AK Gulf of Alaska groundfish hand troll and dinglebar troll.	unknown	None documented.
AK salmon troll	1,908	Steller sea lion, Eastern U.S.; Steller sea lion, Western U.S.
American Samoa tuna troll	13	None documented.
CA/OR/WA salmon troll	4,300	None documented.
HI troll	2,117	Pantropical spotted dolphin, HI.
HI rod and reel	322	None documented.
Commonwealth of the Northern Mariana Islands tuna troll.	40	None documented.
Guam tuna troll	432	None documented.
<i>Longline/Set Line Fisheries:</i>		
AK Bering Sea, Aleutian Islands Greenland turbot longline.	4	Killer whale, AK resident.
AK Bering Sea, Aleutian Islands sablefish longline	22	None documented.
AK Bering Sea, Aleutian Islands halibut longline	127	Northern fur seal, Eastern Pacific; Sperm whale, North Pacific.
AK Gulf of Alaska halibut longline	855	Steller sea lion, Eastern U.S.
AK Gulf of Alaska Pacific cod longline	92	Steller sea lion, Western U.S.
AK octopus/squid longline	3	None documented.
AK state-managed waters longline/setline (including sablefish, rockfish, lingcod, and miscellaneous finfish).	464	None documented.
WA/OR/CA groundfish, bottomfish longline/set line	367	Bottlenose dolphin, CA/OR/WA offshore; California sea lion, U.S.; Northern elephant seal, California breeding; Sperm whale, CA/OR/WA; Steller sea lion, Eastern U.S.
WA/OR Pacific halibut longline	350	None documented.
CA pelagic longline	1	None documented in the most recent five years of data.
HI kaka line	15	None documented.
HI vertical line	3	None documented.
<i>Trawl Fisheries:</i>		
AK Bering Sea, Aleutian Islands Atka mackerel trawl	13	Bearded seal, AK; Steller sea lion, Western U.S.
AK Bering Sea, Aleutian Islands Pacific cod trawl	72	Bearded seal, AK; Ribbon seal, AK; Ringed seal, AK; Steller sea lion, Western U.S.
AK Gulf of Alaska flatfish trawl	36	Harbor seal, AK; Northern elephant seal, North Pacific; Steller sea lion, Western U.S.
AK Gulf of Alaska Pacific cod trawl	55	Harbor seal, AK; Steller sea lion, Western U.S.
AK Gulf of Alaska pollock trawl	67	Dall's porpoise, AK; Fin whale, Northeast Pacific; Northern elephant seal, North Pacific; Steller sea lion, Western U.S.
AK Gulf of Alaska rockfish trawl	43	Steller sea lion, Western U.S.

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
AK Kodiak food/bait herring otter trawl	4	None documented.
AK shrimp otter trawl and beam trawl	38	None documented.
AK state-managed waters of Prince William Sound groundfish trawl.	2	None documented.
CA halibut bottom trawl	47	California sea lion, U.S.; Harbor porpoise, unknown; Harbor seal, unknown; Northern elephant seal, CA breeding; Steller sea lion, unknown.
CA sea cucumber trawl	16	None documented.
WA/OR/CA shrimp trawl	300	None documented.
WA/OR/CA groundfish trawl	160–180	California sea lion, U.S.; Dall's porpoise, CA/OR/WA; Harbor seal, OR/WA coast; Northern fur seal, Eastern Pacific; Pacific white-sided dolphin, CA/OR/WA; Steller sea lion, Eastern U.S.
<i>Pot, Ring Net, and Trap Fisheries:</i>		
AK Bering Sea, Aleutian Islands sablefish pot	6	None documented.
AK Bering Sea, Aleutian Islands Pacific cod pot	59	None documented.
AK Bering Sea, Aleutian Islands crab pot	540	Bowhead whale, Western Arctic; Gray whale, Eastern North Pacific.
AK Gulf of Alaska crab pot	271	None documented.
AK Gulf of Alaska Pacific cod pot	116	Harbor seal, GOA.
AK Gulf of Alaska sablefish pot	248	None documented.
AK Southeast Alaska crab pot	375	Humpback whale, Central North Pacific (Southeast AK).
AK Southeast Alaska shrimp pot	99	Humpback whale, Central North Pacific (Southeast AK).
AK shrimp pot, except Southeast	141	None documented.
AK octopus/squid pot	15	None documented.
CA rock crab pot	124	Gray whale, Eastern North Pacific; Harbor seal, CA.
WA/OR/CA hagfish pot	54	None documented.
WA/OR shrimp pot/trap	254	None documented.
WA Puget Sound Dungeness crab pot/trap	249	None documented.
HI crab trap	5	Humpback whale, Central North Pacific.
HI fish trap	9	None documented.
HI lobster trap	<3	None documented in recent years.
HI shrimp trap	10	None documented.
HI crab net	4	None documented.
HI Kona crab loop net	33	None documented.
<i>Hook-and-Line, Handline, and Jig Fisheries:</i>		
AK Bering Sea, Aleutian Islands groundfish jig	2	None documented.
AK Gulf of Alaska groundfish jig	214	Fin whale, Northeast Pacific.
AK halibut jig	71	None documented.
American Samoa bottomfish	2095	None documented.
Commonwealth of the Northern Mariana Islands bottomfish.	28	None documented.
Guam bottomfish	>300	None documented.
HI aku boat, pole, and line	<3	None documented.
HI bottomfish handline	578	None documented in recent years.
HI inshore handline	357	None documented.
HI pelagic handline	534	None documented.
WA groundfish, bottomfish jig	679	None documented.
Western Pacific squid jig	0	None documented.
<i>Harpoon Fisheries:</i>		
CA swordfish harpoon	6	None documented.
<i>Pound Net/Weir Fisheries:</i>		
AK herring spawn on kelp pound net	291	None documented.
AK Southeast herring roe/food/bait pound net	2	None documented.
HI bullpen trap	3	None documented.
<i>Bait Pens:</i>		
WA/OR/CA bait pens	13	California sea lion, U.S.
<i>Dredge Fisheries:</i>		
AK scallop dredge	108 (5 AK)	None documented.
<i>Dive, Hand/Mechanical Collection Fisheries:</i>		
AK clam	130	None documented.
AK Dungeness crab	2	None documented.
AK herring spawn on kelp	266	None documented.
AK miscellaneous invertebrates handpick	214	None documented.
HI black coral diving	<3	None documented.
HI fish pond	5	None documented.
HI handpick	46	None documented.
HI lobster diving	19	None documented.
HI spearfishing	163	None documented.
WA/CA kelp	4	None documented.

