Abstract: The regulations at 30 CFR part 250, subpart F, concern the Oil and

Gas Well-Workover Operations regulatory requirements of oil, gas, and sulphur operations in the Outer Continental Shelf (OCS) and are the subject of this collection. This request also covers any related Notices to Lessees and Operators (NLTs) that BSEE issues to clarify, supplement, or provide additional guidance on some aspects of our regulations.

The BSEE uses the information collected under the Subpart F regulations to ensure that operations on the OCS are carried out in a safe and pollution-free manner, do not interfere with the rights of other users on the OCS, and balance the protection and development of OCS resources. Specifically, we use the information collected to:

- Review log entries of crew meetings to verify that safety procedures have been properly reviewed.
- review well-workover procedures relating to hydrogen sulfide (H₂S) to ensure the safety of the crew in the event of encountering H₂S.
- review well-workover diagrams and procedures to ensure the safety of well-workover operations.
- verify that the crown block safety device is operating and can be expected to function and avoid accidents.
- verify that the Blowout Preventer Equipment (BOPE) is in compliance with the latest Well Control Rule (WCR) and API Standard 53.
- assure that the well-workover operations are conducted on well casing that is structurally competent.

SUPPLEMENTARY INFORMATION: The Commission instituted the underlying investigation on December 20, 2017, based on a complaint filed on behalf of Align Technology, Inc. of San Jose,

California (“Align”). 82 FR (Dec. 20, 2017). The complaint alleged violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain color intraoral scanners and related hardware and software by reason of infringement of certain claims of U.S. Patent Nos. 8,363,228 (“the ‘228 patent”); 8,451,456 (“the ‘456 patent”); 8,675,207 (“the ‘207 patent”); 9,101,433 (“the ‘433 patent”); 948,931 (“the ‘931 patent”); and 6,685,470 (“the ‘470 patent”). See *id.* The complaint named 3Shape A/S and 3Shape Inc. as the respondents. On March 15, 2018, the ALJ granted Align’s unopposed motion to amend the complaint and notice of investigation to add as an additional respondent in this investigation 3Shape Trios A/S of Copenhagen, Denmark (respondents are collectively referred to as “3Shape”). See 83 FR 13781–82 (March 30, 2018), *unreviewed*, Notice (March 27, 2018). The Office of Unfair Import Investigations did not participate in the investigation.

On March 1, 2019, the ALJ issued his final ID finding that no violation of section 337 has occurred. On March 18, 2019, Align filed a petition for review and 3Shape filed a contingent petition for review of the ID. On March 26, 2019, all of the parties filed responses to the respective petitions for review.

On July 18, 2019, the Commission determined to review the final ID in part. Specifically, the Commission determined to review the ID’s findings on the following issues: (1) Importation; (2) the construction of “processor”; (3) the construction of “confocal imaging techniques”; (4) all findings concerning infringement; (5) all findings concerning invalidity; (6) all findings concerning whether Align’s products practice one or more claims of the asserted patents; and (7) all findings concerning whether Align’s financial investments and activities relating to Align’s products meet the domestic industry requirement. The Commission requested briefing on some of the issues under review, and requested submissions from the parties, government agencies and the public on remedy, bonding, and the public interest. 84 FR 35688 (July 25, 2019). On July 30, 2019, Align and 3Shape filed their written responses to the Commission’s request for briefing. On August 6, 2019, Align and 3Shape filed their reply submissions.

The Commission has examined the record of this investigation, including the ALJ’s final ID, the petitions for review, and the responses thereto, and filings in response to the Commission’s request for briefing. The Commission

affirms in part, with modified reasoning as discussed in the accompanying opinion, the ID’s finding of no violation of section 337. Specifically, the Commission determines: (1) Claim 1 of each of the ‘228, ‘456, and ‘207 patents is infringed; (2) claim 26 of the ‘228 patent is infringed; (4) claim 15 of the ‘456 patent is not infringed; (5) claim 12 of the ‘433 is not infringed; (6) the asserted claims of the ‘228 and ‘456 patents are invalid for failing to meet the written description requirement; (7) the ‘228, ‘456, and ‘433 patents are not invalid as anticipated or obvious; (8) the asserted claim of the ‘207 patent is invalid as obvious; (9) Align’s products do not practice the ‘228, ‘456, and ‘207 patents; (10) Align’s products practice claim 12 of the ‘433 patent; (11) the importation requirement is met for 3Shape Trios A/S; (12) to take no position on whether 3Shape A/S and 3Shape Inc. have met the importation requirement; (13) to take no position on whether claim 4 of the ‘228 patent is infringed; (14) to take no position on secondary considerations for the ‘228, ‘456, and ‘433 patents; and (15) to take no position on whether Align’s investments and activities relating to Align’s products meet the domestic industry requirement. The Commission also affirms, without modification, the ID’s finding of no violation for the ‘931 and ‘470 patents. The investigation is terminated.

The authority for the Commission’s determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission’s Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: November 22, 2019.

Lisa Barton,

Secretary to the Commission.
