Under U.S. Fish and Wildlife Service and NMFS' joint Safe Harbor Policy (64 FR 32717, June 17, 1999), Safe Harbor Agreements provide incentives to property owners to restore, enhance, or maintain habitats and/or populations of listed species that result in a net conservation benefit to these species. Under the policy, landowners are provided certainty relative to future property-use restrictions, even if their conservation efforts attract listed species onto enrolled properties or increase the numbers or distribution of listed species already present. Subject to specifications in the relevant documents, these regulatory assurances allow the landowners to alter or modify enrolled property, even if such alteration or modification results in the incidental take of a listed species to such an extent that it returns the species back to the originally agreed upon baseline conditions. NMFS reviewed each present baseline and elevated baseline determination in each site plan. The site plans and Agreement also contain a monitoring component that requires the Applicants to ensure compliance with the terms and conditions, and that the specified baseline levels of habitat for the covered species is maintained on the enrolled property. Results of the monitoring efforts will be provided to NMFS by the Applicants in an annual report for the duration of the 20-year permit term.

Upon approval of the Agreement and site plans, and consistent with the Safe Harbor Policy, NMFS will issue enhancement of survival permits to the Applicants. The enhancement of survival permits will authorize the Applicants to take SONCC coho salmon incidental to the implementation of the

covered activities specified in the site plans and Agreement, incidental to other lawful uses of the enrolled property, and to return to present baseline and elevated baseline conditions, if desired, at the end of the site plans and Agreement. In addition to meeting other criteria, actions to be performed under the enhancement of survival permit must not jeopardize the existence of federally listed species.

#### National Environmental Policy Act

Issuing an ESA section 10(a)(1)(A) permit constitutes a Federal action requiring NMFS to comply with the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) as implemented by 40 CFR parts 1500–1508 and NOAA Administrative Order 216–6, Environmental Review Procedures for Implementing the National Policy Act (1999). NMFS will evaluate the application(s) and determine the level of NEPA analysis needed for this action.

#### Public Comments Solicited

NMFS invites the public to comment, including any written data, views, or arguments, on the permit applications during the public comment period, which ends on the date specified above. This notice is provided pursuant to section 10(c) of the ESA (16 U.S.C. 1539(c)), 50 CFR 222.303. All comments and materials received, including names and addresses, will become part of the administrative record and may be released to the public. We provide this notice in order to allow the public, agencies, or other organizations to review and comment on these documents.

#### Next Steps

NMFS will evaluate the applications, associated documents, and comments submitted to determine whether the applications meet the requirements of Section 10(a)(1)(A) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day public comment period and after NMFS has fully considered all relevant comments received. NMFS will also meet other legal requirements prior to taking final action, including preparation of a biological opinion. NMFS will publish notice of its final action in the **Federal Register**.