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
WA/OR bait shrimp, clam hand, dive, or mechanical collection.	201	None documented.
OR/CA sea urchin, sea cucumber hand, dive, or mechanical collection.	10	None documented.
<i>Commercial Passenger Fishing Vessel (Charter Boat) Fisheries:</i>		
AK/WA/OR/CA commercial passenger fishing vessel	>7,000 (1,006 AK)	Killer whale, unknown; Steller sea lion, Eastern U.S.; Steller sea lion, Western U.S.
<i>Live Finfish/Shellfish Fisheries:</i>		
CA nearshore finfish live trap/hook-and-line	93	None documented.
HI aquarium collecting	90	None documented.

List of Abbreviations and Symbols Used in Table 1: AI—Aleutian Islands; AK—Alaska; BS—Bering Sea; CA—California; ENP—Eastern North Pacific; GOA—Gulf of Alaska; HI—Hawaii; MHI—Main Hawaiian Islands; OR—Oregon; WA—Washington; ¹ Fishery classified based on mortalities and serious injuries of this stock, which are greater than or equal to 50 percent (Category I) or greater than 1 percent and less than 50 percent (Category II) of the stock's PBR; ² Fishery classified by analogy; * Fishery has an associated high seas component listed in Table 3; ^ The list of marine mammal species and/or stocks killed or injured in this fishery is identical to the list of species and/or stocks killed or injured in high seas component of the fishery, minus species and/or stocks that have geographic ranges exclusively on the high seas. The species and/or stocks are found, and the fishery remains the same, on both sides of the EEZ boundary. Therefore, the EEZ components of these fisheries pose the same risk to marine mammals as the components operating on the high seas.

