

actionable communications between FRA and its customers and stakeholders. It also allows feedback to contribute directly to the improvement of program management.

Improving FRA's programs requires ongoing assessment of service delivery, meaning a systematic review of the operation of a program compared to a set of explicit or implicit standards as a means of contributing to the continuous improvement of the program. FRA will collect, analyze, and interpret information gathered through this generic clearance to identify strengths and weaknesses of current services and make improvements in service delivery based on feedback. The solicitation of feedback will target areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. FRA will assess responses to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and

stakeholders on FRA's services will be unavailable.

FRA will only submit a collection for approval under this generic clearance under the following conditions:

- The information gathered is only used internally for general service improvement and program management purposes and is not intended for public release;
- The information gathered is not used to substantially inform significant policy decisions;
- The information gathered will yield qualitative information; FRA will not design the collection or expect it to yield statistically reliable results or use it as though the results are generalizable to the population of study;
- Participation in the collection is voluntary;
- The collection is low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and is low-cost for both the respondents and the Federal Government;

- The collection is non-controversial and does not raise issues of concern to other Federal agencies;

- The collection is directed to the solicitation of opinions from respondents who have experience with the OMB program or may have experience with the OMB program soon after receiving the collection; and

- With the exception of information needed to provide remuneration for participants of focus groups and cognitive laboratory studies, personally identifiable information (PII) is collected only to the extent necessary and is not retained by FRA.

Type of Request: Extension without change of a current information collection.

Affected Public: Individuals and Households, Businesses and Organizations, State, Local or Tribal Governments.

Frequency of Submission: Once per request.
