

This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions

and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Form numbers: The EPA has developed forms, some of which are Excel-based, for the compliance programs in this ICR. Manufacturers

may download these forms from EPA's website at <https://www.epa.gov/ve-certification/certification-non-electric-motorcycles> and submit these forms through the EPA's engine and vehicle compliance information system's (EV-CIS) document module. All of these forms are available for review in the Docket EPA-HQ-OAR-2016-0027.

Form title	New or previous	Current form No.
Highway Motorcycle HC+NO _x Average Exhaust Emissions Model Year Report	Previous	5900-339
Manufacturer Production Report for Engine/Equipment Manufacturers—Heavy-Duty, Nonroad, and Highway Motorcycles.	Previous	5900-90
List of Emissions Related Components	New	
Catalyst Information	Previous	5900-464

Respondents/affected entities: Entities potentially affected by this action are on-highway motorcycle manufacturers and importers.

Estimated number of respondents: 70.

Frequency of response: Quarterly and annually.

Estimated total annual hour burden: 5,453.

Estimated total annual cost: \$1,188,628.31, which includes \$18,680.00 annualized operation and maintenance costs, \$42,664.00 annualized capital/startup costs, and \$988,626.31 annual labor costs.

These estimates reflect an update to the previous cost estimates for on-highway motorcycles previously culled and compiled for the current ICR for highway motorcycle certification and compliance. Previously, we estimated more manufacturers that would maintain their own testing and certification facility. Currently, a larger percentage of manufacturers use contract test facilities and utilize carry over data for certification and compliance requirements.