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
Category I		
<i>Gillnet Fisheries:</i>		
Mid-Atlantic gillnet	3,950	Bottlenose dolphin, Northern Migratory coastal; Bottlenose dolphin, Southern Migratory coastal; ¹ Bottlenose dolphin, Northern NC estuarine system; ¹ Bottlenose dolphin, Southern NC estuarine system; ¹ Bottlenose dolphin, WNA offshore; Common dolphin, WNA; Gray seal, WNA; Harbor porpoise, GME/BF; Harbor seal, WNA; Hooded seal, WNA; Humpback whale, Gulf of Maine; Minke whale, Canadian east coast.
Northeast sink gillnet	3,163	Bottlenose dolphin, WNA offshore; Common dolphin, WNA; Fin whale, WNA; Gray seal, WNA; ¹ Harbor porpoise, GME/BF; Harbor seal, WNA; Harp seal, WNA; Humpback whale, Gulf of Maine; Minke whale, Canadian east coast; North Atlantic right whale, WNA; Risso's dolphin, WNA; White-sided dolphin, WNA.
<i>Trap/Pot Fisheries:</i>		
Northeast/Mid-Atlantic American lobster trap/pot	8,485	Humpback whale, Gulf of Maine; Minke whale, Canadian east coast; North Atlantic right whale, WNA. ¹
<i>Longline Fisheries:</i>		
Atlantic Ocean, Caribbean, Gulf of Mexico large pelagics longline *.	201	Atlantic spotted dolphin, Northern GMX; Bottlenose dolphin, Northern GMX oceanic; Bottlenose dolphin, WNA offshore; Common dolphin, WNA; Cuvier's beaked whale, WNA; False killer whale, WNA; Harbor porpoise, GME, BF; Kogia spp. (Pygmy or dwarf sperm whale), WNA; Long-finned pilot whale, WNA; Mesoplodon beaked whale, WNA; Minke whale, Canadian East coast; Pantropical spotted dolphin, Northern GMX; Pygmy sperm whale, GMX; Risso's dolphin, Northern GMX; Risso's dolphin, WNA; Rough-toothed dolphin, Northern GMX; Short-finned pilot whale, Northern GMX; Short-finned pilot whale, WNA; ¹ Sperm whale, Northern GMX.
Category II		
<i>Gillnet Fisheries:</i>		
Chesapeake Bay inshore gillnet ²	248	Bottlenose dolphin, unknown (Northern migratory coastal or Southern migratory coastal).
Gulf of Mexico gillnet ²	248	Bottlenose dolphin, Eastern GMX coastal; Bottlenose dolphin, GMX bay, sound, and estuarine; Bottlenose dolphin, Northern GMX coastal; Bottlenose dolphin, Western GMX coastal.
NC inshore gillnet	2,676	Bottlenose dolphin, Northern NC estuarine system; ¹ Bottlenose dolphin, Southern NC estuarine system. ¹

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
Northeast anchored float gillnet ²	852	Harbor seal, WNA; Humpback whale, Gulf of Maine; White-sided dolphin, WNA.
Northeast drift gillnet ²	1,036	None documented.
Southeast Atlantic gillnet ²	273	Bottlenose dolphin, Central FL coastal; Bottlenose dolphin, Northern FL coastal; Bottlenose dolphin, SC/GA coastal; Bottlenose dolphin, Southern migratory coastal.
Southeastern U.S. Atlantic shark gillnet	21	Bottlenose dolphin, unknown (Central FL, Northern FL, SC/GA coastal, or Southern migratory coastal); North Atlantic right whale, WNA.
<i>Trawl Fisheries</i>		
Mid-Atlantic mid-water trawl (including pair trawl)	320	Harbor seal, WNA.
Mid-Atlantic bottom trawl	633	Bottlenose dolphin, WNA offshore; ¹ Common dolphin, WNA; ¹ Gray seal, WNA; ¹ Harbor seal, WNA; Risso's dolphin, WNA; ¹ White-sided dolphin, WNA.
Northeast mid-water trawl (including pair trawl)	542	Common dolphin, WNA; Gray seal, WNA; Harbor seal, WNA; Long-finned pilot whale, WNA. ¹
Northeast bottom trawl	2,238	Bottlenose dolphin, WNA offshore; Common dolphin, WNA; Gray seal, WNA; Harbor porpoise, GME/BF; Harbor seal, WNA; Harp seal, WNA; Long-finned pilot whale, WNA; Risso's dolphin, WNA; White-sided dolphin, WNA. ¹
Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl	4,950	Atlantic spotted dolphin, Northern Gulf of Mexico; Bottlenose dolphin, Charleston estuarine system; Bottlenose dolphin, Eastern GMX coastal; ¹ Bottlenose dolphin, GMX bay, sound, estuarine; ¹ Bottlenose dolphin, GMX continental shelf; Bottlenose dolphin, Mississippi River Delta; Bottlenose dolphin, Mobile Bay, Bonsecour Bay; Bottlenose dolphin, Northern GMX coastal; ¹ Bottlenose dolphin, SC/GA coastal; ¹ Bottlenose dolphin, Southern migratory coastal; Bottlenose dolphin, Western GMX coastal. ¹
<i>Trap/Pot Fisheries:</i>		
Southeastern U.S. Atlantic, Gulf of Mexico stone crab trap/pot ² .	1,101	Bottlenose dolphin, Biscayne Bay estuarine; Bottlenose dolphin, Central FL coastal; Bottlenose dolphin, Eastern GMX coastal; Bottlenose dolphin, FL Bay; Bottlenose dolphin, GMX bay, sound, estuarine (FL west coast portion); Bottlenose dolphin, Indian River Lagoon estuarine system; Bottlenose dolphin, Jacksonville estuarine system; Bottlenose dolphin, Northern GMX coastal; Bottlenose dolphin, Sarasota Bay, Little Sarasota Bay.
Atlantic mixed species trap/pot ²	3,332	Fin whale, WNA; Humpback whale, Gulf of Maine.
Atlantic blue crab trap/pot	6,679	Bottlenose dolphin, Central FL coastal; Bottlenose dolphin, Central GA estuarine system; ¹ Bottlenose dolphin, Charleston estuarine system; ¹ Bottlenose dolphin, Indian River Lagoon estuarine system; Bottlenose dolphin, Jacksonville estuarine system; Bottlenose dolphin, Northern FL coastal; ¹ Bottlenose dolphin, Northern GA/Southern SC estuarine system; Bottlenose dolphin, Northern Migratory coastal; Bottlenose dolphin, Northern NC estuarine system; ¹ Bottlenose dolphin, Northern SC estuarine system; Bottlenose dolphin, SC/GA coastal; Bottlenose dolphin, Southern GA estuarine system; Bottlenose dolphin, Southern Migratory coastal; ¹ Bottlenose dolphin, Southern NC estuarine system; West Indian manatee, FL.
<i>Purse Seine Fisheries:</i>		
Gulf of Mexico menhaden purse seine	40–42	Bottlenose dolphin, GMX bay, sound, estuarine; Bottlenose dolphin, Mississippi River Delta; Bottlenose dolphin, Mississippi Sound, Lake Borgne, Bay Boudreau; Bottlenose dolphin, Northern GMX coastal; ¹ Bottlenose dolphin, Western GMX coastal. ¹
Mid-Atlantic menhaden purse seine ²	19	Bottlenose dolphin, Northern Migratory coastal; Bottlenose dolphin, Southern Migratory coastal.
<i>Haul/Beach Seine Fisheries:</i>		
Mid-Atlantic haul/beach seine	359	Bottlenose dolphin, Northern Migratory coastal; ¹ Bottlenose dolphin, Northern NC estuarine system; ¹ Bottlenose dolphin, Southern Migratory coastal. ¹
NC long haul seine	22	Bottlenose dolphin, Northern NC estuarine system; ¹ Bottlenose dolphin, Southern NC estuarine system.
<i>Stop Net Fisheries:</i>		

