#### **SUPPLEMENTARY INFORMATION:**

##### **A. Background**

Section 5(a) of the Consumer Product  
 Safety Act, 15 U.S.C. 2054(a), requires  
 the CPSC to collect information related  
 to the causes and prevention of death,  
 injury, and illness associated with  
 consumer products. That section also  
 requires the CPSC to conduct  
 continuing studies and investigations of  
 deaths, injuries, diseases, other health  
 impairments, and economic losses  
 resulting from accidents involving  
 consumer products.

The CPSC obtains information about  
 product-related deaths, injuries, and  
 illnesses from a variety of sources,  
 including newspapers, death  
 certificates, consumer complaints, and  
 medical facilities. In addition, the CPSC  
 receives information via its internet  
 website through forms reporting on  
 product-related injuries or incidents.  
 The CPSC also operates the National  
 Electronic Injury Surveillance System  
 (NEISS), which provides timely data on  
 consumer product-related injuries  
 treated in hospital emergency  
 departments in the United States. The  
 CPSC also uses the NEISS system to  
 collect information on childhood  
 poisonings, in accordance with the

Poison Prevention Packaging Act of  
 1970.

From these sources, CPSC staff selects  
 cases of interest for further  
 investigation, by contacting persons  
 who witnessed or were injured in  
 incidents involving consumer products.  
 These investigations are conducted on-  
 site (face-to-face), by telephone, or by  
 the internet. On-site investigations are  
 usually made in cases where CPSC staff  
 needs photographs of the incident site,  
 the product involved, or detailed  
 information about the incident. This  
 information also can come from contact  
 with state and local officials, including  
 police, coroners, and fire investigators,  
 and others with knowledge of the  
 incident.

Through interagency agreements, the  
 CPSC also uses the NEISS system to  
 collect information on injuries for the  
 Centers for Disease Control and  
 Prevention (CDC) under the NEISS All-  
 Injury Program (NEISS–AIP). The  
 NEISS–AIP is a sub-sample of  
 approximately two-thirds of the full  
 NEISS sample. In addition to the  
 standard data variables collected on all  
 NEISS injuries, the NEISS–AIP collects  
 additional variables on several studies  
 for CDC (Adverse Drug Events, Assaults,  
 Self-Inflicted Violence, and Work-  
 Related Injuries) and one study on non-  
 crash motor vehicle-related injuries for  
 the National Highway and  
 Transportation Safety Administration  
 (NHTSA). Additional special study  
 variables are collected for CDC in the  
 full NEISS sample for firearm-related  
 injuries.

The current NEISS probability sample  
 was drawn and recruited in 1995–1996  
 and implemented in 1997. Since then,  
 several of the selected hospitals have  
 stopped participating for reasons such  
 as closures and mergers with other  
 hospitals, and were replaced with other  
 purposively-selected hospitals. While  
 hospital weights are adjusted to account  
 for changes in the population of  
 hospitals over time, the current sample  
 of hospitals participating in NEISS is  
 being reviewed to assess their  
 representativeness. The selection  
 process may be revised in future years  
 in order to strengthen the quality and  
 representativeness of the estimates  
 generated by the NEISS–AIP. CPSC has  
 entered into a contract with Westat to  
 perform an independent statistical  
 assessment of the NEISS and NEISS–  
 AIP samples under CPSC contract  
 61320619F0134 with a period of  
 performance of September 27, 2019,  
 through September 26, 2020.
