area." The section further provides that permits to conduct such activities may be issued only if it is determined that: The applicant is qualified; the activities will not interfere with or endanger operations under any lease issued or maintained pursuant to OCSLA; and the activities will not be unduly harmful to aquatic life, result in pollution, create hazardous or unsafe conditions, unreasonably interfere with other uses of the area, or disturb any site, structure, or object of historical or archaeological significance.

Applicants for permits are required to submit Form BOEM–0327 to provide the information necessary to evaluate their qualifications, and upon approval, respondents are issued a permit. Once an application is reviewed and approved, a permit (Form BOEM–0328 and Form BOEM–0329) is signed by BOEM and the permittee.

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104–133, 110 Stat. 1321, April 26, 1996), and OMB Circular A–25 authorize Federal agencies to recover the full cost of services that confer special benefits. All geological and geophysical permits are subject to cost recovery, and BOEM regulations specify service fees for these requests.

Regulations to carry out these responsibilities are contained in 30 CFR part 551 and are the subject of this information collection renewal. BOEM uses the information to:

• Identify oil, gas, sulfur, and mineral resources in the OCS;

• Ensure the receipt of fair value for mineral resources;

• Ensure that the exploration activities do not cause harm to the environment or persons, or create unsafe operations and conditions, damage historical or archaeological sites, or interfere with other uses;

• Analyze and evaluate preliminary or planned drilling activities;

• Monitor progress and activities in the OCS;

• Acquire geological and geophysical data and information collected under a Federal permit offshore; and

• Determine eligibility for reimbursement from the government for certain costs.

In this renewal, BOEM is renewing Form BOEM–0327—Requirements for Geological or Geophysical Explorations or Scientific Research on the Outer Continental Shelf. This form consists of the requirements for geological and geophysical activities requiring Permits and Notices, along with the application that the respondent submits to BOEM for approval, as well as a nonexclusive use agreement for scientific research, if applicable.

Ūpon BOEM approval of the application, respondents are issued a permit using Form BOEM-0328, Permit for Geophysical Exploration for Mineral Resources or Scientific Research on the Outer Continental Shelf, for conducting geophysical exploration for mineral resources or scientific research, or Form BOEM–0329, Permit for Geological Exploration for Mineral Resources or Scientific Research on the Outer Continental Shelf, for conducting geological exploration for mineral resources or scientific research. These permits are filled in by BOEM and do not incur a respondent hour burden. However, BOEM plans to revise these permits to include additional language. The modifications to the permits will allow BOEM to request the geological and geophysical data prior to the permittee deleting or removing the data from records, but still provides the option for the permittee to no longer maintain the data after ten years. The following describes the proposed changes:

• Form BOEM–0328 would include additional language in Section IV Paragraph (A) stating:

"After a period of 10 years from the issuance of the permit, the permittee must notify the Supervisor in writing if their intention is to no longer maintain all or part of the geophysical data, processed geophysical information, and interpreted geophysical information, and provide the Supervisor 30 days to request that the permittee submit for inspection and possible retention all or part of the geophysical data, processed geophysical information, and interpreted geophysical data, processed geophysical information, and interpreted geophysical information."

• Form BOEM–0329 would include additional language in Section VI Paragraph (A) stating:

"After a period of 10 years from the issuance of the permit, the permittee must notify the Supervisor in writing if their intention is to no longer maintain all or part of the geological data, analyzed geological information, processed geological information, and interpreted geological information, and provide the Supervisor 30 days to request that the permittee submit for inspection and possible retention all or part of the geological data, analyzed geological information, processed geological information, and interpreted geological information, and interpreted geological information, and interpreted geological information."

Title of Collection: 30 CFR 551, Geological and Geophysical Explorations of the OCS.

OMB Control Number: 1010–0048. *Form Number:* BOEM–0327, Requirements for Geological or Geophysical Explorations or Scientific Research on the Outer Continental Shelf.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: Potential respondents comprise Federal OCS oil, gas, and sulfur permittees or notice filers.

Total Estimated Number of Annual Responses: 688 responses.