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
NC roe mullet stop net	1	Bottlenose dolphin, Northern NC estuarine system; Bottlenose dolphin, unknown (Southern migratory coastal or Southern NC estuarine system).
<i>Pound Net Fisheries:</i>		
VA pound net	26	Bottlenose dolphin, Northern migratory coastal; Bottlenose dolphin, Northern NC estuarine system; Bottlenose dolphin, Southern Migratory coastal. ¹
Category III		
<i>Gillnet Fisheries:</i>		
Caribbean gillnet	>991	None documented in the most recent five years of data.
DE River inshore gillnet	unknown	None documented in the most recent five years of data.
Long Island Sound inshore gillnet	unknown	None documented in the most recent five years of data.
RI, southern MA (to Monomoy Island), and NY Bight (Raritan and Lower NY Bays) inshore gillnet.	unknown	None documented in the most recent five years of data.
Southeast Atlantic inshore gillnet	unknown	Bottlenose dolphin, Northern SC estuarine system.
<i>Trawl Fisheries:</i>		
Atlantic shellfish bottom trawl	>58	None documented.
Gulf of Mexico butterfish trawl	2	Bottlenose dolphin, Northern GMX oceanic; Bottlenose dolphin, Northern GMX continental shelf.
Gulf of Mexico mixed species trawl	20	None documented.
GA cannonball jellyfish trawl	1	Bottlenose dolphin, SC/GA coastal.
<i>Marine Aquaculture Fisheries:</i>		
Finfish aquaculture	48	Harbor seal, WNA.
Shellfish aquaculture	unknown	None documented.
<i>Purse Seine Fisheries:</i>		
Gulf of Maine Atlantic herring purse seine	>7	Harbor seal, WNA.
Gulf of Maine menhaden purse seine	>2	None documented.
FL West Coast sardine purse seine	10	Bottlenose dolphin, Eastern GMX coastal.
U.S. Atlantic tuna purse seine *	5	None documented in most recent five years of data.
<i>Longline/Hook-and-Line Fisheries:</i>		
Northeast/Mid-Atlantic bottom longline/hook-and-line	>1,207	None documented.
Gulf of Maine, U.S. Mid-Atlantic tuna, shark, swordfish hook-and-line/harpoon.	2,846	Bottlenose dolphin, WNA offshore; Humpback whale, Gulf of Maine.
Southeastern U.S. Atlantic, Gulf of Mexico, and Caribbean snapper-grouper and other reef fish bottom longline/hook-and-line.	>5,000	Bottlenose dolphin, GMX continental shelf.
Southeastern U.S. Atlantic, Gulf of Mexico shark bottom longline/hook-and-line.	39	Bottlenose dolphin, Eastern GMX coastal; Bottlenose dolphin, Northern GMX continental shelf.
Southeastern U.S. Atlantic, Gulf of Mexico, and Caribbean pelagic hook-and-line/harpoon.	680	None documented.
U.S. Atlantic, Gulf of Mexico trotline	unknown	None documented.
<i>Trap/Pot Fisheries:</i>		
Caribbean mixed species trap/pot	>501	None documented.
Caribbean spiny lobster trap/pot	>197	None documented.
FL spiny lobster trap/pot	1,268	Bottlenose dolphin, Biscayne Bay estuarine Bottlenose dolphin, Central FL coastal; Bottlenose dolphin, Eastern GMX coastal; Bottlenose dolphin, FL Bay estuarine; Bottlenose dolphin, FL Keys.
Gulf of Mexico blue crab trap/pot	4,113	Bottlenose dolphin, Barataria Bay; Bottlenose dolphin, Eastern GMX coastal; Bottlenose dolphin, GMX bay, sound, estuarine; Bottlenose dolphin, Mississippi Sound, Lake Borgne, Bay Boudreau; Bottlenose dolphin, Mobile Bay, Bonsecour Bay; Bottlenose dolphin, Northern GMX coastal; Bottlenose dolphin, Western GMX coastal; West Indian manatee, FL.
Gulf of Mexico mixed species trap/pot	unknown	None documented.
Southeastern U.S. Atlantic, Gulf of Mexico golden crab trap/pot.	10	None documented.
U.S. Mid-Atlantic eel trap/pot	unknown	None documented.
<i>Stop Seine/Weir/Pound Net/Floating Trap/Fyke Net Fisheries:</i>		
Gulf of Maine herring and Atlantic mackerel stop seine/weir.	>1	Harbor porpoise, GME/BF; Harbor seal, WNA; Minke whale, Canadian east coast; Atlantic white-sided dolphin, WNA.
U.S. Mid-Atlantic crab stop seine/weir	2,600	None documented.
U.S. Mid-Atlantic mixed species stop seine/weir/pound net (except the NC roe mullet stop net).	unknown	Bottlenose dolphin, Northern NC estuarine system.
RI floating trap	9	None documented.
Northeast and Mid-Atlantic fyke net	unknown	None documented.

