[Project No. 14775–002]

Marine Renewable Energy Collaborative of New England; Notice of Successive Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On October 24, 2019, Marine Renewable Energy Collaborative of New England, Inc. filed an application for a successive preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), to study the feasibility of the proposed Bourne Tidal Test Site to be located on the Cape Cod Canal, near the

Towns of Bourne and Sandwich, in Barnstable County, Massachusetts. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) A 45-foot-high, 23-foot-wide support structure; (2) a 25-kilowatt turbine-generator unit (other in-stream turbine-generators would also be tested at the site); (3) a 500-foot-long, 13.2-kilovolt transmission line; and (4) appurtenant facilities. The estimated average annual generation of the project would be 54.7 megawatt-hours. The proposed project would occupy approximately 0.10 acres of federal land under the jurisdiction of the U.S. Army Corps of Engineers.