- Total Estimated Number of Annual Burden Hours: 35,254 hours.
- Respondent's Obligation: Mandatory. Frequency of Collection: On occasion,
- annual, or as specified in permit. Total Estimated Annual Non-hour

Burden Cost: \$136,816. Estimated Reporting and

Recordkeeping Hour Burden: The currently approved OMB paperwork burden is 35,254 annual burden hours, and will remain the same.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: October 21, 2019.

Deanna Meyer-Pietruszka,

Chief, Office of Policy, Regulation, and Analysis.

[FR Doc. 2019–23247 Filed 10–24–19; 8:45 am] BILLING CODE 4310–MR–P

DEPARTMENT OF JUSTICE

Membership of the Senior Executive Service and Senior Level Standing Performance Review Boards

AGENCY: Department of Justice. **ACTION:** Notice of Department of Justice's standing members of the Senior Executive Service and Senior Level Performance Review Boards.

Pursuant to the requirements of 5 U.S.C. 4314(c)(4), the Department of Justice announces the membership of its 2019 Senior Executive Service (SES) and Senior Level (SL) Standing Performance Review Boards (PRBs). The purpose of a PRB is to provide fair and impartial review of SES/SL performance appraisals, executive development plans, and award recommendations/pay adjustments.

The PRBs will make recommendations regarding the final performance ratings to be assigned, SES/ SL awards and/or pay adjustments to be awarded.

FOR FURTHER INFORMATION CONTACT: Mary A. Lamary, Director, Human -

Resources, Justice Management

Division, Department of Justice, Washington, DC 20530; (202) 514–4350.

Lee J. Lofthus,

Assistant Attorney General for Administration.

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Operations Mining Under a Body of Water

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting the Mine Safety and Health Administration (MSHA) sponsored information collection request (ICR) titled, "Operations Mining Under a Body of Water," to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before November 25, 2019.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the *RegInfo.gov* website at *http:// www.reginfo.gov/public/do/*

PRAViewICR?ref_nbr=201906-1219-001 (this link will only become active on the day following publication of this notice) or by contacting Frederick Licari by telephone at 202–693–8073, TTY 202– 693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_ PUBLIC@dol.gov.*

Submit comments about this request by mail to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL-MSHA, Office of Management and Budget, Room 10235. 725 17th Street NW, Washington, DC 20503; by Fax: 202-395-5806 (this is not a toll-free number); or by email: OIRA_submission@omb.eop.gov. Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: **Departmental Information Compliance** Management Program, Room N1301, 200 Constitution Avenue NW, Washington, DC 20210; or by email: DOL_PRA_PUBLIC@dol.gov.

FOR FURTHER INFORMATION CONTACT: Frederick Licari by telephone at 202– 693–8073, TTY 202–693–8064, (these are not toll-free numbers) or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Operations Mining Under a Body of Water information collection. Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal

mines. Title 30 CFR Sections 75.1716, 75.1716-1 and 75.1716-3 require operators of underground coal mines to provide MSHA notification before mining under bodies of water and to obtain a permit to mine under a body of water if, in the judgment of the Secretary, it is sufficiently large to constitute a hazard to miners. The regulation is necessary to prevent the inundation of underground coal mines with water that has the potential of drowning miners. The coal mine operator submits an application for the permit to the District Manager in whose district the mine is located. Applications contain the name and address of the mine; projected mining and ground support plans; a mine map showing the location of the river, stream, lake or other body of water and its relation to the location of all working places; and a profile map showing the type of strata and the distance in elevation between the coal bed and the water involved. MSHA has provided an exemption from notification and permit application for mine operators where the projected mining is under any water reservoir constructed by a Federal agency as of December 30, 1969, and where the operator is required by such agency to operate in a manner that adequately protects the safety of miners. The exemption for such mining is addressed by 30 CFR Sections 75.1716 and 75.1717. MSHA also encourages a mine operator to provide more information in an application. When the operator files an application for a permit, in addition to the information required under 30 CFR Section 75.1716-3, operators are also encouraged to include a map of the active areas of the