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
<i>Dredge Fisheries:</i>		
Gulf of Maine sea urchin dredge	unknown	None documented.
Gulf of Maine mussel dredge	unknown	None documented.
Gulf of Maine, U.S. Mid-Atlantic sea scallop dredge	>403	None documented.
Mid-Atlantic blue crab dredge	unknown	None documented.
Mid-Atlantic soft-shell clam dredge	unknown	None documented.
Mid-Atlantic whelk dredge	unknown	None documented.
U.S. Mid-Atlantic/Gulf of Mexico oyster dredge	7,000	None documented.
New England and Mid-Atlantic offshore surf clam/quahog dredge.	unknown	None documented.
<i>Haul/Beach Seine Fisheries:</i>		
Caribbean haul/beach seine	15	None documented in the most recent five years of data.
Gulf of Mexico haul/beach seine	unknown	None documented.
Southeastern U.S. Atlantic haul/beach seine	25	None documented.
<i>Dive, Hand/Mechanical Collection Fisheries:</i>		
Atlantic Ocean, Gulf of Mexico, Caribbean shellfish dive, hand/mechanical collection.	20,000	None documented.
Gulf of Maine urchin dive, hand/mechanical collection ..	unknown	None documented.
Gulf of Mexico, Southeast Atlantic, Mid-Atlantic, and Caribbean cast net.	unknown	None documented.
<i>Commercial Passenger Fishing Vessel (Charter Boat) Fisheries:</i>		
Atlantic Ocean, Gulf of Mexico, Caribbean commercial passenger fishing vessel.	4,000	Bottlenose dolphin, Barataria Bay estuarine system; Bottlenose dolphin, Biscayne Bay estuarine; Bottlenose dolphin, Central FL coastal; Bottlenose dolphin, Choctawhatchee Bay; Bottlenose dolphin, Eastern GMX coastal; Bottlenose dolphin, FL Bay; Bottlenose dolphin, GMX bay, sound, estuarine; Bottlenose dolphin, Indian River Lagoon estuarine system; Bottlenose dolphin, Jacksonville estuarine system; Bottlenose dolphin, Mississippi Sound, Lake Borgne, Bay Boudreau; Bottlenose dolphin, Northern FL coastal; Bottlenose dolphin, Northern GA/Southern SC estuarine; Bottlenose dolphin, Northern GMX coastal; Bottlenose dolphin, Northern migratory coastal; Bottlenose dolphin, Northern NC estuarine; Bottlenose dolphin, Southern migratory coastal; Bottlenose dolphin, Southern NC estuarine system; Bottlenose dolphin, SC/GA coastal; Bottlenose dolphin, Western GMX coastal; Short-finned pilot whale, WNA.

