SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

Regulations pertaining to gear markings are set forth at 50 CFR part 679 and in the annual management measures published in the **Federal Register** pursuant to 50 CFR 300.62. This information collection contains the following gear identification requirements for participants in the groundfish fisheries in the Exclusive Economic Zone off Alaska and for vessels using longline pot gear to fish for individual fishing quota (IFQ) sablefish in the Gulf of Alaska (GOA).

Marker Buoys

All hook-and line, longline pot, and pot-and-line marker buoys carried on board or used by any vessel regulated under 50 CFR part 679 must be marked with the vessel's Federal Fisheries Permit number or Alaska Department of Fish and Game vessel registration number. Regulations that marker buoys be marked with identification information are essential to facilitate fisheries enforcement and actions concerning damage, loss, and civil proceedings. The ability to link fishing gear to the vessel owner or operator is crucial to enforcement of regulations.

Longline Pot Gear Vessel Registration and Tags

A vessel owner using longline pot gear to fish for IFQ sablefish in the GOA must annually register their vessel with the National Marine Fisheries Service (NMFS) and be assigned pot tags for that vessel. Each pot tag is printed with a unique serial number for identification, and is specific to the IFQ regulatory area to which the tag is registered and where the pot gear will be fished. A valid pot tag must be securely attached to each pot used to fish for IFQ sablefish in the GOA.

Vessel owners submit the form "Vessel Registration and Request for IFQ Sablefish Pot Gear Tags" to annually register their vessels and to request new pot tags if a vessel does not have previously issued tags. Tags assigned to a vessel in previous years are valid as long as the tag can be secured to a pot and the serial number is legible. Vessel owners submit the form "Request for Replacement of Longline Pot Gear Tags" if previously issued tags need to be replaced.

NMFS requires all vessel operators using longline pot gear in the GOA sablefish IFQ fishery to complete logbooks (see OMB Control Numbers 0648-0213). When the number of pots