List of Abbreviations and Symbols Used in Table 2: DE—Delaware; FL—Florida; GA—Georgia; GME/BF—Gulf of Maine/Bay of Fundy; GMX—Gulf of Mexico; MA—Massachusetts; NC—North Carolina; NY—New York; RI—Rhode Island; SC—South Carolina; VA—Virginia; WNA—Western North Atlantic; ¹ Fishery classified based on mortalities and serious injuries of this stock, which are greater than or equal to 50 percent (Category I) or greater than 1 percent and less than 50 percent (Category II) of the stock's PBR; ² Fishery classified by analogy; * Fishery has an associated high seas component listed in Table 3.

TABLE 3—LIST OF FISHERIES—COMMERCIAL FISHERIES ON THE HIGH SEA

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
Category I		
<i>Longline Fisheries:</i>		
Atlantic Highly Migratory Species *	53	Atlantic spotted dolphin, WNA; Bottlenose dolphin, Northern GMX oceanic; Bottlenose dolphin, WNA offshore; Common dolphin, WNA; Cuvier's beaked whale, WNA; False killer whale, WNA; Killer whale, GMX oceanic; Kogia spp. (Pygmy or dwarf sperm whale), WNA; Long-finned pilot whale, WNA; Mesoplodon beaked whale, WNA; Minke whale, Canadian East coast; Pantropical spotted dolphin, WNA; Risso's dolphin, GMX; Risso's dolphin, WNA; Short-finned pilot whale, WNA.
Western Pacific Pelagic (HI Deep-set component) * ^	145	Bottlenose dolphin, HI Pelagic; False killer whale, HI Pelagic; Humpback whale, Central North Pacific; Kogia spp. (Pygmy or dwarf sperm whale), HI; Pygmy killer whale, HI; Risso's dolphin, HI; Short-finned pilot whale, HI; Striped dolphin, HI.

TABLE 3—LIST OF FISHERIES—COMMERCIAL FISHERIES ON THE HIGH SEA—Continued

Fishery description	Estimated number of vessels/persons	Marine mammal species and/or stocks incidentally killed or injured
Category II		
<i>Drift Gillnet Fisheries:</i>		
Pacific Highly Migratory Species * ^	5	Long-beaked common dolphin, CA; Humpback whale, CA/OR/WA; Northern right-whale dolphin, CA/OR/WA; Pacific white-sided dolphin, CA/OR/WA; Risso's dolphin, CA/OR/WA; Short-beaked common dolphin, CA/OR/WA.
<i>Trawl Fisheries:</i>		
Atlantic Highly Migratory Species **	1	No information.
CCAMLR	0	Antarctic fur seal.
<i>Purse Seine Fisheries:</i>		
South Pacific Tuna Fisheries	33	No information
Western Pacific Pelagic	1	No information.
<i>Longline Fisheries:</i>		
CCAMLR	0	None documented.
South Pacific Albacore Troll	6	No information.
South Pacific Tuna Fisheries **	2	No information.
Western Pacific Pelagic (HI Shallow-set component) * ^	18	Blainville's beaked whale, HI; Bottlenose dolphin, HI Pelagic; False killer whale, HI Pelagic; Fin whale, HI; Guadalupe fur seal; Humpback whale, Central North Pacific; Mesopodion sp., unknown; Northern elephant seal, CA breeding; Risso's dolphin, HI; Rough-toothed dolphin, HI; Short-beaked common dolphin, CA/OR/WA; Striped dolphin, HI.
<i>Handline/Pole and Line Fisheries:</i>		
Atlantic Highly Migratory Species	2	No information.
Pacific Highly Migratory Species	41	No information.
South Pacific Albacore Troll	11	No information.
Western Pacific Pelagic	5	No information.
<i>Troll Fisheries:</i>		
Atlantic Highly Migratory Species	0	No information.
South Pacific Albacore Troll	17	No information.
South Pacific Tuna Fisheries **	1	No information.
Western Pacific Pelagic	5	No information.
Category III		
<i>Longline Fisheries:</i>		
Northwest Atlantic Bottom Longline	3	None documented.
Pacific Highly Migratory Species	108	None documented in the most recent 5 years of data.
<i>Purse Seine Fisheries:</i>		
Pacific Highly Migratory Species * ^	5	None documented.
<i>Trawl Fisheries:</i>		
Northwest Atlantic	4	None documented.
<i>Troll Fisheries:</i>		
Pacific Highly Migratory Species *	119	None documented

List of Terms, Abbreviations, and Symbols Used in Table 3: CA—California; GMX—Gulf of Mexico; HI—Hawaii; OR—Oregon; WA—Washington; WNA—Western North Atlantic.

* Fishery is an extension/component of an existing fishery operating within U.S. waters listed in Table 1 or 2. The number of permits listed in Table 3 represents only the number of permits for the high seas component of the fishery.

** These gear types are not authorized under the Pacific HMS FMP (2004), the Atlantic HMS FMP (2006), or without a South Pacific Tuna Treaty license (in the case of the South Pacific Tuna fisheries). Because HSFCA permits are valid for 5 years, permits obtained in past years exist in the HSFCA permit database for gear types that are now unauthorized. Therefore, while HSFCA permits exist for these gear types, it does not represent effort. In order to land fish species, fishers must be using an authorized gear type. Once these permits for unauthorized gear types expire, the permit-holder will be required to obtain a permit for an authorized gear type.

^ The list of marine mammal species and/or stocks killed or injured in this fishery is identical to the list of marine mammal species and/or stocks killed or injured in U.S. waters component of the fishery, minus species and/or stocks that have geographic ranges exclusively in coastal waters, because the marine mammal species and/or stocks are also found on the high seas and the fishery remains the same on both sides of the EEZ boundary. Therefore, the high seas components of these fisheries pose the same risk to marine mammals as the components of these fisheries operating in U.S. waters.

TABLE 4—FISHERIES AFFECTED BY TAKE REDUCTION TEAMS AND PLANS

Take reduction plans	Affected fisheries
Atlantic Large Whale Take Reduction Plan (ALWTRP)—50 CFR 229.32	<p><i>Category I:</i> Mid-Atlantic gillnet; Northeast/Mid-Atlantic American lobster trap/pot; Northeast sink gillnet.</p> <p><i>Category II:</i> Atlantic blue crab trap/pot; Atlantic mixed species trap/pot; Northeast anchored float gillnet; Northeast drift gillnet; Southeast Atlantic gillnet; Southeastern U.S. Atlantic shark gillnet; * Southeastern, U.S. Atlantic, Gulf of Mexico stone crab trap/pot. ^</p>
Bottlenose Dolphin Take Reduction Plan (BDTRP)—50 CFR 229.35	<p><i>Category I:</i> Mid-Atlantic gillnet.</p> <p><i>Category II:</i> Atlantic blue crab trap/pot; Chesapeake Bay inshore gillnet fishery; Mid-Atlantic haul/beach seine; Mid-Atlantic menhaden purse seine; NC inshore gillnet; NC long haul seine; NC roe mullet stop net; Southeast Atlantic gillnet; Southeastern U.S. Atlantic shark gillnet; Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl; ^ Southeastern, U.S. Atlantic, Gulf of Mexico stone crab trap/pot; ^ VA pound net.</p>
False Killer Whale Take Reduction Plan (FKWTRP)—50 CFR 229.37 ..	<p><i>Category I:</i> HI deep-set longline.</p> <p><i>Category II:</i> HI shallow-set longline.</p>
Harbor Porpoise Take Reduction Plan (HPTRP)—50 CFR 229.33 (New England) and 229.34 (Mid-Atlantic).	<i>Category I:</i> Mid-Atlantic gillnet; Northeast sink gillnet.
Pelagic Longline Take Reduction Plan (PLTRP)—50 CFR 229.36	<i>Category I:</i> Atlantic Ocean, Caribbean, Gulf of Mexico large pelagics longline.
Pacific Offshore Cetacean Take Reduction Plan (POCTRP)—50 CFR 229.31.	<i>Category II:</i> CA thresher shark/swordfish drift gillnet (≥14 in mesh).
Atlantic Trawl Gear Take Reduction Team (ATGTRT)	<i>Category II:</i> Mid-Atlantic bottom trawl; Mid-Atlantic mid-water trawl (including pair trawl); Northeast bottom trawl; Northeast mid-water trawl (including pair trawl).

* Only applicable to the portion of the fishery operating in U.S. waters; ^ Only applicable to the portion of the fishery operating in the Atlantic Ocean.

Classification

The Chief Counsel for Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) that this proposed rule would not have a significant economic impact on a substantial number of small entities. Any entity with combined annual fishery landing receipts less than \$11 million is considered a small entity for purposes of the Regulatory Flexibility Act. Under the former, lower size standards, all entities subject to this action were considered small entities; thus, they all would continue to be considered small under the new standards.

Under existing regulations, all individuals participating in Category I or II fisheries must register under the MMPA and obtain an authorization certificate. The authorization certificate authorizes the taking of non-endangered and non-threatened marine mammals incidental to commercial fishing operations. Additionally, individuals may be subject to a TRP and requested to carry an observer. NMFS has estimated that up to approximately 49,804 fishing vessels, most with annual

revenues below the SBA's small entity thresholds, may operate in Category I or II fisheries. As fishing vessels operating in Category I or II fisheries, they are required to register with NMFS. The MMPA registration process is integrated with existing state and Federal licensing, permitting, and registration programs. Therefore, individuals who have a state or Federal fishing permit or landing license, or who are authorized through another related state or Federal fishery registration program, are currently not required to register separately under the MMPA or pay the \$25 registration fee. Through this integrated process, registration under the MMPA, including the \$25 registration fee, is only required for vessels participating in a Category I or II non-permitted fishery. All Category I and II fisheries listed on the 2020 proposed LOF are permitted through state or Federal processes, and registration under the MMPA is covered through the integrated process. Therefore, this proposed rule would not impose any direct costs on small entities.

The MMPA requires any vessel owner or operator participating in a fishery

listed on the LOF to report to NMFS, within 48 hours of the end of the fishing trip, all marine mammal incidental mortalities and injuries that occur during commercial fishing operations. These marine mammal mortalities and injuries are reported using a postage-paid, OMB approved form (OMB number 0648-0292). This postage-paid form requires less than 15 minutes to complete and can be dropped in any mailbox, faxed, emailed, or completed online within 48 hours of the vessels return to port. Therefore, record keeping and reporting costs associated with this LOF are minimal and would not have a significant impact on a substantial number of small entities.

If a vessel is requested to carry an observer, vessels will not incur any direct economic costs associated with carrying that observer. As a result of this certification, an initial regulatory flexibility analysis is not required and none has been prepared. In the event that reclassification of a fishery to Category I or II results in a TRP, economic analyses of the effects of that TRP would be summarized in subsequent rulemaking actions.

This proposed rule contains existing collection-of-information (COI)

requirements subject to the Paperwork Reduction Act and would not impose additional or new COI requirements. The COI for the registration of individuals under the MMPA has been approved by the Office of Management and Budget (OMB) under OMB control number 0648–0293 (0.15 hours per report for new registrants). The requirement for reporting marine mammal mortalities or injuries has been approved by OMB under OMB control number 0648–0292 (0.15 hours per report). These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the COI. Send comments regarding these reporting burden estimates or any other aspect of the COI, including suggestions for reducing burden, to NMFS and OMB (see **ADDRESSES** and **SUPPLEMENTARY INFORMATION**).

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with a COI, subject to the requirements of the Paperwork Reduction Act, unless that COI displays a currently valid OMB control number.

This proposed rule has been determined to be not significant for the purposes of Executive Orders 12866 and 13563.

This rule is not expected to be an E.O. 13771 regulatory action because this rule is not significant under E.O. 12866.

In accordance with the Companion Manual for NOAA Administrative Order (NAO) 216–6A, NMFS preliminarily determined that publishing this proposed LOF qualifies to be categorically excluded from further NEPA review, consistent with categories of activities identified in Categorical Exclusion G7 (“Preparation of policy directives, rules, regulations, and guidelines of an administrative, financial, legal, technical, or procedural nature, or for which the environmental effects are too broad, speculative or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or on a case-by-case basis”) of the Companion Manual and we have not identified any extraordinary circumstances listed in Chapter 4 of the Companion Manual for NAO 216–6A that would preclude application of this categorical exclusion. If NMFS takes a management action, for example, through the development of a TRP, NMFS would first prepare an Environmental Impact Statement or Environmental Assessment, as required under NEPA, specific to that action.

This proposed rule would not affect species listed as threatened or endangered under the ESA or their associated critical habitat. The impacts of numerous fisheries have been analyzed in various biological opinions, and this proposed rule will not affect the conclusions of those opinions. The classification of fisheries on the LOF is not considered to be a management action that would adversely affect threatened or endangered species. If NMFS takes a management action, for example, through the development of a TRP, NMFS would consult under ESA section 7 on that action.

This proposed rule would have no adverse impacts on marine mammals and may have a positive impact on marine mammals by improving knowledge of marine mammals and the fisheries interacting with marine mammals through information collected from observer programs, stranding and sighting data, or take reduction teams.

This proposed rule would not affect the land or water uses or natural resources of the coastal zone, as specified under section 307 of the Coastal Zone Management Act.

[Docket No. 191001–0049]

RIN 0648–BI35

Magnuson-Stevens Act Provisions; Fisheries off West Coast States; Pacific Whiting; Pacific Coast Groundfish Fishery Management Plan; Amendment 21–4; Catch Share Program, 5-Year Review, Follow-on Actions

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes this measure to enact a range of Follow-on Actions identified in the course of conducting the Pacific Coast Groundfish Trawl Catch Share Program 5-Year Review. These actions are intended to complete outstanding elements of the Pacific Coast Groundfish Trawl Catch Share Program, respond to problems identified after implementing the program, and modify outdated regulations. This action proposes regulations in accordance with Amendment 21–4 to
